

Manly Cove is an iconic and locally significant place. People and vessels have been part of Manly accessing the Cove by sea for centuries and continue to do so.

Transport for NSW is planning two projects, as part of the \$205 million NSW Government stimulus funding for maritime infrastructure and safety upgrades, to improve the accessibility to and along the Cove for all people including those with

assisted and unassisted mobility needs. The projects involve an upgrade of Manly Wharf 3 and plans to enhance the area of the former Manly Sea Life site.

Transport will be working on these projects concurrently, so Manly Cove continues to support the local community and those who wish to visit to work, rest or play.

## Manly Wharf 3 Upgrade

Transport for NSW is exploring options to improve the accessibility of Manly Wharf 3, as part of the NSW Government's Transport Access Program so all customers, including customers with assisted and unassisted mobility needs, can safely use the wharf.

The existing structure at Manly Wharf 3 is a simple wooden jetty with tidal steps.

Customers with mobility needs are currently unable to access ferry or other commercial services from Wharf 3.

The upgraded wharf will be designed to:

- provide accessibility for all customers using the wharf
- improve customer amenities and waiting areas
- improves services for customers and operators using commercial vessels
- be functional with a respectful design theme that considers the heritage and history of Manly Cove.

## Former Manly Sea Life

Transport for NSW is the owner of the former aquarium Manly Sea Life. We want to work with key stakeholders and the community to enhance the area and are at the initial planning stage of the project.

## Next Steps

In October you will see us carrying out some environmental investigations to assist with our planning for the projects. We will provide you with notice before these investigations start.

We will also be seeking important community feedback later this year, as part of the design process for the projects. We expect to start engaging with the community in late October for Manly Wharf 3 and in early December regarding the former Manly Sea Life site.

## How can I get involved?

We invite you to be involved. Please visit our website, and email us to subscribe for updates about the project.

Please be assured we will continue to respond to any questions or concerns you may have about our project.
