

More Trains, More Services

T8 Airport Line Power Supply Upgrade Project

What happened in November?

During November, we continued with site investigations in preparation for construction which will commence next month.

What's planned next?

Throughout December we will continue with the following activities inside the T8 Airport Line tunnel:

- cable installation from the Chalmers Street tunnel portal to Green Square Station
- utility installation from the Chalmers Street tunnel portal to the Mortuary tunnel.

Oversized deliveries and pick up of rail infrastructure will also continue outside of standard construction hours and require temporary lane closures, pilot vehicles and traffic control to enter the rail corridor. One traffic lane on Gibbons Street and Chalmers Street, residential parking and side streets will remain open during deliveries.

Are there activities planned out of hours?

Some out of hours work is planned to complete the required work. These works are taking place during a scheduled trackwork period when no trains will be running. This enables the construction team to safely carry out essential activities inside the rail corridor.

- **4am, Saturday 5 to 6am, Monday 7 December.**

These works are dependent on weather and site conditions and are subject to change.

Will alternate transport services be running this weekend?

For up to date information about replacement services during this scheduled trackwork period please visit transportnsw.info or call 131 500.

Where will work take place?

The above map shows work will take place inside the T8 Airport Line tunnel and site access will be via Gibbons Street and Chalmers Street access points.

How do we consider the community?

The project team understands construction activities may cause disruption for the community. Every effort will be made to minimise impacts where possible such as traffic control and signage for deliveries to site, non-tonal reversing alarms for construction plant and vehicles and noise monitoring. We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
