## Westmead Bridge Road Upgrade Concrete Works

From Thursday 8 February to Friday 9 February

### What we're doing

Sydney Trains is upgrading the road-over-rail bridge at Bridge Road, Westmead, to improve traffic flow in the Westmead precinct.

The project includes:

- an upgraded bridge with three traffic lanes, one northbound and two southbound lanes to ease morning peak hour traffic
- a new shared path on the eastern side and an upgraded footpath on the western side of the bridge.

**Sydney Trains will be undertaking an essential concrete pour overnight from Thursday 8 February to Friday 9 February. These works will be carried out within the rail corridor, but the concrete trucks will be parked on the road. These works must be undertaken at night due to temperature restrictions during the concrete placement. We aim to complete the work by midnight if possible, however this is temperature and weather dependent.**

We understand this work may have an impact on you and we appreciate your patience and understanding.

### How this affects you

#### Noise

- These works may create additional noise at night between **6pm Thursday 8 February and 5am Friday 9 February.**
- We will select low-noise compressors and equipment where low-noise alternatives are available.

#### Traffic and Parking

- The existing daytime contraflow will be in place on Alexandra Avenue, between Bridge Road and Hawkesbury Road throughout the night. Traffic flow will be maintained in both directions.
- Traffic control will be on duty to assist motorists and pedestrians during the affected periods.
- There will be reduced parking on Alexandra Avenue near Bridge Road on the railway corridor side of the road.

**We apologise for any inconvenience and thank you for your cooperation during these essential works.**
