

Sydney Trains

Westmead Bridge Road Upgrade

Artist's impression of upgrade at Bridge Road, Westmead

What we're doing

Sydney Trains is upgrading the road-over-rail bridge at Bridge Road, Westmead, to improve traffic flow in the Westmead precinct.

The project includes:

- an upgraded bridge with three traffic lanes, one northbound and two southbound lanes to ease morning peak hour traffic
- a new shared path on the eastern side and an upgraded footpath on the western side of the bridge.

The project will take about three and a half years to complete.

When work will start

Enabling work and site investigations started in July 2022 within the rail corridor. Main construction work will start in January 2024.

Work will involve constructing a new bridge next to the existing bridge, traffic will be transferred over to the new bridge. We will then demolish and replace the existing bridge and combine the two bridges to form one wider bridge.

We will notify nearby residents and provide more details of specific work impacts before main construction work starts.

How this affects you

Noise

These works may create additional noise during the day and at night. Standard construction hours are from **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays.**

Additional work may need to be carried out at night and on weekends to minimise disruptions to road users. Sydney Trains will also carry out rail possession work as per usual which may have different noise impacts.

We will notify nearby residents in advance of any work which may impact you.

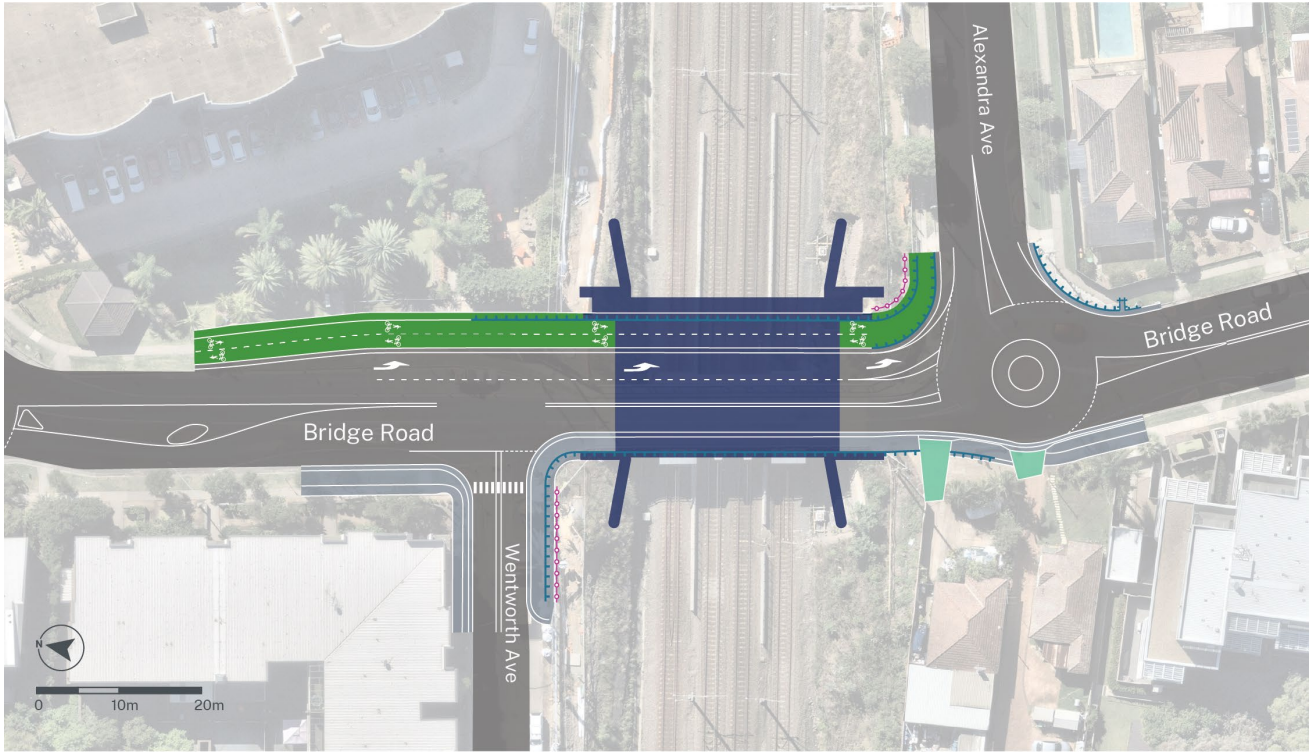

Traffic and parking

There will be temporary changes to vehicle and pedestrian access to the bridge and the roundabout at Alexandra Avenue during the work.

Construction of the bridge will take place in stages to reduce congestion to road users and residents.

We will notify road users and nearby residents in advance of any access changes and alternative routes.
