Dear Deanne,

RE: ER Approval of Minor Amendment M12 Motorway – Early Works Flora and Fauna Management Sub-Plan (Gas Protection) Revision G

Thank you for providing the following document for Environmental Representative (ER) approval of minor amendments as required by the Condition of Approval A34 (i) of the M12 Motorway approval (SSI 9364):

- M12 Motorway – Early Works Flora and Fauna Management Sub-Plan (Gas Protection) Revision G

I have reviewed the minor amendments made to the document by Transport for NSW. Changes include updates to increase the Early Works footprint around Elizabeth Dr. Additional clearing of approx. 600m² of additional Cumberland Plain Woodland in the Sydney Basin Bioregion needs to be trimmed/removed as part of this amendment. The clearing is within the assessed and approved M12 Project construction boundary.

Further consultation was undertaken with the Environment and Heritage Group (formerly Environment, Energy and Science) within the Department of Planning and Environment (DPE), who advised there is no need to refer the amended Sub-Plan for their review.

As an approved ER for the M12 Motorway project, I am satisfied the minor amendments to increase the Early Works footprint, do not increase impacts and are consistent with the terms of the approval and project documents. Therefore, I approve the minor amendments to the subject Sub-Plan of the Early Works Environmental Management Plan.

Yours sincerely

George Kollias
Environmental Representative – M12 Motorway
