

## Transport Access Program

### Pymble Station Upgrade

The Pymble Station Upgrade is part of the Transport Access Program, an NSW Government initiative to provide a station that is accessible to people with a disability, limited mobility, parents/carers with prams, and customers with luggage. We thank you for your patience during this important work.

### What's next at Pymble in April and May?

Throughout April and May, work will continue at Pymble and will include:

- constructing new lifts with structural steel and glazing
- refurbishment of the station toilets
- works on Grandview Street between Alma Street and Wellesley Road:
  - sheet piling
  - installing high voltage pits and power poles
- installing an electrical padmount and high voltage pits within the Pacific Highway car park
- public domain works on Grandview Street and Pacific Highway, including upgrades to footpaths, kerbs, and gutters
- tree removal on Grandview Street

Please note, access will remain for pedestrians and motorists along Grandview Street and Pacific Highway while we carry out the public domain works.

### Pacific Highway– temporary lane, car park closure and removal of parking

The Pacific Highway car park will be closed from **4am Saturday 7 May** to **11pm Sunday 8 May** to allow for construction of the new electrical pit and installation of the lifts. During this time, there will be short intermittent closures of the Pacific Highway kerb side lane to allow for plant and machinery to enter and exit the car park.

From **4am Saturday 7 May** to **9am Saturday 7 May**, approximately 8 car parking spaces within the Pacific Highway kerb side lane between Telegraph Road and Post Office Street will be unavailable to allow for trucks to access the site.

## Grandview Street – temporary road closure, removal of parking and footpath closure

To facilitate site deliveries and preparation work for the installation of new power poles, from **Monday 2 May to Sunday 8 May**, approximately 8 car parking spaces along Grandview Street, between Station and Alma Street, will be unavailable, and from **Wednesday 4 May to Sunday 8 May**, approximately 15 car parking spaces along Grandview Street between Station Street and Wellesley Road, will be unavailable.

During this period there will also be a footpath closure in place on Grandview Street between the station entrance and Station Street. A detour will be in place to direct pedestrians around the work area.

On **Saturday 7 May** and **Sunday 8 May**, the following road closures along Grandview Street will be in place:

- Grandview Street between Station Street and Alma Street will be closed from **12am Saturday to 11pm Sunday**
- Grandview Street between Station Street and Wellesley Road will be closed from **2am to 4pm Saturday**

During the road closure, shops along Grandview Street will remain open and pedestrian access will be available to the shops along Grandview Street between Station Street and Alma Street. Under traffic control directions safe residential access will be maintained. Traffic delays may be experienced.

## Temporary closure of station footbridge

The station footbridge will be closed from **Saturday 7 May** and **Sunday 8 May** to create a safe working distance between the public and our work area. Traffic control and signage will be in place to direct pedestrians.

## How will this work affect you?

Our works throughout April and May will use a range of equipment including excavators, vacuum trucks, road saws, tipper trucks, flatbed trucks, tilt trays, concrete trucks and pumps, elevated working platforms, lighting towers, dump trucks, work vehicles, augers, grinders, chain saws, chippers, cranes, and various hand and power tools.

Our work will be noisy at times. Where possible, measures will be implemented to reduce noise and dust associated with these works, including adding shade cloth mesh to fencing, turning off equipment when not in use, placing equipment as far away as possible from properties and using non-tonal reversing beepers.

## Changes to scheduled work

Work schedules are subject to change due to permits, weather and site conditions. Notification will be provided should there be significant changes to the construction program.
