

The Connectivity Baseline

Alanna Linn
Director, Whole of Government Connectivity
Leadership
NSW Telco Authority

Connectivity is essential to enable smart places

Tools and data can help us know what we have and where to focus

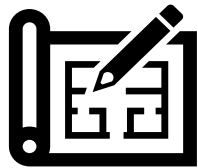

Data – needs to be granular, transparent, consistent and community-focused

Visualisation – the upcoming NSW Digital Connectivity Index will be let people see connectivity at a suburb level across the state

Policies and requirements can help us make sure the right connectivity is in place

Connectivity in new infrastructure

- Minimum connectivity requirements for new government infrastructure are being explored to see how we can ensure digital connectivity is considered from the outset.

Connectivity in new developments

- A new cross-jurisdictional initiative is underway to explore how to prioritise and accelerate mobile communications infrastructure, especially in rapidly growing suburban communities.

Collaboration across government can support good connectivity outcomes

- What do you need to know about connectivity to help make smart places happen?
- What could help ensure the connectivity baseline is there from the start?
