

Foxground and Berry bypass

AUSTRAL PARK ROAD INTERCHANGE

JULY 2014

Austral Park Road Interchange

The Austral Park Road Interchange will connect Austral Park Road to local roads and the new bypass. Entry and exit ramps will provide access to and from the south.

Changes from Approved Concept Design:

To improve safety for motorists a number of changes have been made:

- A new 33 metre long underpass will replace the previously planned overbridge.
- The bypass height has been raised by four metres to achieve clearance over the Austral Park Road extension.
- The new bypass, entry and exit ramps have been moved east by 16 metres.
- The northbound exit ramp has been moved south by 280 metres.
- Traffic will now pass under the main alignment and use the existing highway to the north to connect to Broughton Village, Foxground and Toolijooa Road.
- Private property accesses have been adjusted to improve safety and reduce travel for residents.
