

Nelligen Bridge Replacement – Out of hours work in October

The NSW Government is funding this \$148 million project which will provide a new bridge over the Clyde River and upgrades to the Kings Highway at Nelligen.

What are we doing?

We will be installing precast pile cap shells over piers 4 and 7 in the Clyde River as part of the Nelligen Bridge Replacement project.

The precast pile cap shells are fabricated offsite and transported at night under an overmass permit. Once on site, they will be loaded from the temporary jetty onto a barge that will be pushed and positioned next to each pier location using a tugboat. The pile cap shells will be lifted into place over each pier using a 400 tonne crane that is mounted on another barge.

When are we working?

Due to the complexity of this work, we will be extending our working hours over two weekends in October.

Extended work hours for **pier 4** will take place from **Saturday 9 October to Monday 11 October between 6am and 10pm**, weather permitting.

Extended work hours for **pier 7** will take place from **Saturday 23 October to Monday 25 October between 6am and 10pm**, weather permitting.

We will advise the community in advance if these dates change due to weather or program impacts.

How will the work affect you?

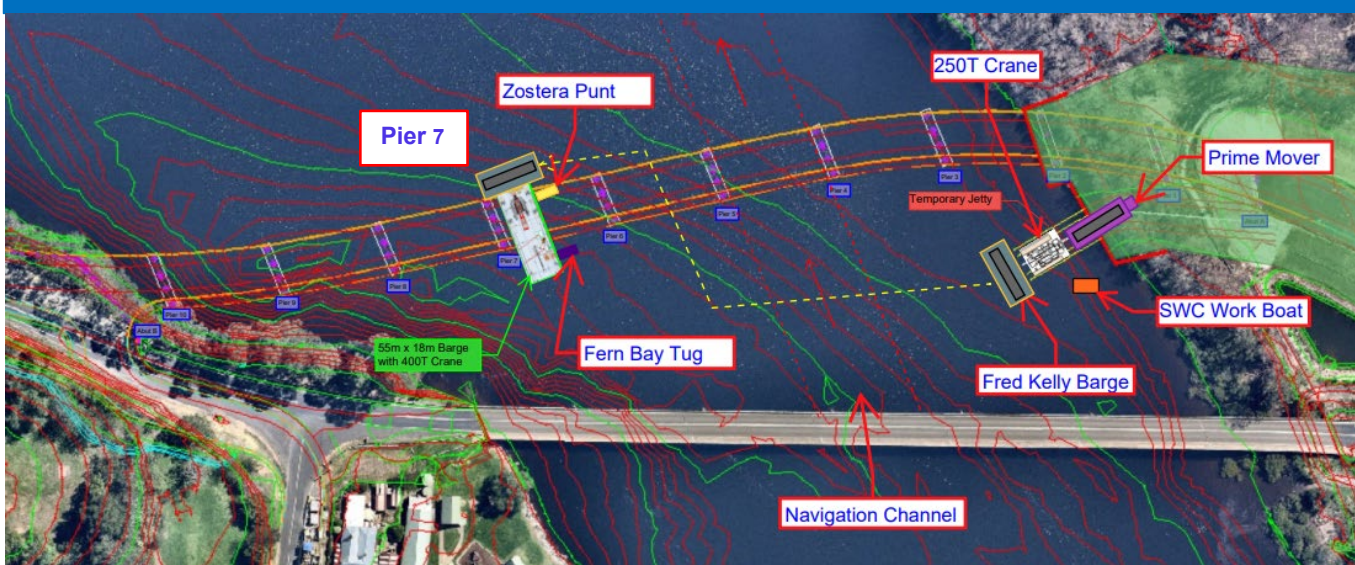

During this work we will be using machinery and equipment that generate light, noise and vibration. We will make every effort to minimise disruption by:

- turning off machinery and vehicles when not in use
- using noise shields, if required
- directing temporary lighting down and away from homes where safe to do so
- planning activities close to residents within standard construction hours and scheduling noisy activities earlier in the night, where possible
- fitting equipment with devices to minimise noise including reversing squawkers rather than beepers
- regularly monitoring noise so we can manage any potential impacts and adjust our work, where possible.
