Transport for NSW, together with its key agencies NSW Trains, Sydney Trains, Roads and Maritime Services and State Transit Authority are committed to delivering transport services, projects, operations and programs in a manner that balances economic, environmental and social issues to ensure a sustainable transport system for NSW. We work towards achieving this by:

- Minimising impacts on the environment, whether through transport operations, infrastructure delivery, maintenance or corporate activities
- Procuring, delivering and promoting sustainable transport options that promote value for money
- Complying with relevant legislation
- Developing, expanding and managing the transport network in a sustainable and climate change resilient way

We will continuously improve our performance in line with this Environment and Sustainability Policy by:

- Implementing sound governance practices to set, apply and monitor the policy across the portfolio
- Setting objectives and targets to improve management and performance in line with best practice
- Reporting on our performance
- Raising the awareness and capacity of our staff to build the policy into their day-to-day business
- Forming constructive partnerships with government, industry and the community on environment and sustainability issues
- Contributing to and influencing the strategic environment and sustainability agenda of the NSW Government.

The Environment and Sustainability Policy flows from our obligations under the Transport Administration Act 1988 for “the delivery of transport services in an environmentally sustainable manner” and is reflected in our Corporate Plan “Connections - Towards 2017”.

I commend the policy to all within the Transport cluster agencies.

Tim Reardon
Secretary
August 2015
