

Transport Access Program

Goulburn Station Upgrade

Project update

April 2021

The NSW Government is improving accessibility at Goulburn Station

Transport for NSW is improving accessibility at Goulburn Station. The upgrade will provide a station precinct that is accessible to people with a disability or limited mobility, parents/carers with prams, and customers with luggage.

Upcoming work

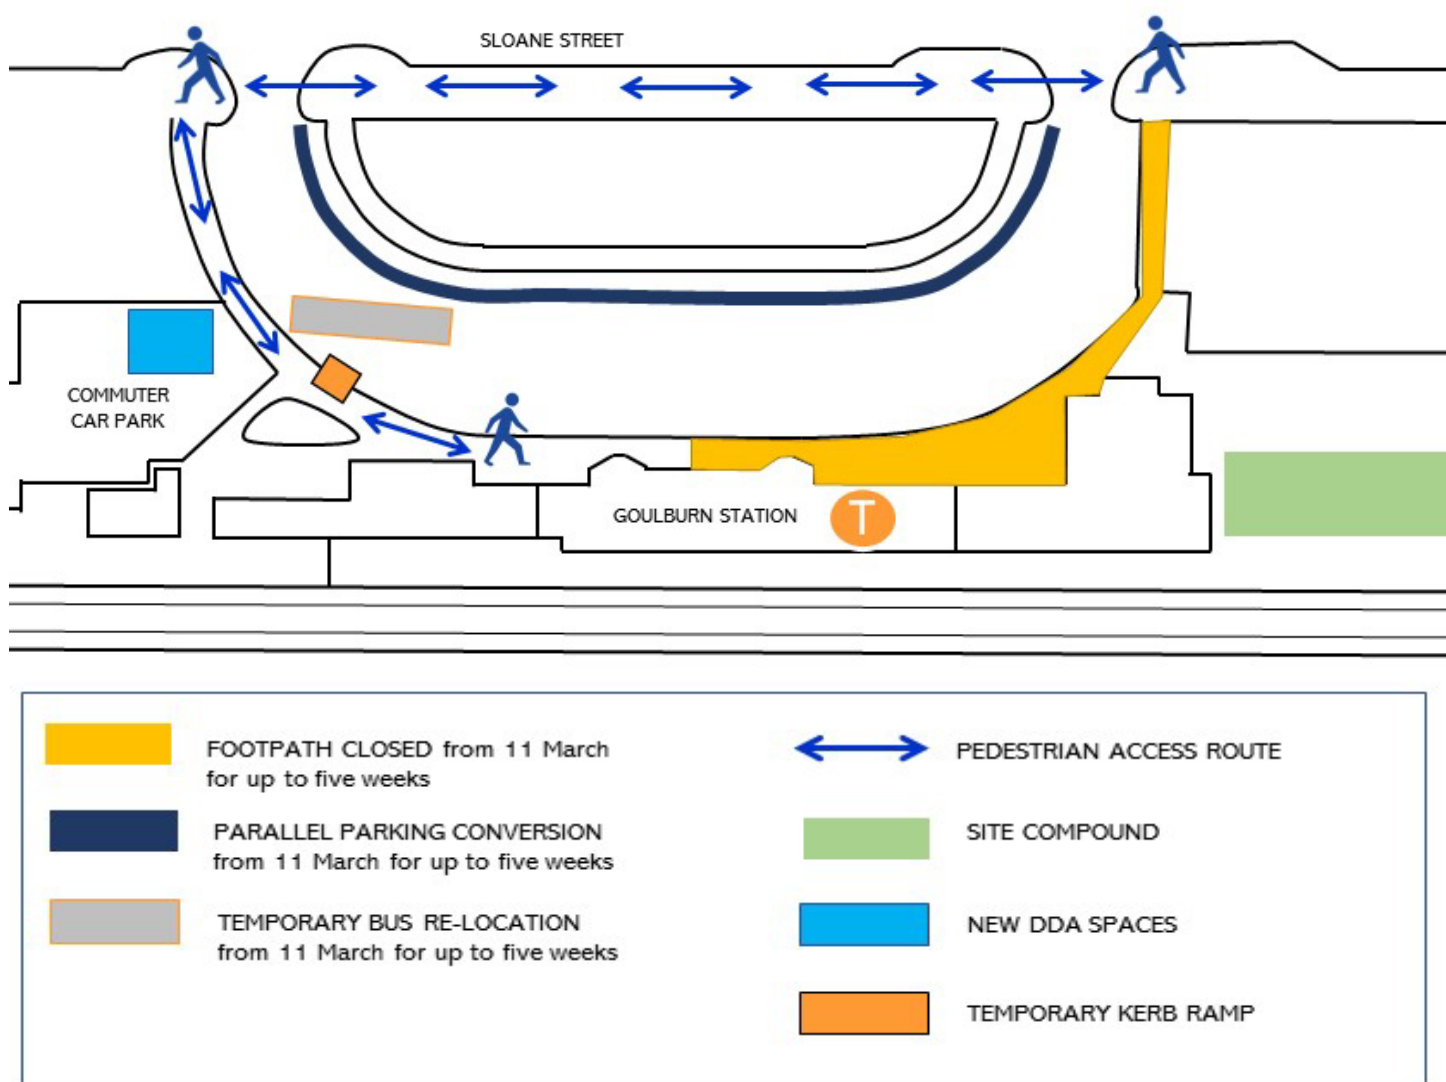

During April the following work will occur for the station upgrade:

- Further upgrades to the station forecourt footpath
- **Opening of newly upgraded toilet facilities**
- Installation of wayfinding signage
- Platform area upgrades including tactile installation
- Lighting installation and testing in forecourt areas.

Temporary pedestrian access changes

Work to regrade the forecourt footpath is currently taking place. For the safety of customers, the eastern side footpath has closed and the pedestrian access to the station is now via the western entrance to the station. Please see map below for details.

This change will be in place until mid-April, weather permitting. During this time, commuter car parking opposite the station has been temporarily changed to parallel parking, and vehicle access remains the same. Signage will be in place around the station, with traffic control on site when required.

Construction hours

Standard construction hours are **7am to 6pm Monday to Friday** and **8am to 1pm on Saturdays**.

For the safety of customers and our workers, some work may be required to be completed outside normal hours. Noise assessments will be carried out in advance of any activities outside normal hours to determine the level of noise expected and appropriate mitigation measures to be applied. Nearby residents and businesses will be notified of any work occurring outside standard hours.

Transport for NSW is committed to minimising impacts during construction, however, with infrastructure projects it is inevitable construction activities will result in some noise. A number of measures will be in place to reduce impacts, such as completing noisy work during the day where possible, scheduling break periods during noisy work, using shields or noise blankets, switching off equipment when it isn't being used, and using the quietest available equipment and placing it away from nearby properties.

Work activities will be monitored to ensure noise levels are being managed.

Keep the community informed

Transport for NSW is committed to keeping the community informed throughout the delivery of the project. You can stay informed via regular updates to the project website transport.nsw.gov.au/goulburn. We will also keep the community informed via regular newsletters and signage.

For further information on the project or to receive project updates via email, please call the Project Infoline on 1800 684 490 or email projects@transport.nsw.gov.au. For all urgent enquiries or complaints regarding construction activities, please call our 24-hour Construction Response Line on **1800 775 465**.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **1800 684 490**. The interpreter will then assist you with translation.
