

M6 Stage 1

Night work for utility investigations at Kogarah from Monday 20 September 2021

Recently the M6 Stage 1 team notified you about utility investigations taking place in your area. To view the original notification please go to the M6 Stage 1 interactive portal. The notifications can be found at <https://caportal.com.au/rms/m6/map#>

We are starting night work for these utility investigations near your residence at President Avenue, Lachal Avenue, West Botany Street and O'Neill Street, Kogarah from **Monday 20 September to Wednesday 29 September between 9pm and 5am**, weather permitting. Our contingency dates will be Thursday 30 September to Tuesday 5 October, should there be weather or site delays. A map of our work area is shown over the page.

What does our work involve?

Our work involves using ground-penetrating radars (GPR) and digging under the road surface (slot trenching) to locate existing utilities under the ground.

Our work will include:

- scanning the roads and footpaths using a GPR
- collecting information to help locate utility services and connections
- setting up the investigation area in a safe work area
- removing a small section of ground material using a concrete saw
- using a vacuum truck to suck the dirt out of the ground
- identifying the utilities
- using underground pipeline CCTV investigations
- reinstating the area.

We are required to conduct this this work at night to avoid interruptions to traffic along this important roadway.

How will our work affect you?

Our noisy work will take place up to three nights a week on Monday 20 September, Tuesday 21 September and Thursday 23 September, then Tuesday 28 and Wednesday 29 September.

On Wednesday 22 September, Friday 24 September, and Monday 27 September our work is not expected to create noise.

We will aim to complete the noisiest work before midnight. We will endeavour to minimise the impact on nearby residents by turning off our machinery when not in use and using noise insulation blankets on our temporary fencing. We will also ensure compliance with strict environmental conditions relating to noise, vibration and dust management. Our project team will complete the work as quickly as possible to reduce any inconvenience to residents.

The safety and wellbeing of the wider community and our workers is our highest priority. We are working closely with our contractors to make sure COVID safe plans are in place including following appropriate hygiene and social distancing measures.

We thank you for your patience while we undertake this important work.

If at short notice NSW Government Health Orders change the timing of our work, we will provide updates on the M6 Stage 1 interactive portal.
