

More Trains, More Services

Wolli Creek Power Supply Upgrade Project

What are we doing in Wolli Creek?

Transport for NSW is building a new substation within the rail corridor to create the necessary power supply to support the increase in the number of trains travelling along the T8 Airport Line in the future.

What's planned next?

Further to the recent notification regarding work on the Wolli Creek Power Supply Upgrade Project, a crane will be needed onsite in early January 2022 to enable further structural steel installations for the substation.

Additionally, the Project Team will be carrying out excavation work on Lusty Street to install concrete blocks in preparation for the water main installation. During this work, the parking spaces in front of 99 Bonar Street will be temporarily blocked with traffic control in place.

This work will be carried out during standard construction hours **between 7am and 6pm on Tuesday 11 January and Wednesday 12 January 2022**. As per the map overleaf, the project team will be working on the western side in front of 99 Bonar Street on **Tuesday 11 January** and the eastern side of 99 Bonar Street on **Wednesday 12 January 2022**.

Are there activities planned outside standard construction hours?

The crane will arrive at the 5A Lusty Street site compound at **6am** on either **Wednesday 5 January** or **Monday 10 January 2022** due to road and safety regulations. The crane will not be mobilised in the site compound until after 7am.

The water main installation on Lusty Street may occur outside of standard construction hours in late January 2022. We will notify nearby impacted residents once the water service provider confirms the installation date in early January.

What's planned over the holiday season?

The project team will not be carrying out work activities in 2021 from Saturday 18 December. Due to the crane arrival as noted above, the project team will return on either **Wednesday 5 January** or **Monday 10 January 2022**. During this holiday season, a site security presence will remain. The Wolli Creek Power Supply Upgrade Project Team wishes you a Happy Holidays.

Where will work take place?

The above map shows the location of work inside the 5A Lusty Street site compound and the work location on the road of Lusty Street.

How do we consider the community?

The project team understands construction activities may cause some disruption for the community and we will seek to minimise impacts as much as possible.

When carrying out our work, the project team utilises a noise assessment of the programmed activities to determine the noise to be generated and the appropriate mitigation measures to be put in place. We will also continue to ensure we adhere to strict environmental conditions relating to vibration and dust management.

Thank you for your understanding and patience while we complete this important work.

There's a lot of work happening

Currently there are multiple project teams, transport agencies and contractors working within the Wollie Creek rail corridor.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
