

October 2017

F6 Extension Stage 1 – air quality monitoring - end of Kings Road, Brighton-Le-Sands

The NSW Government is progressing with the development of the F6 Extension Stage 1 between the New M5 Arncliffe and President Avenue Kogarah

As part of these studies, Roads and Maritime Services will carry out air quality monitoring to gather information about local air quality conditions within the project area. Our air quality advisers have selected a site at the end of Kings Road, Brighton-Le-Sands. We have included a map to show the location of the monitoring station.

Work to install the monitoring station is expected to start in October and will be completed within 4 – 6 weeks, weather permitting.

Once installed, the station will operate at this location 24 hours per day, seven days per week for up to 12 months, to record and establish baseline air quality data.

What will the monitoring station look and sound like?

The monitoring station will be placed on a concrete pad about 6m x 7m and will have security fencing around it. The monitoring station itself will be about 4m x 2.5m, and it will be 2.5m high with a 10m high metal mast. We have included an image of an existing air quality monitoring station.

The monitoring station will meet strict operational guidelines and will need to use air conditioners located within the monitoring unit. Noise is expected to be less than the noise level of a typical business office and less than average local traffic.

Expert personnel will visit the station about twice a month between **7am** and **6pm Monday to Friday** for testing and calibration of the equipment. The location of the air quality monitoring equipment does not indicate a possible alignment for the project. It is to record data on present day air quality.

How will the air quality information be used?

Information on air quality across the preferred route for the project would be included as part of any future environmental impact statement prepared for the project.

Contact

If you have any questions, please contact our project team on 1800 789 297 during office hours (8.30am to 5pm Monday to Friday) or F6Extension@rms.nsw.gov.au

Thank you for your patience during this important work.
