

Nowra Bridge Project

Night work in June 2022

The Nowra Bridge project will provide a new four lane bridge over the Shoalhaven River, upgraded intersections and additional lanes on the Princes Highway.

Upcoming night work

Night work will continue to be carried out on the Princes Highway, Scenic Drive, and Bolong, Illaroo and Bridge roads for the safety of workers and road users and to avoid extended traffic delays during the day.

Work will take place across the project from **Wednesday 1 June to Thursday 30 June between 6pm and 7am**, weather permitting. The site will be shut down for the long weekend in June from **6pm Friday 10 June until 7am Tuesday 14 June**.

There are a number of reasons why work is required outside standard construction hours including:

- **Safety** – work outside standard construction hours helps us improve safety by minimising the interactions between road users, pedestrians and workers
- **Traffic** – to safely carry out activities, traffic may be stopped, detoured or reduced to one lane. By working at night, delays are minimised and journey times for motorists and businesses are less affected
- **Utilities** – work may be required at night to minimise impacts on utility services and networks
- **Weather** – even when it's not raining, temperature and wind can impact activities including placing concrete and laying asphalt
- **Quality** – the quality of concrete and asphalt can be impacted if activities are not continuous

How will the work affect you?

During this work we will be using machinery and equipment that generate light, noise and vibration. We will make every effort to minimise disruption by:

- turning off machinery and vehicles when not in use
- using noise shields
- directing temporary lighting down and away from homes
- planning activities close to residents within standard construction hours and scheduling noisy activities earlier in the night, where possible

- fitting equipment with devices to minimise noise including reversing squawkers rather than beepers
- monitoring noise so we can manage any potential impacts and adjust our work, where possible.

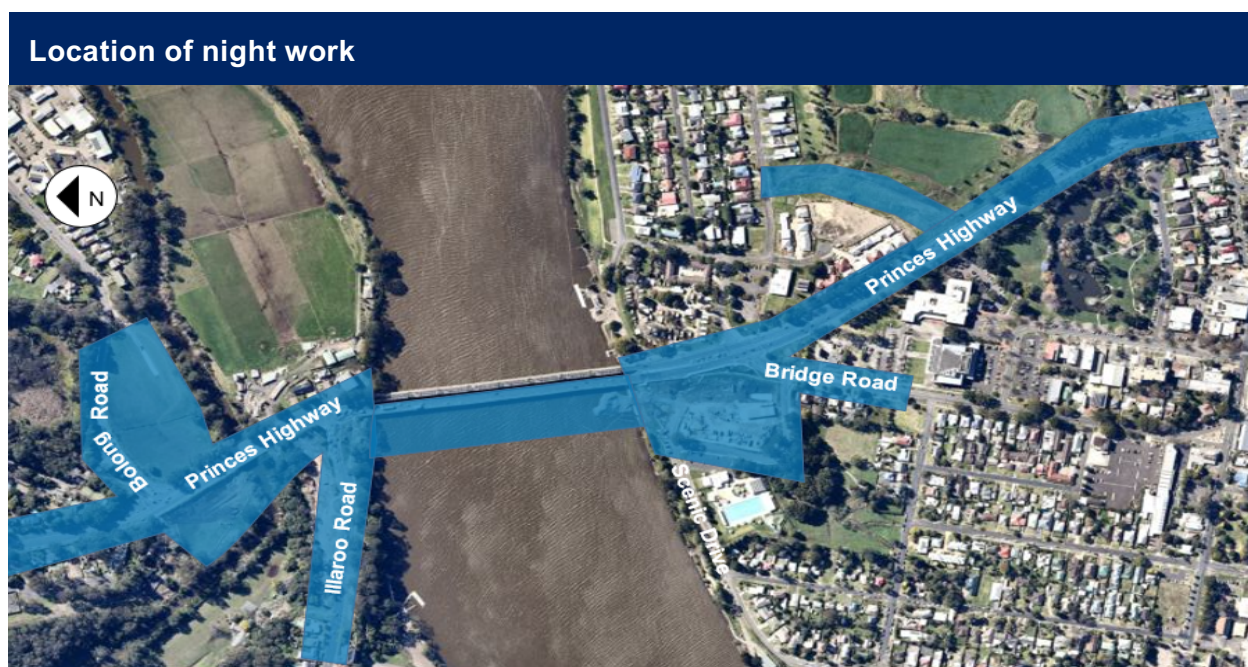

Equipment being used during this night work includes light vehicles and trucks, cranes, elevated working platforms, lighting towers, power tools, concrete pump trucks, drill rigs, water trucks, street sweepers, asphalt machinery, rollers, excavators, and graders. We will continue to monitor noise and vibration impacts during this work.

Traffic and pedestrian changes

There will be temporary traffic changes to ensure the work zone is safe. Lane closures, stop/slow traffic conditions and a 40km/h speed limit will be in place in both directions on the Princes Highway and Bolong, Illaroo and Bridge roads during the night work. This includes lane closures on the existing northbound bridge. Please keep to speed limits and follow the direction of traffic controllers and signs.

The footpath on the northbound bridge will be closed during some of these work activities with a detour via the footpath on the southbound bridge.

A map of the night work areas and a summary of activities is provided below.

Location	Activities	Occurrence
Princes Highway (between Mattes Way and Illaroo Road)	Placing and removing temporary traffic barriers and material. Relocating and installing stormwater drainage, street lighting, footpath, kerb and placing asphalt and linemarking. Installing and commissioning electrical and telecommunication services.	Up to 15 nights
Bolong Road	Placing and removing temporary traffic barriers and material. Installing stormwater drainage and street lighting. Removing and installing footpath, kerb and placing asphalt and linemarking.	Up to 6 nights
Illaroo Road	Placing and removing temporary traffic barriers and material, relocating and installing street lighting, footpath, kerb and placing asphalt and linemarking.	Up to 8 nights
Existing northbound bridge	Installing utility services underneath the northbound bridge. Coring for pavement investigation works. This work will involve partial lane closures and footpath detours.	Up to 5 nights
	Pouring concrete for the traffic barrier on the new bridge. This work will involve partial lane closures and footpath detours.	Up to 5 nights
Scenic Drive compound	General office activities, pre-starts, vehicle movements and deliveries.	Up to 20 nights
Bridge Road	Placing and removing temporary traffic barriers and material. Relocating and installing street lighting, traffic control signals and service investigation work. Placing asphalt and line marking.	Up to 10 nights
Princes Highway (between Shoalhaven River and Moss Street)	Placing and removing temporary traffic barriers and material. Relocating and installing street lighting, traffic control signals, stormwater drainage, footpath, kerb, landscaping, placing asphalt and line marking.	Up to 10 nights

Temporary footpath closure on the southern foreshore

The underpass on the western side of the southern foreshore will be temporarily closed between 7am to 6pm for up to four weeks from **Tuesday 14 June**, weather permitting. This closure is required for the safety of footpath users while we remove scaffolding from underneath the bridge, install lighting and a footpath.

Pedestrians will be detoured via the Princes Highway signalised crossing. The detour route can be viewed on the below map. Signage will be in place during these temporary closures.
