

More Trains, More Services Kiama

Project Update | **April 2022**

The More Trains, More Services program is delivering platform extensions and rail asset upgrades between Sydney's CBD and the South Coast to support the introduction of the Mariyung fleet.

What's next at Kiama?

In April, we'll continue construction behind the Kiama Smash Repairs and along the rail corridor stretching back to Kiama Station. Our main work activities include installation of overhead wiring footings, construction of new underground cable routes, drainage upgrades and accepting track deliveries.

Upcoming night work

In April, some activities are required to take place outside of standard construction hours between **Friday 8 April and Monday 11 April**.

This work has been scheduled to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Traffic control will be in place over this weekend on Barney Street, Bong Bong Street and Eddy Street to facilitate safe access in and out of the rail corridor. We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible. We will contact you directly to discuss mitigation measures specific to your property if impacts are anticipated to be intrusive.

Standard construction hours

From **1 April 2022**, COVID-19 construction hours will end, and standard construction hours will revert to **7am-6pm Monday to Friday and 8am-1pm on Saturdays**.

You might hear us working to build a better network

Our construction activities in April include use of vacuum trucks, excavators with rock breakers, concrete trucks, and spoil trucks.

This work is anticipated to be noticeable at local residences.

If noise is anticipated to be intrusive at your address, we will contact you directly to discuss additional mitigation measures specific to your situation.

We would like to apologise in advance for any disruption you may experience as we work to upgrade the network for future service improvements.

Minimising community impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration, and dust management.
