

Transport Access Program

Moree Station Upgrade

Community notification

Moree Key Features Plan (noting the ARTC Inland Rail project which has been separately assessed to be delivered at a later date)

The NSW Government is improving accessibility at Moree Station

The NSW Government is improving accessibility at Moree Station. This upgrade will be delivered as part of the Transport Access Program, an initiative to provide a better experience for public transport customers by delivering modern, safe, and accessible infrastructure.

Contract award

Since receiving planning approval in early November 2021, the contract for the construction of Moree Station upgrade has been awarded to North Construction. Works are expected to begin late November 2021.

Thank you to everyone who provided feedback on the proposed concept design. Your feedback has helped the project team to understand what is important to customers and the community.

Project overview

As part of this program, Moree Station will be upgraded to provide an accessible station for people with a disability, limited mobility, parents/carers with prams and customers with luggage. The upgrade will include:

- upgrades to existing footpaths and ramps around the station precinct
- upgrades to the taxi zone and kiss and ride space
- a new accessible parking space
- a formalised bus stop at the station entrance
- modifications to the waiting room and ticket office
- improved amenities including ambulant toilets
- a new boarding zone on the platform
- tactile indicators along the platform
- improvements to wayfinding and lighting.

Construction is due to commence in November 2021 and we anticipate it will take approximately six months to complete the Transport Access Program works. In separate works ARTC, who lease the network from Transport, is planning to extend Moree platform and realign nearby tracks in the future.

A temporary construction compound will be required for equipment, machinery, plant and other vehicles, and material storage. The site compound will be located on Morton Street, east of the station platform and south of the entry to the commuter carpark. It will not block entry into the commuter car park and access will remain for both cars and buses.

Vehicles and equipment to be used include delivery and concrete trucks, concrete pumps, concrete saws, cranes, excavators, generators, and hand tools.

Working hours

Construction work is proposed to be undertaken during standard construction hours:

- **7:00am to 6:00pm Monday to Friday**
- **8:00am to 1:00pm Saturday**
- No works on Sundays or public holidays

Works undertaken outside standard hours would be subject to prior approval from TfNSW and in consultation with the local community.
