

Route Data Capture

Guide for capturing route data

01

Driver to complete routes

Drive the entire route timetable as per the bus contract, stopping at all stops even if there are no passengers.

02

Open doors at every stop

At **every stop**, **open** and **close** the bus doors, even if there are no passengers.

03

Perform data capture activities for the period of time requested

Do this activity for the period of time requested **after hardware installation**.

Important

- Route Data is an integral part of TCB - collecting accurate bus stop locations for all routes is crucial in delivering quality data to customers.

- Opening and closing of bus doors enables the TCB Team to remotely confirm locations of bus stops.

- TCB will confirm when your data has been processed and to start logging into the driver console.
