

# Temporary closure: Meadowbank Bridge investigation work on 11 May

May 2024

Transport for NSW acknowledges the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Transport for NSW will repair and upgrade Meadowbank bridge to maintain this key pedestrian and cyclist corridor across the Parramatta River.

Transport is planning the structural repair of the heritage-listed Meadowbank Bridge.

## What work are we doing?

On **Saturday 11 May**, we will investigate the electrical cables to assist in planning the bridge's maintenance.

During this work, we will use hydraulic jacks to temporarily lift, measure, and inspect around 20 metres of the Ausgrid electrical conduits on the bridge.

In the event of wet weather, the work will be rescheduled.

## When and where we'll be working

We will be on site on **Friday 10 and Saturday 11 May** to prepare for, carry out the work, and then pack up.

Our work hours are between **7am and 6pm**.

## What will this mean for you?

During the work period:

- the bridge will be temporarily closed and pedestrians and cyclists can detour via Ryde Bridge
- 20 car park spaces under the bridge at Meadowbank car park will be occupied for equipment and material storage

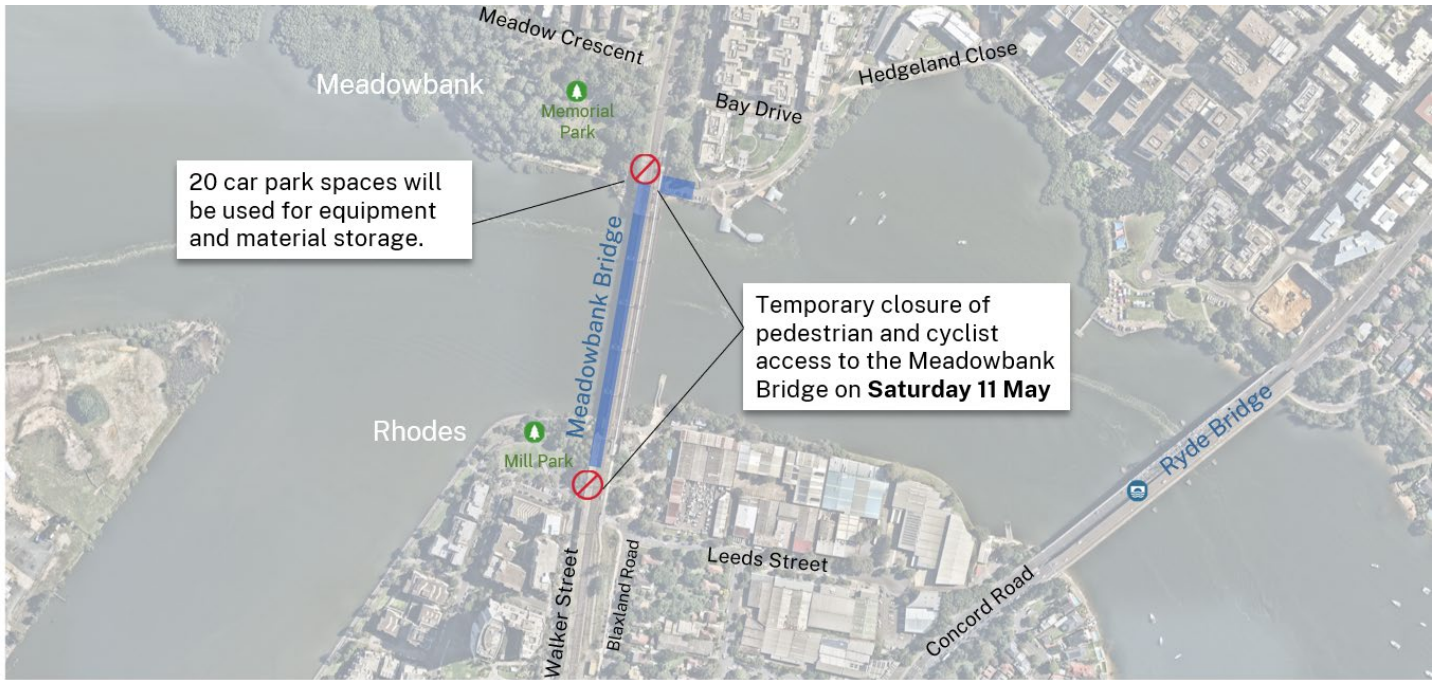

You may notice an increase in workers and vehicles in the area, as well as noise from machinery and equipment.

## Managing our impacts

Our work can be noisy at times. We will do everything we can to lessen the disturbance to the local community and motorists in the area.

## Location of work area

KEY  Work zone  Temporary closed access to the bridge

## Did you know?

The Meadowbank Bridge, also locally known as the 'John Whitton Bridge,' was designed by John Whitton, Chief Engineer of the NSW Government Railways. It was constructed in 1886 as a lattice truss bridge. Initially serving a single rail line, it was adapted in 1891 to accommodate double tracks. In 1980, the rail line was relocated to the new John Whitton Bridge. In anticipation of the 2000 Summer Olympics, the Meadowbank Bridge was transformed into a pedestrian walkway and cycle path.
