

# Thompson Road

## Mitchell Highway safety upgrade

Transport for NSW | March 2022

### Upgrade complete

Transport for NSW has completed an important \$2.98 million safety upgrade at the intersection of the Mitchell Highway and Thompson Road between Orange and Molong.

Upgrades include road widening, the installation of new guardrail and a dedicated right turning lane to enable motorists to turn right into Thompson Road in a safer environment.

Since the completion of these safety improvements, Transport for NSW has conducted a speed zone review and recommend that the temporary speed limit of 80km/h on this section of the Mitchell Highway be removed.

**The speed limit will return to 100km/h from Tuesday, 22 March.**

The NSW Government is committed to delivering safety improvements in the regions and on high risk country roads.
