

More Trains, More Services

Wolli Creek Power Supply Upgrade Project

Transport for NSW | July 2022

What are we doing?

Transport for NSW is building a new substation within the rail corridor to create the necessary power supply to support the increase in the number of trains travelling along the T8 Airport Line in the future.

What's been happening?

In June we continued to build the new substation including cabling, electrical and structural installations.

What's planned next?

In July we will carry out the following activities:

- Investigation work on Lusty Street to assist with planning and design prior to electrical installations. As part of this work, **a section of the driveway at 99 Bonar Street will be temporarily blocked between 8am and 5pm on Saturday 2 July**. Traffic control will be in place to ensure driveway access is safely maintained. as shown overleaf.
- Continue building the new substation.
- Installation of new overhead wiring infrastructure, electrical cables and fencing inside the rail corridor.

When will work take place?

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays**.

Some work will take place outside of these hours:

- **Between 6am and 6pm on Saturday 2 July and Sunday 3 July**
- **Between 6am and 6pm on Saturday 9 July and Sunday 10 July**
- **Between 10pm Friday 15 July through to 2am Monday 18 July**

This work will take place during scheduled Sydney Trains trackwork periods when no trains will be running. Scheduling construction work outside of standard construction hours enables our project team to complete the activities safely.

There is a possibility that some of our planned work may be postponed or cancelled. To register for digital project updates, including changes to planned work, please email projects@transport.nsw.gov.au with 'Progress updates – MTMS Wolli Creek' as the subject line and include your name and address.

Newly installed substation power transformers at the substation site

Where will work take place?

The above map shows the locations of work and site access points.

The project team will continue to utilise the site compounds for deliveries, storage of materials and equipment, offices, pre-start work meetings and worker parking.

How do we consider the community?

The project team understands construction activities may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

There's a lot happening

Currently there are multiple project teams, transport agencies and contractors working within the Wolli Creek rail corridor. For more information on work being completed by Sydney Trains, please phone **1300 656 999** or visit www.transport.nsw.gov.au/sydtraincommunity
