

August 2020

More Trains, More Services

Wolli Creek Power Supply Upgrade Project

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network, creating turn up and go services for many customers. It means customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.

Project update

We will begin by making improvements on the T4 Illawarra Line and T8 Airport Line to transform the rail network and improve train services for customers in the future.

Early work and preliminary site investigations will start in August with site establishment and main construction work progressing in the coming months. Construction will take around two and a half years to complete.

Work we are doing to improve the network for customers and our staff

- building a new electrical substation within the rail corridor at Wolli Creek Junction to enable more trains to operate on the T4 Illawarra Line and T8 Airport Line
- removing the Undercliffe electrical substation and Wolli Creek sectioning hut
- realigning and installing new overhead wiring and signalling so that the trains can operate safely and efficiently.

What you will notice

We are continuing to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

Activities being undertaken in August include:

- site investigation work
- vegetation removal
- survey and geotechnical investigations
- temporary site establishment
- condition assessments.

Construction hours

To support the industry and continue the delivery of critical infrastructure, the NSW Government has introduced new rules allowing construction sites to operate on weekends and public holidays.

Standard construction hours are now 7am to 6pm every day, including public holidays.

These changes have been made to make sure we can keep our work sites safe through social distancing and support the health and wellbeing of our workers.

The project team understands extending construction hours to weekends and public holidays may cause disruption for the community but all efforts will be made to minimise impacts where possible and ensure strict environmental conditions relating to noise, vibration and dust management are adhered to.

Trackwork weekend – August

To minimise disruption to customers and ensure the safety of workers, night work is required on **Saturday 15 and Sunday 16 August, from 6am to 7pm.**

Please note this is dependent on weather and site conditions and is subject to change.

Indicative work calendar – August 2020

Key		day work (7am - 6pm)		trackwork weekend (6am - 7pm, both days)		
Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
					1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	29	30
31						

Other work in the area

The Transport Access Program will also be working at Wollie Creek Station on Saturday 15 and Sunday 16 August from **6am to 6pm**. This work includes:

- geotechnical investigations, including platform bore hole drilling
- services searches.

Platforms 3 and 4 will be closed during this weekend and there will be some changes to train services at the station. Please visit transportnsw.info or call 131 500 to find out more and plan your trip.
