

How goods are moved via air freight

Approximately 90% of air freight is carried in the cargo holds of passenger flights.

Whilst the volume is lower compared to other modes, it makes a significant contribution to the NSW economy due to the high value of the items contained.

Imports

Did you know?

Demand for air freight is growing, influenced by factors such as online shopping.

Exports

Did you know?

In 2015/2016 over 460,000 tonnes of international freight passed through Sydney Airport.
