

# More Trains, More Services

## Wolli Creek Power Supply Upgrade project

### What happened in September?

During September we continued with preliminary site investigations in preparation for construction which will commence next year.

### What's planned next?

Throughout October, the project team will be continuing with geotechnical, survey, potholing investigations inside the rail corridor.

Some out of hours work may be required to complete the site investigations. The community will be notified seven days in advance of night work being carried out. Any night work is dependent on weather and site conditions, and is subject to change.

### How do we consider the community?

Standard construction hours on this project are **7am to 6pm** Monday to Friday, weekends and public holidays.

The project team understands construction activities may cause disruption for the community. Every effort will be made to minimise impacts where possible such as traffic control and signage for vehicles and cyclists travelling near site investigation locations. We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

### Where will work take place?

The above map shows the location of work is inside the rail corridor south of Wolli Creek station, site access is via Lusty Street and Henderson Street.

### How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed

### About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simple, more reliable network.
