

More Trains, More Services

T8 Power Supply Upgrade project

What happened in October?

During October, the project team began geotechnical surveys and potholing investigations on Wyndam Street between Mandible Street and Bourke Street.

What's planned next?

Throughout November, the project team will continue geotechnical, survey, potholing investigations on Wyndam Street between Mandible Street and Bourke Street to identify the appropriate location for power cables.

These investigation works will guide the project team to upgrade the power supply at Green Square to support an increase in the number of trains that can operate along the T8 Airport Line in the future.

How do we consider the community?

Standard construction hours on this project are **7am to 6pm** Monday to Friday, weekends and public holidays.

The project team understands construction activities may cause disruption for the community. Every effort will be made to minimise impacts where possible such as traffic control and signage for vehicles and cyclists travelling near site investigation locations.

We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

Are there activities planned out of hours?

Some out of hours work may be required to complete the site investigations. The community will be notified seven days in advance of night work being carried out. Night work would proceed depending on weather and site conditions, and is subject to change.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.

Where will work take place?

The above map shows the location of work is on Wyndam Street between Mandible Street and Bourke Street.
