

## Preparation for utility relocations on Nelligen Bridge replacement

We are planning for utility relocations on the corner of Kings Highway and Wharf Street, the corner of Wharf Street and Braidwood Street and on the Clyde River's eastern foreshore near Thule Road.

Work will start from **11 November** until **late March**, weather permitting and be carried out between **Monday to Friday 7 am to 6 pm** and **Saturday 8 am to 1 pm**.

### What are we doing?

Work will include temporarily fencing off areas and the use of machinery to drill holes into the ground to install pipes that will later carry relocated utilities including telecommunications and electricity under the Clyde River. Once work is completed, any disturbed areas will be restored.

### What you need to know

To minimise impacts, work will be carried out during normal construction hours between **Monday to Friday 7 am to 6 pm** and **Saturday 8 am to 1 pm**. There would be no work on Sundays or public holidays.

There will be some noise associated with this work and we will make every effort to minimise disruptions including engaging additional specialised staff to deliver work more efficiently, turning off machinery when not in use and not working on private property.

Some activities will also be carried out in the western foreshore area including surveying and minor construction work. The playground and toilet facilities will remain open.

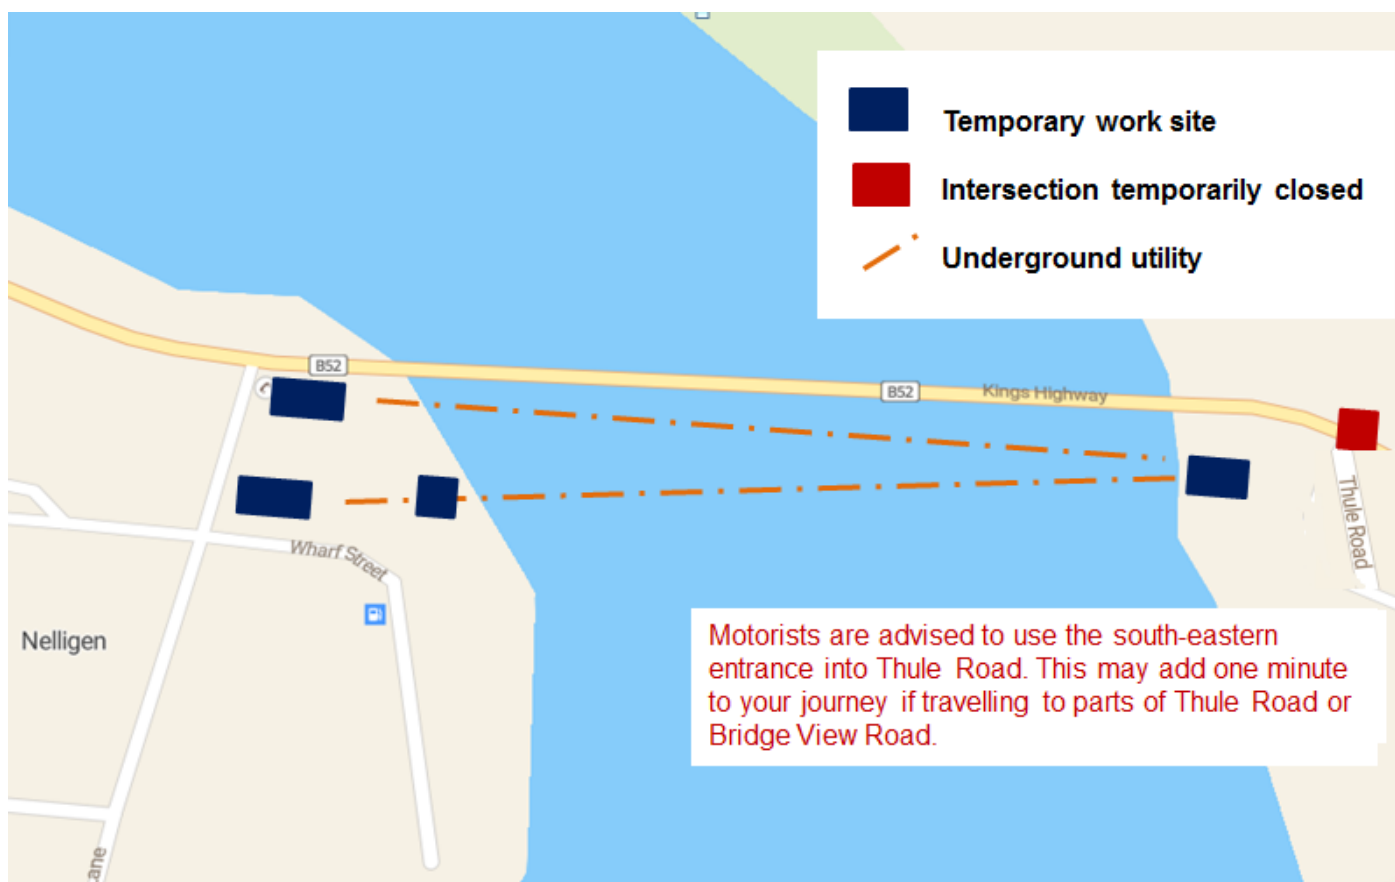

To minimise the impact to motorists and the community no work will be carried out over the peak holiday period from Monday 20 December with work recommencing on Monday 6 January 2020.

### Traffic changes

For the safety of workers and motorists, the north-western entrance (closest to Nelligen Bridge) into Thule Road may be closed while this work is carried out. Motorists are advised to use the south-eastern entrance (closest to Batemans Bay) into Thule Road. This may add one minute to your journey if travelling to parts of Thule Road or Bridge View Road.

Please follow the direction of traffic controllers and signs. For the latest traffic updates, you can call 132 701, visit [livetraffic.com](http://livetraffic.com) or download the Live Traffic NSW App.

## Work area

## Next Steps

We have working on further improvements to the detailed design, these improved designs will be finalised prior to the assessment of construction tenders in preparation for the start of major work.
