

## More Trains, More Services

### Wolli Creek Power Supply Upgrade Project

Transport for NSW | November 2022

#### What are we doing?

Transport for NSW is building a new substation within the rail corridor to create the necessary power supply to support the increase in the number of trains travelling along the T8 Airport Line in the future.

#### What's been happening?

In September and October, we continued to build the new substation and progressed with the internal fit out. The project team have been installing fencing along the substation's boundary and testing internal electrical services. In addition to the fencing surrounding the substation, the team have been installing fencing along the rail corridor.

Due to external factors outside our control, a portion of the planned work was postponed. We will do some of this work in November, however some will need to occur during a Sydney Trains trackwork period. We will notify you of this work when it is confirmed.

#### What's planned next?

In November, our day to day activities will include:

- continuing to build and fit out the substation, including electrical services
- testing electrical services inside the substation
- installing electrical services inside the rail corridor

#### Out-of-hours work

From **8am to 6pm on Saturday 19 November and on Sunday 20 November**, the following activities will be undertaken:

- underground investigation works with the use of a vacuum truck will take place next to the driveway and entrance to the 99 Bonar Street carpark. This location is also referred to as 4 Lusty Street. Please note, one lane of the driveway for the 99 Bonar Street carpark will be closed. However, **access will be maintained at all times**. Traffic controllers will be in place to assist residents in accessing the driveway throughout the works.

- installation of in-ground services within the rail corridor on Sparks Lane between Discovery Point Place and Chisholm Street
- installation of signalling infrastructure within the corridor south of the Mount Olympus Boulevard access gate

Residents may notice increased noise throughout the out-of-hours works. Any residents who may be directly impacted will be contacted separately.

Over this time, you may see a number of plant and equipment inside our compounds on Lusty Street and within the rail corridor.

#### When will work take place?

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays**.

Some work will take place outside of these hours between:

- **6am and 6pm on Saturday 19 November**
- **6am and 6pm on Sunday 20 November**

This work will take place during a scheduled Sydney Trains trackwork period when no trains will be running. Scheduling construction work outside of standard construction hours enables our project team to complete the activities safely.

All construction work is weather permitting and subject to change.

#### Where will work take place?

The map overleaf shows the locations of work and site access points.

The project team will utilise the site compounds for deliveries, storage of materials and equipment, offices, and pre-start work meetings.

## There's a lot happening

Currently there are multiple contractors working within the Wollie Creek rail corridor. For more information on work being completed by Sydney Trains, please phone **1300 656 999** or visit [www.transport.nsw.gov.au/sydtraincommunity](http://www.transport.nsw.gov.au/sydtraincommunity)

## How do we consider the community?

The project team understands construction activities may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

## Changes to planned work

There is a possibility that some of our planned work may be postponed. To register for digital project updates, including changes to planned work, please email [projects@transport.nsw.gov.au](mailto:projects@transport.nsw.gov.au) with 'Progress updates – MTMS Wollie Creek' as the subject line and include your name and address.

## What's planned over the holiday season?

Our team will not be carrying out any works from **Friday 23 December 2022 to Sunday 8 January 2023**. However, there will be security on-site during this period and you may notice small crews carrying out routine checks.
