

# Commuter Car Park Program

## Warwick Farm

**Project update**

**August 2021**

*Photo above: Work has started Warwick Farm Station – scaffolding and the tower crane are in place.*

Transport for NSW is delivering additional commuter parking at Warwick Farm to provide the community with more convenient access to public transport and reduce congestion on our roads. The project includes adding two levels to the existing multi-storey commuter car park to provide approximately 250 additional commuter parking spaces. Construction of the additional levels is now underway, and is expected to be open to commuters in early 2022.

### **Progress update**

In line with new restrictions introduced by the NSW Government on 11 August 2021, construction of the car park extension has restarted with a reduced workforce. A tower crane was installed adjacent to Hart Street in early July, demolition work, and preparation work for the new level four started prior to the construction pause. To allow work to be undertaken safely, level 2 and the rooftop level of the car park are now closed. Level 1 parking, the passenger lift, and the stairwells were temporarily closed from 14 August.

### **Commuter parking during the work**

During construction, there will be a reduced number of car spaces available in the commuter car park. We apologise in advance for any inconvenience caused due to our work. It may take you longer than usual to find a parking space so please plan your journey ahead of time.

We will make car spaces available as early as possible. Further updates will be provided as the work progresses, including the reopening dates for stairs, lifts and parking.

For the safety of the public and workers during large concrete pours, **up to 12 parking spaces** adjacent to the eastern side of the multi-storey car park will be **intermittently unavailable from late August to mid-October**. Concrete trucks and a concrete pump will need to utilise these parking spaces for approximately two days each week. The parking spaces will be made available to commuters between these large concrete pours.

Traffic control and signage will be in place to assist customers with the changes. Please refer to the map below for an overview of the current position and upcoming changes.

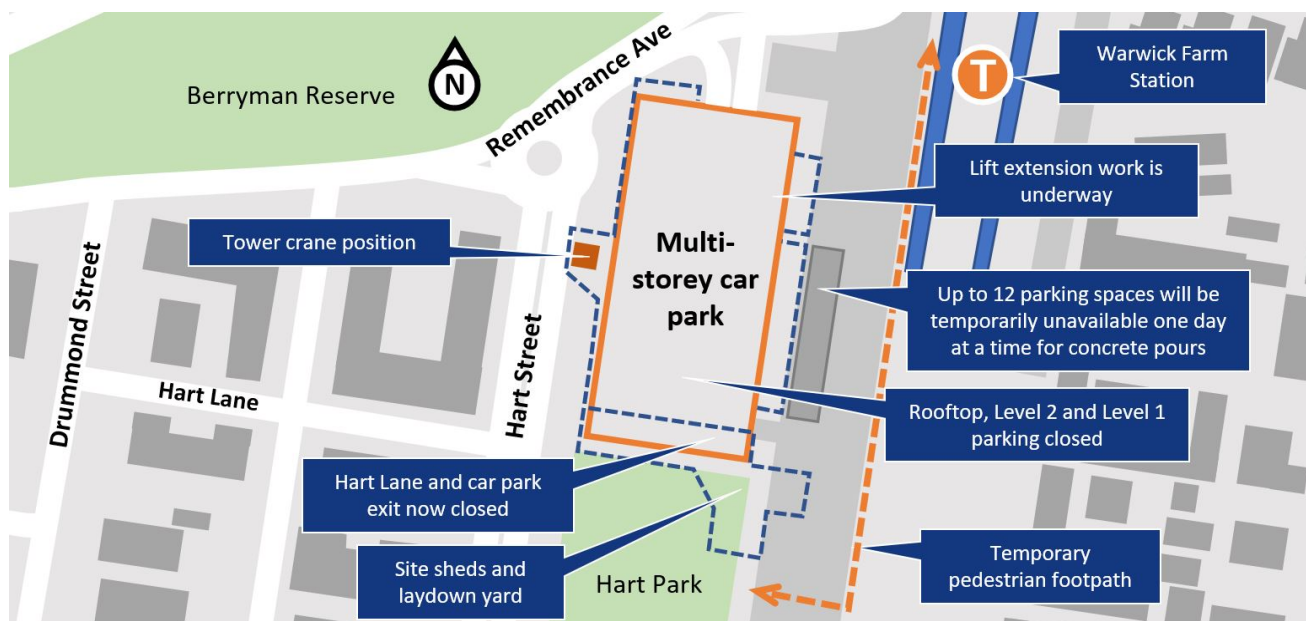

## Upcoming construction work

Over the next three months, work scheduled to take place will include construction of the new upper levels of the car park structure, work to extend the existing lift well, and demolition and concrete work to build a new second lift. Up to **two concrete pours per week** are currently scheduled, of which on **six occasions**, between 23 August and mid-October, the larger concrete pours **may run until 9pm**. The extended hours of work may include concrete finishing activities, cleaning up, and removal of the concrete pumping equipment from site. All work after 6pm will be as quiet as possible and should not adversely impact neighbouring residents.

Deliveries will be scheduled outside of peak traffic times wherever possible.

These work activities are in line with the current Public Health Orders and a COVIDSafe plan is in place, including face masks and QR codes. Our work program is subject to weather and site conditions. The program and timing of work may change. Majority of work activities will be between **7am to 6pm Monday to Friday** and **from 7am to 5pm on Saturday**.
