

More Trains, More Services

Wolli Creek Power Supply Upgrade Project

What happened in December and January?

During December and January, we carried out vegetation clearing, asbestos removal, excavation and backfill, and service utility installation.

What's planned next?

During February, the project team will carry out the following work:

- asbestos removal
- installation of service utilities
- installation of signal posts
- installation of overhead wiring portal brackets
- installation of canopy steel structures into existing footings.

When will construction occur?

Construction will primarily take place from 7am to 6pm Monday to Friday, and 8am to 1pm on Saturdays.

Are there activities planned out of hours?

Some out of hours work is planned to safely complete the required work. These works are taking place during a scheduled trackwork period when no trains will be running. This enables the construction team to safely carry out essential activities inside the rail corridor.

- 2am, Saturday 20 February to 2am, Monday 22 February
- 2am, Saturday 27 February to 2am, Monday 1 March.

There will also be night works in the lead up to Saturday 20 February with construction crew on site to facilitate the installation of bracing columns for the station canopy which is not expected to be noisy. We will be contacting residents directly who may be impacted by work during the scheduled track work weekends. These works are dependent on weather and site conditions and are subject to change.

Where will work take place?

The above map shows the location of work inside the rail corridor south of Wollsi Creek station with site access via Lusty Street.

There are a number of other Transport for NSW and Sydney Trains projects working near Wollsi Creek Station on these scheduled trackwork weekends. Residents may notice increased work vehicle movements along local streets. This work will generate noticeable noise for some residents. We will contact residents directly impacted by these construction activities.

How do we consider the community?

The project team understands construction activities may cause disruption for the community. We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

Will alternate transport services be running during scheduled track work weekends?

For up to date information about replacement services during this scheduled trackwork period please visit transportnsw.info or call 131 500.
