

Birchgrove Wharf upgrade

THE UPGRADED WHARF

February 2017

The upgraded wharf is designed to provide customers with an improved public transport experience.

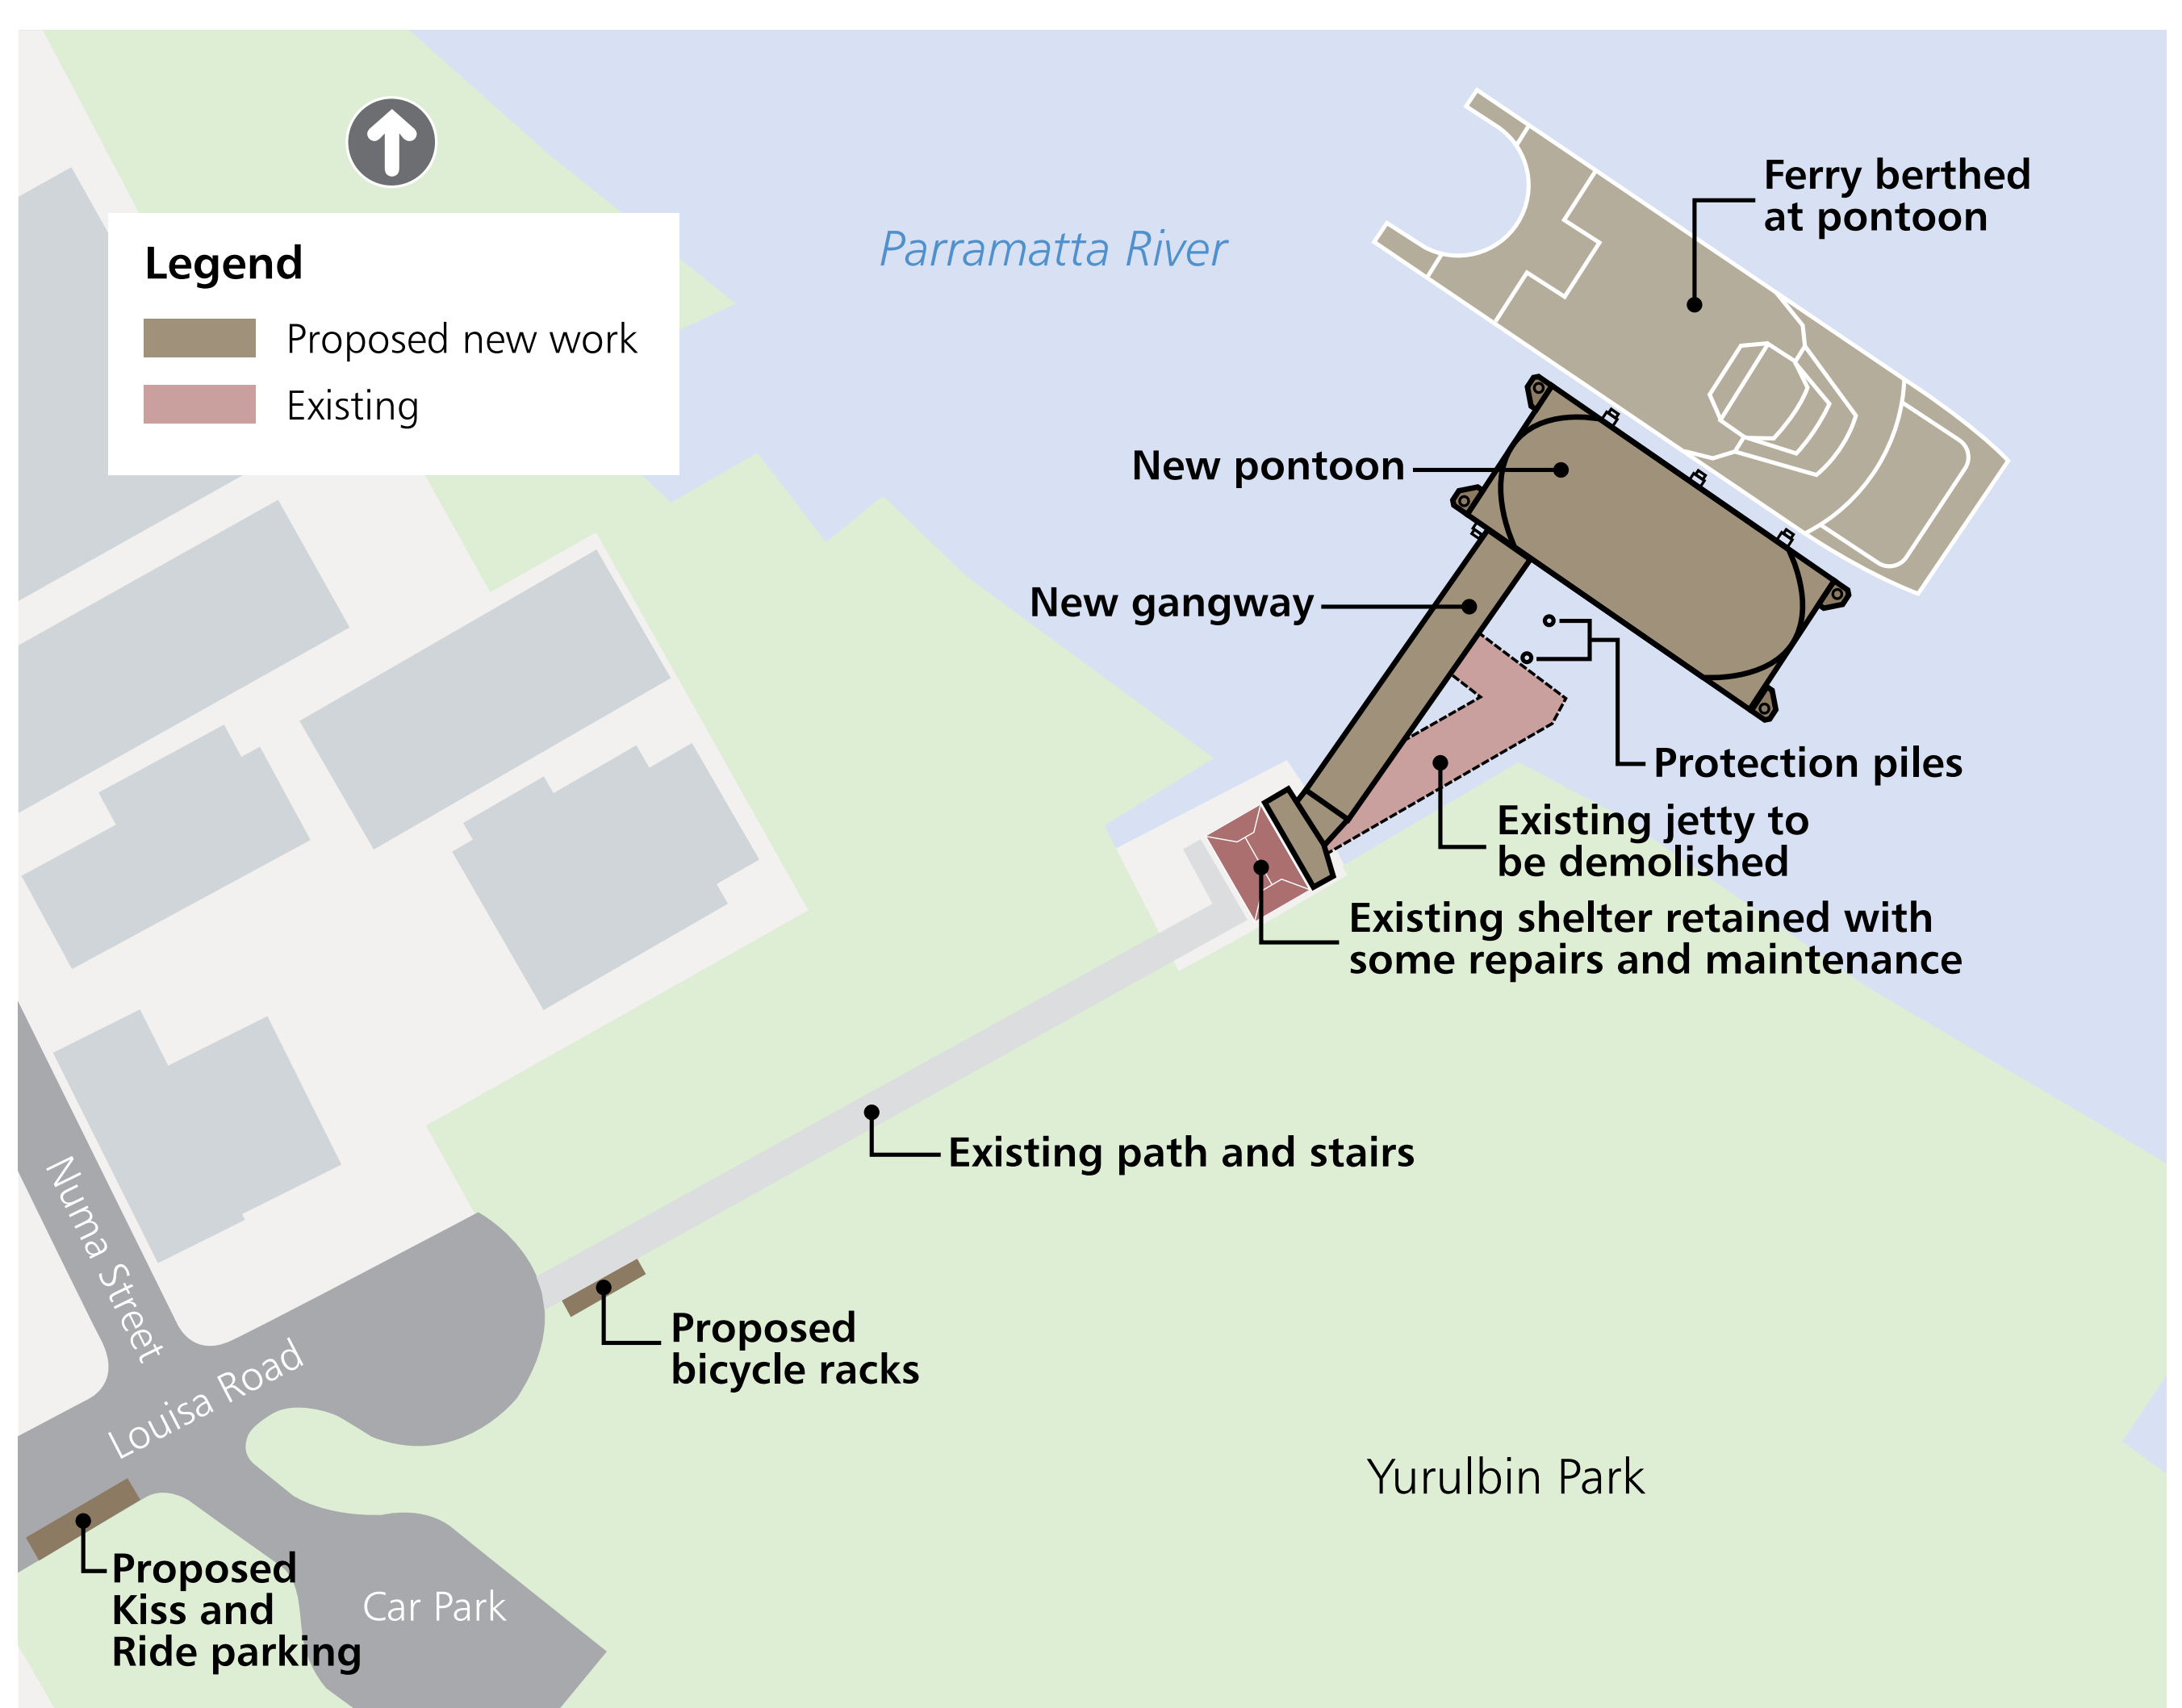

Artist's impression of the proposed new Birchgrove Wharf viewed from the river

The upgraded wharf would incorporate a floating pontoon, aluminium gangway and concrete bridge connecting to the existing timber waiting shed.

The pontoon would have a curved roof which would shelter customers from the weather. Glass weather protection panels and new seating would provide improved comfort and amenity. The existing timber waiting area would be retained with some repairs and maintenance carried out.

Minor landside work to install bicycle racks, wayfinding signage and a Kiss and Ride area is proposed.

The new wharf would look similar to wharfs at Drummoyne and Meadowbank which have also been upgraded as part of the NSW Government's Transport Access Program.
