BUILDING OUR FUTURE

June 2017

Airport East precinct upgrade – continued service relocation work

The Australian and NSW Governments are upgrading roads east of Sydney Airport to improve traffic flow and access to the airport and Port Botany.

Roads and Maritime Services is carrying out important service identification and relocation work across the project area, including electricity, gas, water, sewerage and communications. We wrote to you in April to advise that this work was expected to be completed in around 12 weeks.

Due to limited availability of utility service providers, who are required to carry out this complex work, service relocation work will continue across parts of the project area for a further three months, weather permitting.

Activities will include:

- installing site fencing
- installing traffic controls including signs, signals, temporary traffic barriers and line marking
- modifying pedestrian access with temporary footpath closures
- saw cutting and trenching on footpaths along Botany Road and Wentworth Avenue
- trenching and underboring along Botany Road and Wentworth Avenue
- investigation and relocation of services including electricity, gas, water, sewerage and communications
- installing new poles, pipes, wires and cables
- removing redundant poles, pipes, wires and cables
- carrying out earthwork and pavement work
- trimming and removing some vegetation and trees
- excavating and installing utility pits
- delivering equipment and materials to the work area.

We have included a map over the page to show the location of the work.

Construction hours

Standard construction hours for the project will be between **7am** and **6pm** from Monday to Friday and between **8am** and **1pm** Saturday, excluding public holidays. There will be up to a further **60** night shifts between **Monday 10 July** and **Monday 2 October 2017** weather and construction conditions permitting.

Out of hours work is necessary on this project due to the traffic conditions in the area and the limitations of working next to the Sydney Airport east west runway and the Port Botany Freight Rail Line. Night work will be carried out between **9pm** and **5am**, up to five nights a week, weather permitting.

There is also a scheduled shutdown of the Port Botany Freight Rail Line from **2am Saturday 15 July to 2am Monday 17 July 2017**. During this period, we will carry out some minor work in the rail corridor.

We will continue to provide the most up to date information about our work schedules in our weekly updates.

A weekly schedule of upcoming work, including night work, is available online and emailed to the project stakeholder list every week. If you would like to receive the weekly schedule, please email the project team at comms.airporteast@jhg.com.au

How will the work affect you?

There may be some noise, dust, vibration and disruption associated with this work. Machinery and equipment used may include lighting towers, excavators, trucks, light vehicles, plate compactors, jackhammers, concrete saws, concrete equipment and trucks, vacuum trucks, cranes, rollers, compressors, and hand tools.

We will make every effort to minimise noise by:

- arranging the work in stages at different locations
- working at night only when necessary
- using flexible noise barriers, where possible to reduce noise generated by construction activities.

Lighting towers will be directed away from residential properties at night, wherever possible. Pedestrian access will be maintained at all times, although minor temporary detours may be in place during the work. Residents and businesses will be notified before any planned outages to services.

Location of work

Traffic changes

There will be some temporary traffic changes to ensure the work zone is safe. Lane closures will be in place and may affect travel times. Traffic controls will be in place at Botany Road, General Holmes Drive, Joyce Drive and Wentworth Avenue. Electronic message signs will also help keep the community informed of any changes to road conditions.

During this work there may be some temporary traffic and access changes to Botany Lane. We will provide further information about any changes in this area as they are confirmed.

Please keep to speed limits and follow the direction of traffic controllers and signs. For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.

Contact

If you have any questions, please contact our delivery partner John Holland Group on **1300 862 844** or comms.airportheast@jhq.com.au. For more information on this project, visit www.rms.nsw.gov.au/sydneyairport.

Thank you for your patience during this important work.

Translating and Interpreting Service

If you need an interpreter, please call the Translating and Interpreting Service (TIS National) on **131 450** and ask them to telephone Roads and Maritime Services on 1300 862 844

Arabic
