# M1 Pacific Motorway Upgrades

## Building a better motorway – August 2018

To improve your journey on one of Australia's busiest roads, the Australian and NSW governments have provided \$391.6 million for the M1 Upgrades.

Major work has now started on three major upgrades, so you will soon benefit from improved traffic flow and safer, smoother and more reliable trips on the M1.

The completed projects will also make it easier for heavy vehicles to travel between Sydney, the Hunter and the North Coast.

### Improving traffic flow

for more than 70,000 motorists

# M1 Upgrades – construction update

## Weakleys Drive and John Renshaw Drive intersection

**Expected completion date: 2019**

Work has started, with barriers now in place for the safety of workers and motorists. The speed limit will remain at 60km/h until the project is completed.

The upgraded intersection, with additional lanes and traffic lights, will improve travel time reliability and safety.

## Tuggerah to Doyalson

**Expected completion date: 2020**

Work is progressing well on the motorway widening, upgraded Doyalson interchange, widening of the existing Sparks Road bridge and new commuter carpark.

A reduced speed limit of 80km/h remains in place until the project is completed, due to narrowed lanes through the construction zone.

The completed project will improve traffic flow and safety.

## Kariong to Somersby

**Expected completion date: 2020**

Barriers have been placed on the motorway and work has started. A speed limit of 80km/h is in place and will remain until the project is completed.

The project, which includes widening the motorway and upgrading three of the four Kariong Interchange ramps, will improve traffic flow and safety.
