

More Trains, More Services Kiama Station

Transport for NSW | August – October 2022

More Trains, More Services

The More Trains, More Services program is delivering platform extensions and rail asset upgrades between Sydney's CBD and the South Coast to support the introduction of the Mariyung fleet.

What's next at Kiama?

In the coming months, we will continue working on asset upgrades inside the rail corridor between the Kiama Smash Repairs and Kiama Station. Our main activities include the demolition of old overhead wiring footings, construction of new underground cable routes and drainage upgrades. We will also be completing some retaining wall work along the embankment near the Barney St Bridge, removing old track and preparing for reinstatement of new track.

Upcoming night work

Some activities are required to take place outside of standard construction hours between **6pm Friday 30 September and 7am Tuesday 4 October 2022.**

This work has been scheduled to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Standard construction hours

Standard construction hours on this project are **7am-6pm Monday to Friday and 8am-1pm on Saturdays.**

During the months ahead, we will be slightly extending our standard construction hours to complete essential concreting work:

- **On weekdays, we will be working until 7pm**
- **Between October and the end of 2022, we will extend standard hours on Saturdays to 6pm.**

We will contact you directly if out of hours work is anticipated to be noticeable at your address.

Temporary reservation of Park & Ride spaces

To enable plant parking, delivery and manoeuvring, we will be temporarily reserving approximately 33 spaces in the Park & Ride Commuter Car Park between, as indicated in the image below, on:

- **Wednesday 28 September and Wednesday 5 October 2022**

Reserved spaces indicated in blue.

Kiama Park & Ride, south of Kiama Station

Over the coming months, we will have construction vehicles and machinery accessing our site compound through the Park & Ride, including quarry and tool trucks.

Laydown areas

We will be storing machinery, spoil and ballast adjacent to the rail corridor, inside existing, cleared compounds. All stockpiles will be covered when not in use.

You might hear us working to build a better network

Our construction activities between August and October 2022 include use of vacuum trucks, excavators with rock breakers, concrete trucks, drilling rig and spoil trucks.

If noise is anticipated to be intrusive at your address, we will contact you directly to discuss additional mitigation measures specific to your situation.

Minimising community impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration, and dust management.

A 14 tonne and 8 tonne excavator working together to compact and stabilise the earth under existing track, following the installation of an underline drainage crossing.

Postponed or cancelled work

Due to a number of factors associated with work in the rail corridor, there is always a possibility that some of our planned work may be postponed or cancelled. We will keep you updated if any planned work is rescheduled.
