

Albion Park Rail bypass – out of hours work in June

We will be working outside our standard construction hours from **Sunday 31 May** until **Tuesday 30 June**. Please see the map and table included for details about upcoming out of hours work.

Work outside standard construction hours

There are several reasons why work is required outside standard construction hours including:

- **Safety** – work outside standard construction hours helps us improve safety by reducing interactions between motorists, pedestrians and workers
- **Traffic** – to safely carry out activities traffic may be stopped, detoured or reduced to one lane. By working at night, delays are minimised and journey times for motorists and businesses are less affected
- **Utilities** – work may be required at night to minimise impacts on utility services and networks
- **Weather** – even when it's not raining, temperature and wind can impact activities including pouring concrete and laying asphalt
- **Quality** – the quality of concrete and asphalt can be impacted if activities are not continuous
- **Environment** – after rain, sediment basins that are used to catch water from the construction site require maintenance and draining.

How will the work impact me?

At times we will use machinery and equipment that generate light, noise and vibration. We will make every effort to minimise disruption by:

- turning off machinery and vehicles when not in use
- using noise shields
- directing temporary lighting down and away from homes
- planning activities close to residents within standard construction hours and scheduling noisy activities earlier in the night, where possible
- fitting equipment with devices to minimise noise including reversing squawkers rather than beepers
- monitoring noise so we can manage any potential impacts and adjust our work, where possible.

Traffic changes

Traffic control will be in place for the safety of workers and road users and detours may be required. See the table included for more information. Please keep to the sign posted speed limits and follow the direction of traffic controllers. Electronic signs will advertise dates in advance.
