

Transport Access Program

Unanderra Station Upgrade

COMMUNITY NOTIFICATION

NOVEMBER 2021

The NSW Government is improving accessibility at Unanderra Station. This upgrade will be delivered as part of the Transport Access Program, an initiative to provide a better experience for public transport customers by delivering modern, safe, and accessible infrastructure.

Hoardings surround some areas of the existing station building for the safety of staff and customers.

Upcoming work

Work inside the existing station building will continue with changes to the staff areas to allow for the new family accessible toilet and a unisex ambulant toilet. Electrical contractors will be on-site to continue upgrading the station's power and communication services.

This work will take place behind the hoardings for the safety of workers and customers. The hoardings have slightly reduced the platform width, and customers are urged to move past these areas for safety and clearance purposes. There will be signage directing passengers along the pathways and platform.

Tools and machinery to be used include delivery trucks and power tools.

For more information call **1800 684 490**

The planning and design activities continue for the new footbridge which will be constructed in the centre of the platform with three connecting stairways and three lifts. This will replace the old footbridge once the new footbridge and lifts are operational.

Working hours

To support industry and continue the delivery of critical infrastructure, the NSW Government has amended the rules around operating hours on work sites. Sites can now operate **seven days a week and on public holidays from 7am to 6pm**. These amendments allow worksites to support social distancing and the health and wellbeing of workers.

To compensate for the delays caused by Covid-19 restrictions, the Unanderra Station Upgrade will be using the extended hours, and some weekend work will be taking place on Saturdays in line with the Covid-19 extended hours.
