

Milsons Point Wharf expansion

WHARF EXPANSION

December 2016

The proposed concept for the expanded wharf would improve access to the wharf and provide capacity for additional services by adding a second berthing face and a larger waiting area.

Artist's impression of the new Milsons Point Wharf viewed from the water

The proposed design would provide two berthing faces by retaining the existing wharf and duplicating the gangway and hydraulic platform.

To provide efficient access for customers the existing waiting area would be expanded to create one waiting area between the two platforms. The existing roof would shift to the centre of the expanded waiting area.

Wharf key features

Dual berthing

- ▶ Two hydraulic boarding platforms
- ▶ Two covered gangways.

Access between waiting area and foreshore

- ▶ Existing ramp leading to Luna Park
- ▶ New access ramp leading to Alfred Street from the wharf
- ▶ New stairs providing access to the forecourt from the wharf.
