

T8 Airport Line Power Supply Upgrade Project

More Trains, More Services

February and March 2023

Transport for NSW pays respect to Elders past and present and recognises and celebrates the diversity of Aboriginal peoples and their ongoing cultures and connections to the lands and waters of NSW.

We are upgrading the power supply to support the introduction of the new fleet of trains operating along the T8 Airport Line. It will also future-proof the connection to the Sydney Trains network, allowing more trains and services to be available to customers. Upgrades to the power supply are along the T8 Airport Line tunnel from Central to Wolli Creek Junction.

What work are we doing?

During February and March 2023, the project team will carry out cable, overhead wiring and utility installations inside the T8 Airport Line Tunnel. In connection to the work, there will be several oversized rail infrastructure deliveries to the Gibbons Street site access point in Redfern between Marian and Regent streets.

The map overleaf outlines locations of the work and site access points.

When we'll be working

Standard construction hours are between **7am and 6pm Monday to Friday** and **8am and 1pm on Saturdays**.

Out-of-hours work and deliveries

As part of the upcoming work some deliveries of machinery and materials will take place at night between **7pm and 5am from Wednesday 15 February through to Friday 24 February**. Out-of-hours work will take place during scheduled Sydney Trains trackwork periods

when no trains will be running. Scheduling construction work outside of standard construction hours enables our project team to complete the activities safely.

All construction work is weather permitting and subject to change.

What will this mean for you?

During construction, you may notice increased workers and vehicles in and near the Gibbons Street access point.

In connection with the oversized deliveries, there will be traffic changes on Gibbons Street between Marian and Regent streets:

- the inside lane travelling northbound along Gibbons Street will be closed during the night work times outlined above
- traffic control will be in place to direct motorists to merge into the two northbound lanes that will remain open. Please refer to the map overleaf.

Managing impacts

We understand construction activities may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

Map of work area

Where we'll be working

The map above shows deliveries will take place via the Gibbons Street site access point, between Marian and Regent streets.

There's a lot happening

Currently there are multiple project teams, transport agencies and contractors working within the rail corridor. For more information on work being completed by Sydney Trains, please phone 1300 656 999 or visit www.transport.nsw.gov.au/sydtraincommunity
