

Transport for NSW

M4 Roper Road westbound on ramp

Community update | August 2021

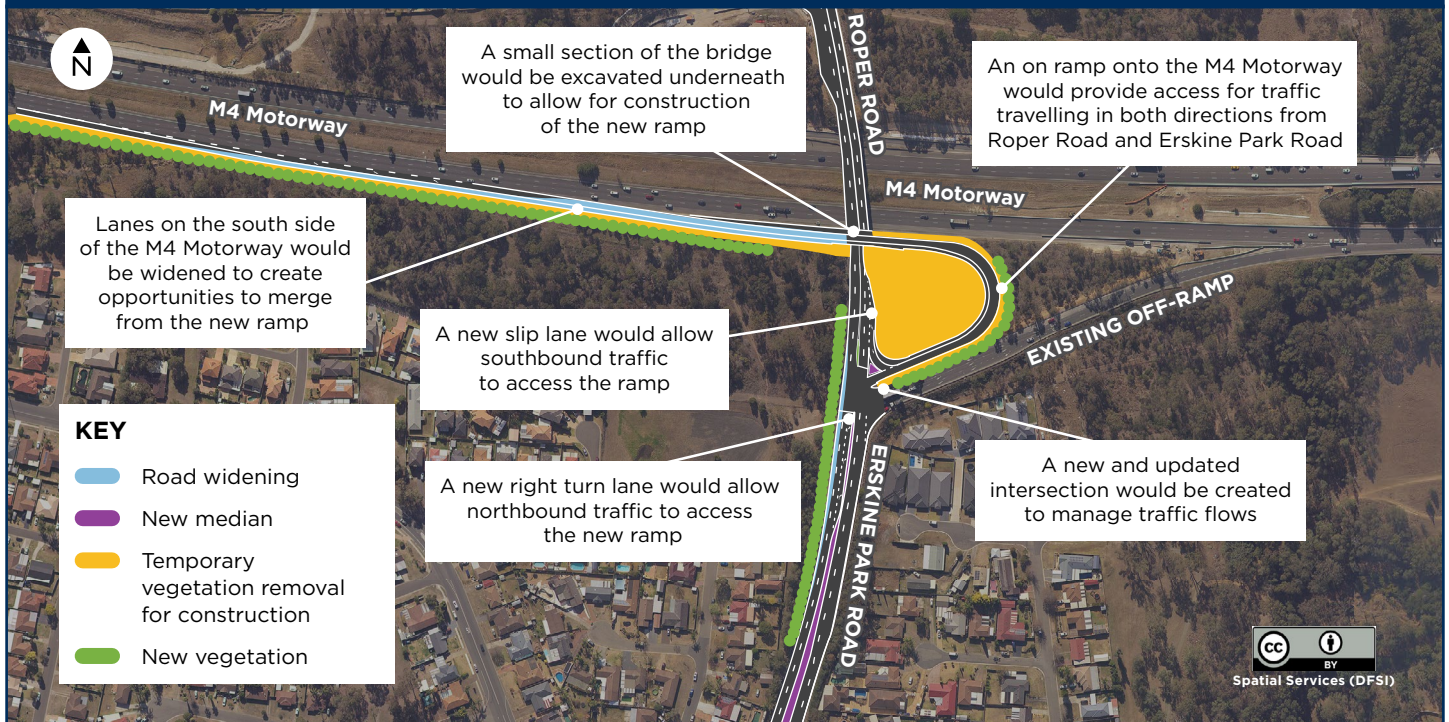

Erskine Park Road intersection at the M4 westbound off ramp

The NSW Government is funding this project to ease congestion on the M4 Motorway on ramps and local roads within Erskine Park and St Clair.

Transport for NSW is planning a west-facing on ramp for the M4 Motorway as part of key infrastructure projects and transport links being delivered in Western Sydney. This proposed new ramp will reduce congestion for traffic accessing the M4 Motorway westbound and on local roads.

Proposed Roper Road and Erskine Park Road westbound on ramp

Community benefits

This project has been developed to deliver the following improvements:

- Reduced travel times between St Clair, Erskine Park and Penrith
- Improved travel reliability for local road users
- Improved connectivity to the M4 Motorway for local road users
- Easing congestion now and preparing for increased traffic demand in the future
- Providing an additional route option to Penrith and the Blue Mountains for the local communities at St Clair and Erskine Park.

Key features

This project will include:

- A new west facing ramp from Erskine Park Road onto the M4 Motorway
- Access to the M4 for traffic travelling in both directions on Roper Road and Erskine park Road.
- A reconfigured intersection to accommodate the new ramp
- Ramp meters to provide seamless interaction with the M4 Smart Motorway technology
- Designed to avoid impacting sensitive native habitat surrounding the project.

Project stages

Project announcement and award

The Review of Environmental Factors (REF) has been determined and is now available on the project website. Transport would like to thank all stakeholders and members of the community who contributed feedback during the consultation period.

Transport has now appointed Georgiou Group to deliver the early works program with on-site preparation to begin in late August, weather permitting. We look forward to delivering this important project for the community and will provide more detail on construction in the coming months.

The early work program

Work will commence onsite with Georgiou Group establishing site facilities, safety measures, traffic and environmental controls.

Other important work at this stage includes:

- Earthworks and stripping top soil
- Drainage construction
- Some lane closures and night work, however we will engage with the community when these details are available
- Tree clearing.

Transport will be replanting vegetation where possible, including in the section within the loop of the ramp.

Stay informed

We will keep you updated with up to date information on the project website.

If you would like to be updated via email, please contact us to be added to the mailing list.
