

McMahons Point Wharf upgrade

FEBRUARY 2015

The new wharf

Artist's impression of the new McMahon's Point Wharf viewed from Henry Lawson Avenue.

The existing wharf will be replaced by a completely new structure in a new location. The new wharf is designed to provide customers with improved access and amenity.

The wharf will comprise of a steel floating pontoon, a concrete entry platform and an aluminium gangway connecting the entry platform to the pontoon.

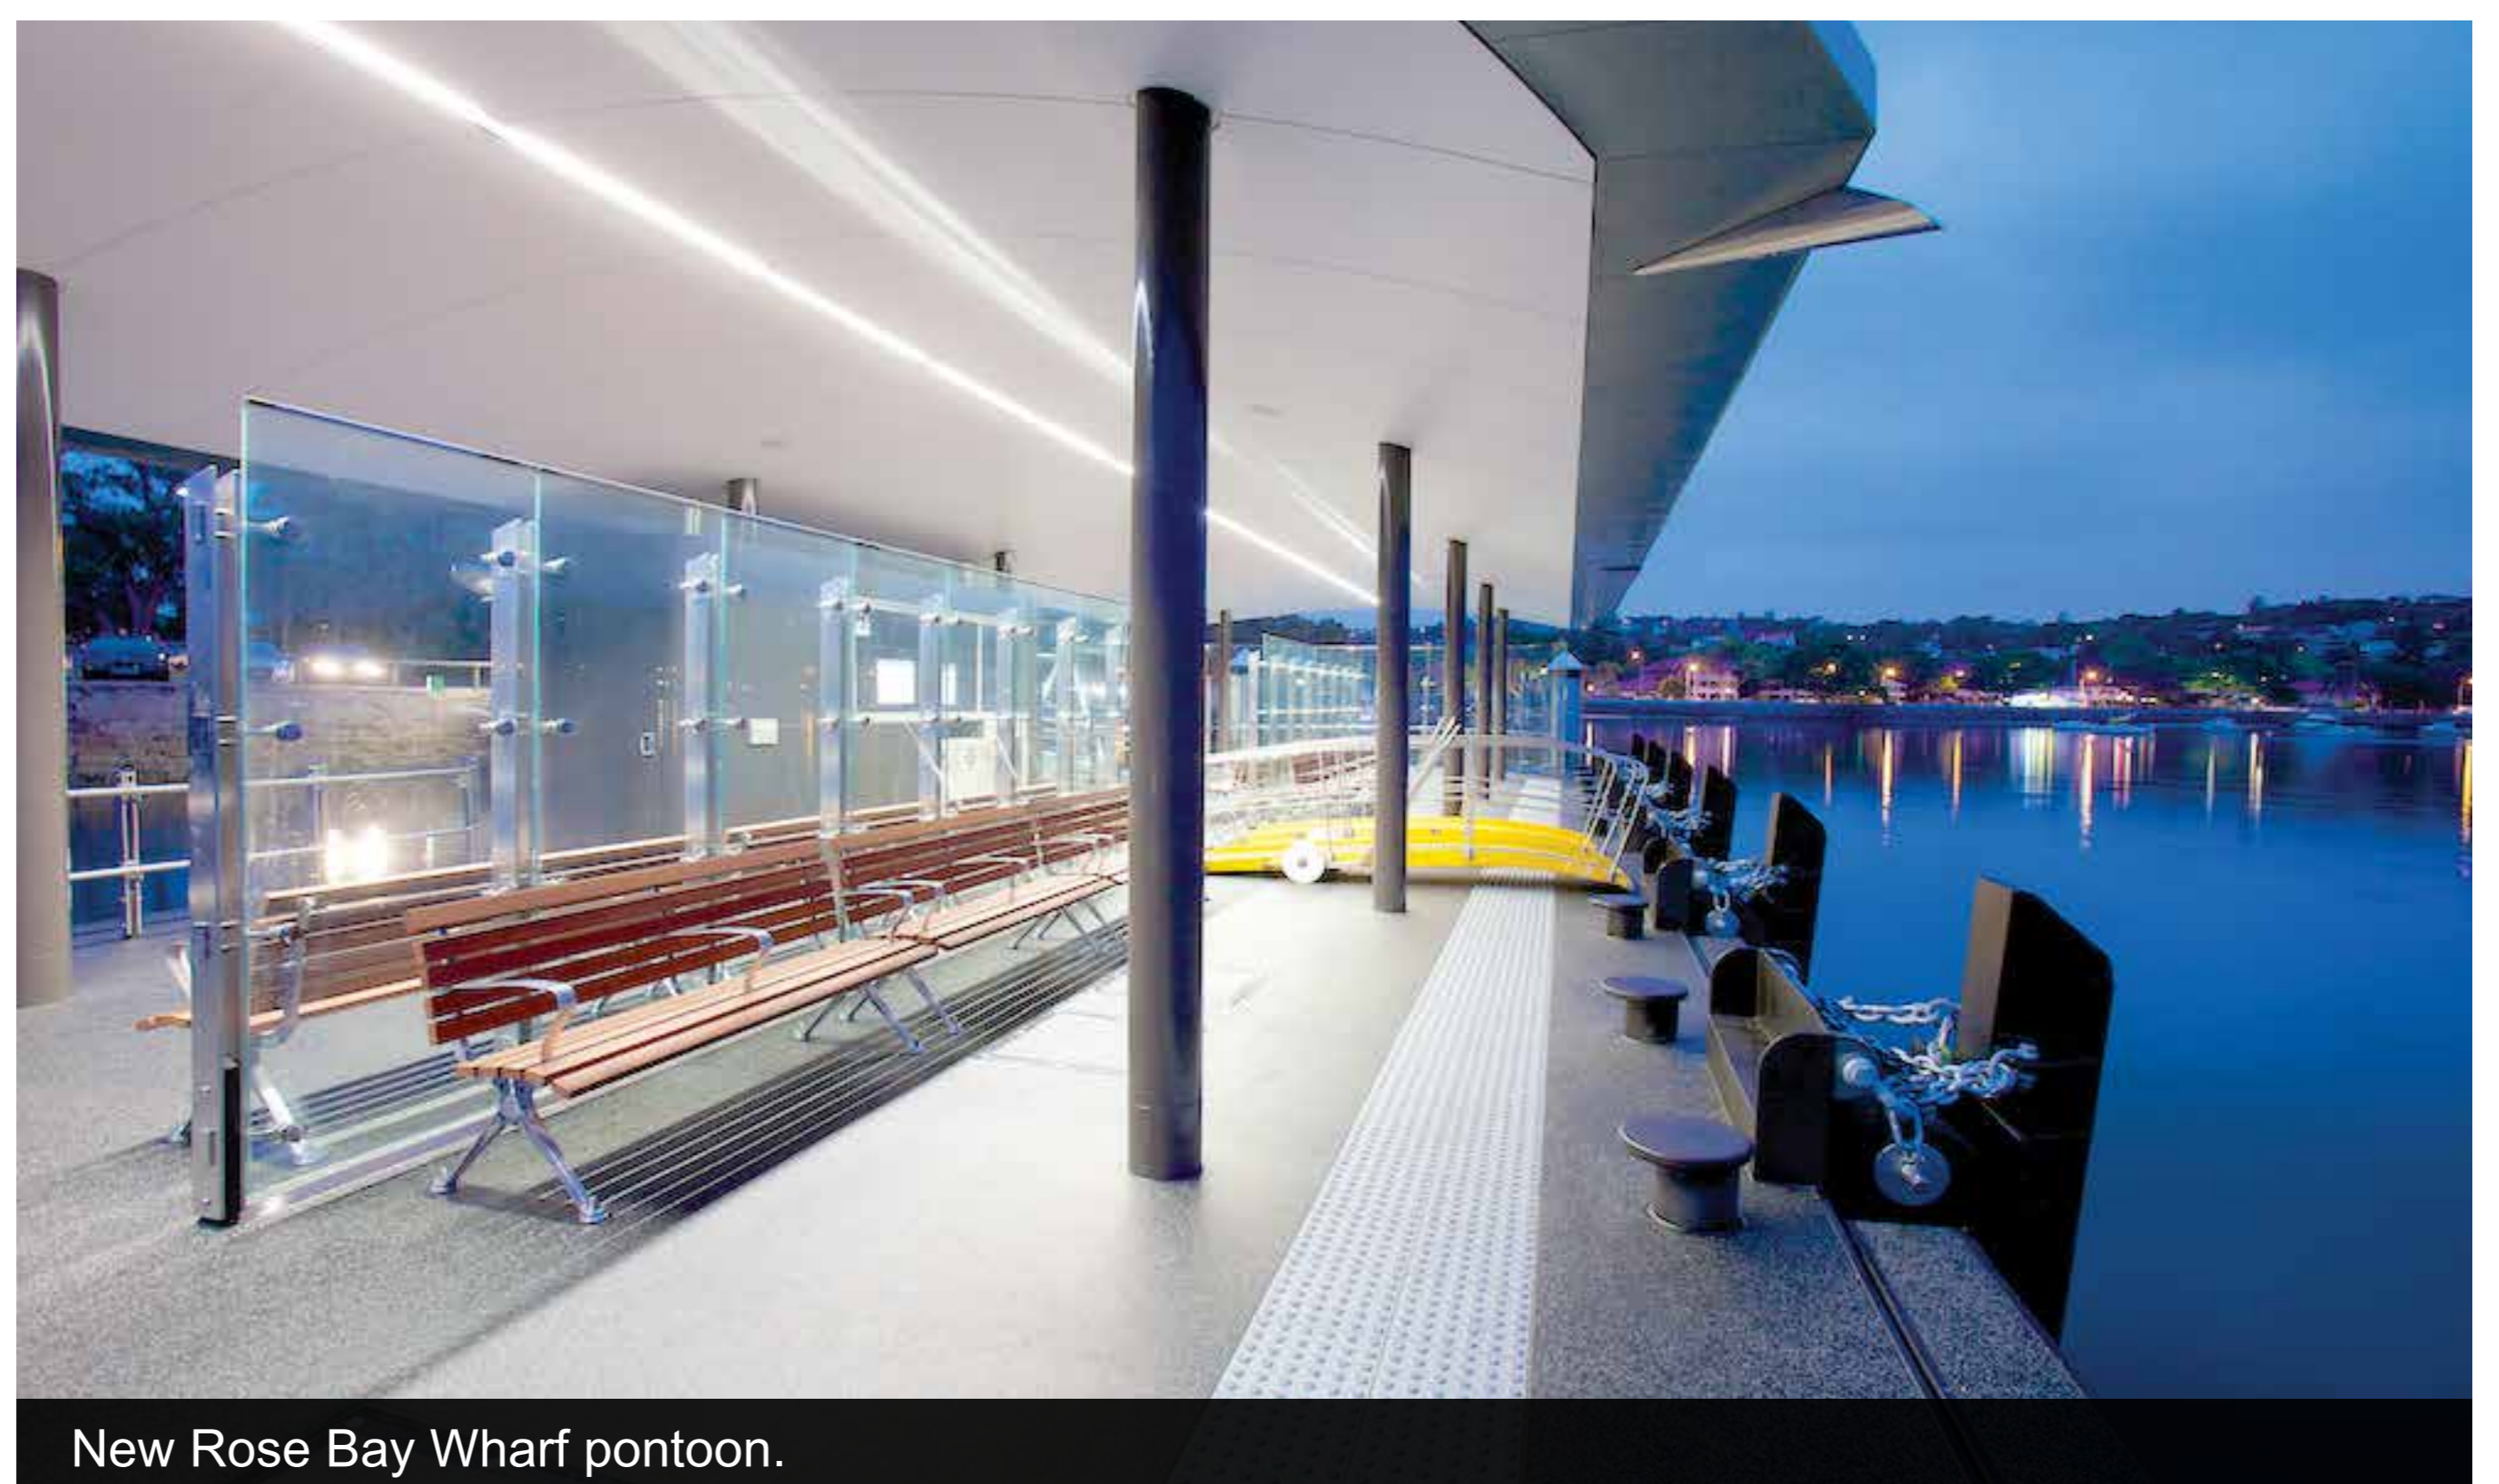

The pontoon will have a curved roof which will shelter customers from the weather. Glass screens and seating will provide improved comfort and amenity.

The new sections of the wharf will look similar to the recently upgraded wharves including Rose Bay and Balmain (Thames Street).

Accessibility for customers using mobility aids and customers with prams will be improved with the pontoon, gangway and ramp designed to meet current access standards.

Recently upgraded Balmain (Thames Street).

New Rose Bay Wharf pontoon.
