

Night work for the delivery and installation of Super-T girders off Tongarra Road

As part of the Albion Park Rail bypass project, 'Super T' girders (concrete beams) will be used to build a new bridge that will span over Frazers Creek and the new Croom Regional Sporting Complex access road.

What are we doing?

The bridge girders will be delivered by large trucks using the Princes Highway, Albion Park Rail and Tongarra Road, Albion Park. To minimise the impact to motorists, the girders will be delivered outside peak travel times between 2am and 6am.

Preparation, delivery and installation work will be carried out during the following shifts outside of standard working hours:

Night work

- About **eight night shifts** between **Thursday 21 November and Monday 9 December** from **7pm to 7am**, weather permitting.

Weekend work

- Between **8am and 5pm Sunday 24 November**, weather permitting.

What can I expect during this work?

This work will involve the set up and removal of a crane, truck movements, lifting girders into position and minor scaffolding work.

Escort vehicles with flashing lights and lighting towers (facing away from properties) will also be in place during the delivery times.

There will be some noise associated with this work and we will make every effort to minimise these impacts where possible.

Traffic changes

For the safety of road users and our workers, traffic control will be in place on the Princes Highway, Albion Park Rail and Tongarra Road, Albion Park to ensure the work zones are safe.

Please keep to the sign posted speed limits and follow the direction of traffic controllers at all times.

For the latest traffic updates call 132 701, visit livetraffic.com, or download the Live Traffic App.

Location of work – Tongarra Road, Albion Park
