

## 16 Consideration of options

### 16.1 Option assessment

The options will be assessed against a range of technical criteria based on a combination of qualitative and quantitative parameters following the Multi-Criteria Assessment (MCA) process as outlined in Section 4.

An initial consideration of the options is provided in Table 30 beginning on page 58.

The assessment of the options will be undertaken in more detail following input from the community consultation and the value management workshop processes.
