

# Arncliffe Station Upgrade and Arncliffe Pedestrian Link

AUGUST 2016

Four new lifts are now open at Arncliffe Station along with a new pedestrian link to improve connectivity between Arncliffe Street and Wollongong Road.

## Arncliffe Station Upgrade

Arncliffe Station is now accessible for all customers with four new lifts connecting the concourse, platform and street levels. The lifts will make commuting easier for our customers, especially those with a disability, the elderly, parents with prams and travellers with luggage.

Key features of the upgrade includes:

- four new lifts
- new canopies on the footbridge and platforms
- upgraded CCTV surveillance cameras and announcement systems
- new sheltered bus stops, taxi rank and kiss and ride area along Firth Street
- new family accessible toilets at the platform level
- two new accessible parking spaces within the existing car park off Burrows Street
- upgraded stairs and wayfinding signage
- new bicycle racks (to be installed in the coming weeks).

The project has been delivered as part of the NSW Government's Transport Access Program, an initiative to deliver accessible, modern and integrated transport infrastructure.

*New lifts now available at Arncliffe Station*

## What's next

Over the coming weeks, some finishing and landscaping work will be completed around the station and the pedestrian link.

We thank the community for their support and patience throughout the delivery of these important projects.

## Arncliffe Pedestrian Link

A new pedestrian link also opened to public between Arncliffe Street and Wollongong Street, north of the Allen Street railway bridge.

The pedestrian link will help to improve safety and connectivity to public transport, shops and schools, particularly the Al Zahra College.

Maximum use of natural lighting has been incorporated into the design and safety features such as CCTV surveillance and LED quality lighting has been installed.

*As part of the National Tree Day, the Headmaster and students of Al Zahra College helped to plant trees and shrubs along the forecourt of the new pedestrian link.*

*Murals incorporating drawings by students of Al Zahra College*

## Getting creative with the local community

As a key community initiative of the project, the pedestrian link's interior has been decorated with murals inspired by students from Al Zahra College. The students provided their artistic interpretations of the school's vision and purpose.

It has been a great opportunity for the project team to work with the local community and leave a legacy that will be enjoyed by those using the pedestrian link for many years to come.

Special thanks to Al Zahra College for their contribution and ongoing support.
