

Dubbo Station Upgrade now complete

Transport Access Program

April 2024

Transport for NSW acknowledges the Wiradjuri people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Work to improve accessibility at Dubbo Station is now complete!

This upgrade was part of the Transport Access Program, an initiative of the NSW Government to provide a better experience for public transport customers by delivering modern, safe, and accessible infrastructure.

What we delivered

- ✓ upgrades to the five bus and coach bays
- ✓ improvements to the café and ticket counter, which have been lowered to make them accessible for customers in wheelchairs
- ✓ modifications to the waiting room, where we have improved lighting and provided wheelchair spaces alongside the seating:
- ✓ regrading and line marking of the 32-space car park and a new kiss and ride zone
- ✓ upgrades to the platform, including regrading, installation of new drainage, and the addition of new tactile indicators to improve safety and accessibility for people with vision impairment
- ✓ the replacement of external lighting and installation of new heritage light poles
- ✓ upgrades to existing paths around the station precinct with new surfaces and tactile indicators
- ✓ improved amenities

Upgrading an historic icon

Dubbo Station is a heritage-listed railway station, with the original stone and corrugated iron structures, built between 1879 and 1881, still

intact. Since the 1800s, several additions have been made to the station precinct including a lamp room, wool stage and grain shed.

Our crews worked alongside Environment and Heritage NSW from the outset of the upgrade, to ensure that precinct's original structures were protected, and the heritage status of the station maintained.

Dubbo residents and visitors can now enjoy not only a beautiful, historic train station, but a safer and more accessible one.

Why are accessibility upgrades important?

Improvements to public transport are a vital part of people's quality of life in regional, rural, and remote NSW.

This upgrade has improved the overall commuter journey through the Dubbo Station precinct to make it more comfortable, as well as safer and more accessible to people with disability or limited mobility, older people, people with prams or luggage, carers, and others who may be experiencing mobility or access restrictions.

Thank you

Thank you to customers, local residents, businesses and our delivery contractors for your cooperation and patience.

We hope everyone, especially customers with a disability, limited mobility, carers/parents with prams and those travelling with luggage, will have an improved experience when catching the train at Dubbo Station.
