

Transport Access Program

Pymble Station Upgrade

Transport for NSW | June 2022

The Pymble Station Upgrade is part of the Transport Access Program, a NSW Government initiative to provide a station that is accessible to people with a disability, limited mobility, parents/carers with prams, and customers with luggage. We thank you for your patience during this important work.

What's next at Pymble in June?

Throughout June, work will continue at Pymble and will include:

- constructing new lifts including installation of structural steel, lift roofs and canopies
- installing a canopy on the station platform
- installing a new power pole within the rail corridor adjacent to the Pacific Highway
- tree removal work on Grandview Street
- vegetation clearing
- installing a new high voltage pole on Grandview Street between Station Street and Wellesley Road
- installing an electrical padmount and high voltage pits within the Pacific Highway car park
- sheet piling and installing a high voltage pit on Grandview Street
- public domain works on Grandview Street and Pacific Highway, including upgrades to footpaths, kerbs, and gutters

Please note, access will remain for pedestrians and motorists along Grandview Street and Pacific Highway while we carry out the public domain works where possible.

Out of hours work in June

We will be working around the clock over the June long weekend from **4am Saturday 11 June to 11pm Monday 13 June**.

We will also be working overnight **8pm to 5am on Wednesday 15 June and Thursday 16 June** completing roof fit out on the new lifts.

Pacific Highway

Temporary car park closure

The Pacific Highway car park will be closed from **4am Saturday 11 June** to **11pm Monday 13 June** to allow for the installation of the new electrical pit and structural steel as part of the new lifts.

Temporary lane and footpath closure

During this time, there will be short intermittent closures of the Pacific Highway kerb side lane and footpath to allow for lifting activities to be carried out.

Pedestrian access across the Pacific Highway will be via the pedestrian crossing at the traffic lights, adjacent to Livingstone Avenue.

Grandview Street

Temporary footpath closure and removal of parking

From **7am Monday 30 May** till the **end of June**, there will be a footpath closure in place on Grandview Street between the station entrance and Station Street. A detour will be in place to direct pedestrians around the work area.

During this period, approximately 15 car parking spaces will be unavailable along Grandview Street.

From **4pm Friday 10 June**, parking along Grandview Street between Station Street and Alma Street will be removed to allow for the road closure to be implemented.

Temporary road closure

From **12am Saturday 11 June to 11pm Monday 13 June**, Grandview Street between Station Street and Alma Street and between Station Street and Alma Street will be closed.

During the road closure, shops along Grandview Street will remain open and pedestrian access will be available to the shops along Grandview Street between Station Street and Alma Street. Under traffic control directions safe residential access will be maintained. Traffic delays may be experienced.

Temporary closure of station footbridge

The station footbridge will be closed from **Saturday 11 June to Monday 13 June** to create a safe working distance between the public and our work area. Traffic control and signage will be in place to direct pedestrians.

How will this work affect you?

Our works throughout June will use a range of equipment including excavators, vacuum trucks, road saws, tipper trucks, flatbed trucks, tilt trays, concrete trucks and pumps, elevated working platforms, lighting towers, dump trucks, work vehicles, augers, grinders, chain saws, chippers, cranes, and various hand and power tools.

Our work will be noisy at times. Where possible, measures will be implemented to reduce noise and dust associated with these works, including adding shade cloth mesh to fencing, turning off equipment when not in use, placing equipment as far away as possible from properties and using non-tonal reversing beepers.

Changes to scheduled work

Work schedules are subject to change due to permits, weather and site conditions. Notification will be provided should there be significant changes to the construction program.
