## Glossary / Abbreviations

ANZECC	Australian and New Zealand Environment and Conservation Council
CCS	Community Communications Strategy
CEMP	Construction Environmental Management Plan
CNVMP	Construction Noise and Vibration Management Plan
dBA	Decibels using the A-weighted scale measured according to the frequency of the human ear.
DECC	Department of Environment and Climate Change (now EPA)
ECRTN	Environmental Criteria for Road Traffic Noise
EMS	Environmental management system
ENMM	RTA Environmental Noise Management Manual
Environmental aspect	Defined by AS/NZS ISO 14001:2004 as an element of an organisation's activities, products or services that can interact with the environment.
Environmental impact	Defined by AS/NZS ISO 14001:2004 as any change to the environment, whether adverse or beneficial, wholly or partially resulting from an organisation's environmental aspects.
Environmental objective	Defined by AS/NZS ISO 14001:2004 as an overall environmental goal, consistent with the environmental policy, that an organisation sets itself to achieve.
Environmental target	Defined by AS/NZS ISO 14001:2004 as a detailed performance requirement, applicable to the organisation or parts thereof, that arises from the environmental objectives and that needs to be set and met in order to achieve those objectives.
EPA	Environment Protection Authority
EP&A Act	<i>Environmental Planning and Assessment Act 1979</i>
ERG	Environmental Review Group
EWMS	Environmental Work Method Statements
Feasible and reasonable	Consideration of best practice taking into account the benefit of proposed measures and their technological and associated operational application in the NSW and Australian context. Feasible relates to engineering considerations and what is practical to build. Reasonable relates to the application of judgement in arriving at a decision, taking into account mitigation benefits and cost of mitigation versus benefits provided,

	community views and nature and extent of potential improvements.
ICNG	Interim Construction Noise Guideline
L <sub>Aeq</sub> (15min)	The A-weighted equivalent continuous (energy average) A-weighted sound pressure level of the construction works under consideration over a 15-minute period and excludes other noise sources such as from industry, road, rail and the community.
L <sub>A</sub> (max)	the A-weighted maximum noise level only from the construction works under consideration, measured using the fast time weighting on a sound level meter.
NCA	Noise Catchment Area
NML	Noise Management Level
OEH	Office of Environment and Heritage
POEO Act	Protection of environment operations act 1997
RBL	The Rating Background Level for each period is the medium value of the ABL values for the period over all of the days measured. There is therefore an RBL value for each period (day, evening and night)
REF	Review of Environmental Factors
RMS	Roads and Maritime Services
SWP	Sound Power Level
SPL	Sound Pressure Level

# 1 Introduction

## 1.1 Context

This Construction Noise and Vibration Management Plan (CNVMP or Plan) forms part of the Construction Environmental Management Plan (CEMP) for The Northern Road Upgrade – Stage 3 North Project (the Project).

This CNVMP has been prepared to address the requirements of the Review of Environmental Factors (REF), RMS G36, and all applicable legislation.

## 1.2 Background

The REF assessed noise and vibration impacts on sensitive receivers and structures from construction of the Project.

As part of REF development, a detailed construction and operational noise and vibration assessment was prepared. The noise and vibration assessment was included in the REF as *Appendix E*.

Further to this assessment, Lendlease have commissioned an acoustic consultant to undertake a Construction Noise Impact Assessment for the Project based on the proposed construction methods, ancillary facilities and timings of activities Proposed by the construction team.

As indicated in Section 6.2 of the REF, and Table 7-1 of this NVMP predicted worst case construction noise levels during standard hours would comply with Noise Management Levels (NML) within ~50% of Noise Catchment Areas (NCA).

The REF also identified acceptable construction vibration criteria for the works, which are discussed further in Section 5.4.

## 1.3 Environmental management systems overview

The overall Environmental Management System for the Project is described in the Construction Environmental Management Plan (CEMP).

The CNVMP is part of the Lendlease environmental management framework for the Project, as described in Section 4.1 of the CEMP

Management measures identified in this Plan will be incorporated into site or activity specific Environmental Work Method Statements (EWMS) for high risk activities.

EWMS will be developed and signed off by environment and management representatives prior to associated works and construction personnel will be required to undertake works in accordance with the identified requirements and associated mitigation measures.

Used together, the CEMP, strategies, procedures and EWMS form management guides that clearly identify required environmental management actions for reference by Lendlease personnel and contractors.

The review and document control processes for this Plan are described in Section 1.6 and Chapter 10 of the CEMP.

## 2 Purpose and objectives

### 2.1 Purpose

The purpose of this Plan is to describe how Lendlease proposes to manage potential noise and vibration impacts during construction of the Project.

The management of noise and vibration impacts in this Plan is based on the assessment undertaken as part of the REF and assessments undertaken during detailed design by Lendlease. The assessment's considered the following guidelines and standards:

- Environmental Criteria for Road Traffic Noise (ECRTN) (EPA 1999);
- NSW Industrial Noise Policy (EPA 2000);
- RTA Environmental Noise Management Manual (ENMM) (RTA 2001a);
- Interim Construction Noise Guideline (ICNG) (DECCW 2009);
- Assessing Vibration: A Technical Guideline (DEC 2006); and
- British Standard 7385: Part 2 “Evaluation and measurement of vibration in buildings”.

### 2.2 Objectives

The key objective of the CNVMP is to ensure that impacts to the local community and the built environment from noise and vibration are minimised. Specific objectives include:

- Identifying sensitive receivers and ensure appropriate environmental controls and procedures are implemented during construction activities;
- Minimising potential adverse noise and vibration impacts to the environment and community;
- Managing impacts if they occur through a systematic analysis of mitigation strategies;
- Ensure appropriate measures are implemented to address the relevant environmental safeguards outlined in Table 3.1; and
- Ensure appropriate measures are implemented to comply with all relevant legislation and other requirements as described in Section 3.1 and Section 3.4 of this Plan.

### 2.3 Targets

Targets have been established for the management of noise and vibration impacts during the Project to ensure:

- Full compliance with the relevant legislative requirements i.e. no noise and vibration related PIN's or prosecutions throughout the Project;

- Feasible and reasonable noise mitigation measures implemented to achieve the construction noise management levels detailed in the Interim Construction Noise Guideline (DECC, 2009); and
- There are minimal complaints from the community and other stakeholders; and if complaints are received, ensure that they are addressed appropriately.

## 3 Environmental requirements

### 3.1 Relevant legislation and guidelines

#### 3.1.1 Legislation

Legislation relevant to noise and vibration management includes:

- *Protection of the Environment Operations Act 1997* (POEO Act); and
- Protection of the Environment Operations (Noise Control) Regulation 2008.

Relevant provisions of the above legislation are explained in the register of legal and other requirements included in *Appendix A1 of the CEMP*.

#### 3.1.2 Guidelines

The main guidelines, specifications and policy documents relevant to this Plan include:

- RMS QA Specification G36 – Environmental Protection (Management System);
- Environmental Criteria for Road Traffic Noise (ECRTN) (EPA 1999);
- NSW Industrial Noise Policy (EPA 2000);
- RTA Environmental Noise Management Manual (ENMM) (RTA 2001a);
- Interim Construction Noise Guideline (ICNG) (DECCW 2009);
- RMS Construction Noise and Vibration Guideline (AUG 2016);
- Assessing Vibration: A Technical Guideline (DEC 2006);
- British Standard 7385: Part 2 “Evaluation and measurement of vibration in buildings”; and
- German DIN 4150: Part 3 – 1999 Effects of Vibration on Structure (DIN 1999).

### 3.2 REF Environmental Safeguards

The Environmental Safeguards relevant to this Plan are listed Table 3-1 below. A cross reference is also included to indicate where the condition is addressed in this Plan or other project management documents.

**Table 3-1 Conditions of Approval relevant to noise and vibration**

REF No.	Condition Requirements	Document Reference
NV1	<p>A Noise and Vibration Management Plan (NVMP) will be prepared and implemented as part of the CEMP. The NVMP will generally follow the approach in the Interim Construction Noise Guideline (ICNG) (DECC, 2009) and identify:</p> <ul style="list-style-type: none"> <li>• all potential significant noise and vibration generating activities associated with the activity;</li> <li>• feasible and reasonable mitigation measures to be implemented, taking into account Beyond the Pavement: urban design policy, process and principles (Roads and Maritime, 2014);</li> <li>• a monitoring program to assess performance against relevant noise and vibration criteria;</li> <li>• arrangements for consultation with affected neighbours and sensitive receivers, including notification and complaint handling procedures; and</li> <li>• contingency measures to be implemented in the event of non-compliance with noise and vibration criteria.</li> </ul>	This Document
NV2	<p>All sensitive receivers (e.g. schools, local residents) likely to be affected will be notified at least five days prior to commencement of any works associated with the activity that may have an adverse noise or vibration impact. The notification will provide details of:</p> <ul style="list-style-type: none"> <li>• the project;</li> <li>• the construction period;</li> <li>• construction hours;</li> <li>• contact information for project;</li> <li>• management staff;</li> <li>• complaint and incident reporting; and</li> <li>• how to obtain further information.</li> </ul>	Community Involvement Plan
NV3	<p>Further assessment of reasonable and feasible operational noise mitigation in the form of noise barriers and at-property treatments would be assessed and determined during detailed design. At-property treatments would be determined and implemented in consultation with impacted property owners.</p>	Roads and Maritime Services responsibility
NV4	<p>Construction staff will be inducted and educated regarding management of noise impacts.</p>	Project Induction
NV5	<p>Construction programming would be developed in consultation with the affected community to minimise noise impacts – this may include agreement on completing construction in as short a time as possible or implementing time and duration restrictions and respite periods.</p>	Community Involvement Plan
NV6	<p>Place as much distance as possible between the plant or equipment and residences and other sensitive land uses, particularly at site compounds.</p>	Section 8.1
NV7	<p>Use temporary site buildings and materials stockpiles as noise barriers (e.g. on site compounds).</p>	Section 8.1

REF No.	Condition Requirements	Document Reference
NV8	<i>Schedule construction of any permanent walls so that they can be used as early as possible as noise barriers.</i>	Section 8.1
NV9	<i>Schedule the use of vibration intensive equipment for less sensitive times of the day.</i>	Section 8.1
NV10	<i>Avoid multiple vibration intensive activities occurring at the same time.</i>	Section 8.1
NV11	<i>Selection of ancillary site location should consider the proximity of the site to sensitive receivers. Where compounds are close to residences, additional care should be taken in layout and utilising structures and stockpiles as noise screens.</i>	Section 8.1
NV12	<i>Where possible, works outside of standard construction hours will be planned so that noisier works are carried out in the earlier part of the evening or night time.</i>	Section 8.1
NV13	<i>Examine different types of machines that perform the same function and compare the noise level data to select the least noisy machine. For example, rubber wheeled tractors can be less noisy than steel tracked tractors.</i>	Section 8.1
NV14	<i>Select appropriately sized equipment for the task rather than using large equipment when not necessary.</i>	Section 8.1
NV15	<i>Reduce throttle setting and turn off equipment when not being used.</i>	Section 8.1
NV16	<i>Regularly inspect and maintain equipment to ensure it is in good working order. Also check the condition of mufflers.</i>	Section 8.1
NV17	<i>Where acceptable from a work health and safety perspective, quieter alternatives to reversing alarms (such as spotters, closed circuit television monitors and 'smart' reversing alarms) would be used particularly during out of hours activities.</i>	Section 8.1
NV18	<i>Noise monitoring will be undertaken to assess compliance with noise management levels (NMLs) and assess the effectiveness of noise mitigation.</i>	Section 8.1
NV19	<i>All noise complaints will be investigated and appropriate mitigation measures implemented where practicable to minimise further impacts.</i>	Section 8.1

## 4 Existing environment

### 4.1 Sensitive receivers

The majority of sensitive receivers identified within the study area are residential receivers, followed by educational, religious, commercial and industrial receivers. Table 4-1 below identifies the type and number of receivers within the study area, shown as individual properties as well as the number of industrial buildings associated with those properties.

**Table 4-1 Sensitive Receivers**

Receiver Type	Number of Properties	Number of Buildings
Residential properties	2970	3019
Commercial and industrial properties	38	48
Educational institutions	7	49
Childcare centres	1	1
Medical facilities	1	10
Place of worship	6	6
Outdoor open areas	18	18
TOTAL	3041	3151

### 4.2 Ambient noise

Noise monitoring was conducted as part of the REF at representative locations at a range of distances from the Project. The monitoring was undertaken to provide background noise levels and, among other purposes, to establish appropriate construction noise assessment criteria. Locations were selected to be representative of receivers that would experience a noise impact from the existing road or from the Project (see Section 6.2 of the REF for monitoring locations).

**Figure 1** and **Figure 2** provide a locality plan of the project Noise Catchment Areas adapted from the REF and the noise monitoring locations used during the REF to determine RBL values for each catchment.

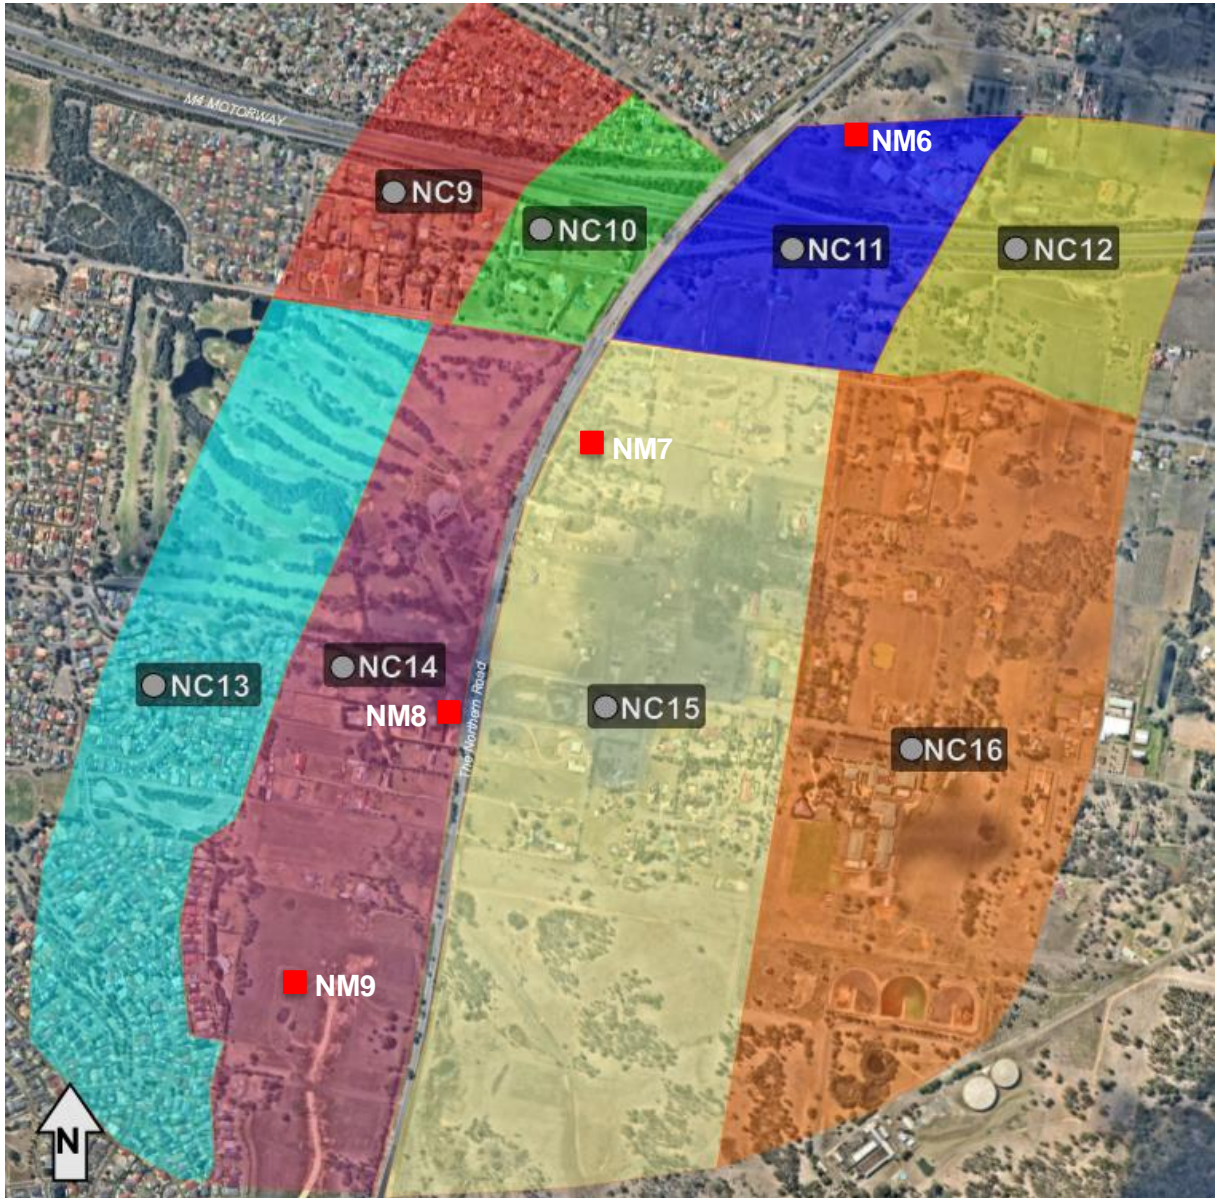

Figure 1: NCA 9-16

Figure 2: NCA 1-08

## 5 Noise and vibration criteria for NSW

The EPA recommends management levels and goals when assessing construction noise and vibration. These are outlined in:

- The ICNG;
- Assessing Vibration: a technical guideline; and
- The ANZECC, Technical Basis for Guidelines to Minimise Annoyance due to Blasting Overpressure and Ground Vibration.

Relevant elements of these documents are summaries and discussed in this Chapter.

### 5.1 Construction noise and assessment objectives

The ICNG provides guidelines for the assessment and management of construction noise. The ICNG focuses on applying a range of work practices to minimise construction noise impacts rather than focusing on achieving numeric noise levels.

The main objectives of the ICNG are to:

- Identify and minimise noise from construction works;
- Focus on applying all 'feasible' and 'reasonable' work practices to minimise construction noise impacts;
- Encourage construction during the recommended standard hours only, unless approval is given for works that cannot be undertaken during these hours;
- Reduce time spent dealing with complaints at the project implementation stage; and
- Provide flexibility in selecting site-specific feasible and reasonable work practices to minimise noise impacts.

### 5.2 Quantitative noise assessment criteria

Construction noise assessment goals presented in the ICNG are referenced to noise management levels for residential, sensitive land uses and commercial/ industrial premises.

#### ***Residential Premises***

Table 5-1 sets out management levels for noise at residences and how they are to be applied.

In Table 5-1 the rating background level (RBL) is used when determining the management level. The RBL is the overall single-figure background noise level measured in each relevant assessment period (during or outside the recommended standard hours). The term RBL is described in detail in the NSW Industrial Noise Policy (EPA, 2000).

As a guide, the difference between the internal noise level and the external noise level is typically 10dB with windows open for adequate ventilation.

**Table 5-1 Noise at residents using quantitative assessment**

Time of day	Management Level $L_{Aeq (15 min)}$ *	How to apply
Recommended standard hours: Monday to Friday 7 am to 6 pm Saturday 8 am to 1 pm No work on Sundays or public holidays	Noise affected RBL + 10 dB	The noise affected level represents the point above which there may be some community reaction to noise. <ul style="list-style-type: none"> <li>Where the predicted or measured <math>L_{Aeq (15 min)}</math> is greater than the noise affected level, the proponent should apply all feasible and reasonable work practices to meet the noise affected level; and</li> <li>The proponent should also inform all potentially impacted residents of the nature of works to be carried out, the expected noise levels and duration, as well as contact details.</li> </ul>
	Highly noise affected 75 dB(A)	The highly noise affected level represents the point above which there may be strong community reaction to noise. <ul style="list-style-type: none"> <li>Where noise is above this level, the relevant authority (consent, determining or regulatory) may require respite periods by restricting the hours that the very noisy activities can occur, taking into account: <ul style="list-style-type: none"> <li>times identified by the community when they are less sensitive to noise (such as before and after school for works near schools, or mid-morning or mid-afternoon for works near residences)</li> </ul> </li> </ul>
Outside recommended standard hours	Noise affected RBL + 5 dB	<ul style="list-style-type: none"> <li>A strong justification would typically be required for works outside the recommended standard hours;</li> <li>The proponent should apply all feasible and reasonable work practices to meet the noise affected level; and</li> <li>Where all feasible and reasonable practices have been applied and noise is more than 5 dB(A) above the noise affected level, the proponent should negotiate with the community.</li> </ul>

\* Noise levels apply at the property boundary that is most exposed to construction noise, and at a height of 1.5m above ground level. If the property boundary is more than 30m from the residence, the location for measuring or predicting noise levels is at the most noise-affected point within 30 m of the residence. Noise levels may be higher at upper floors of the noise affected residence.

### **Other land uses**

Other sensitive land uses, such as schools, typically find noise from construction to be disruptive when the properties are being used (such as during school times). Table 5-2 presents management levels for noise at other sensitive land uses based on the principle that the characteristic activities for each of these land uses should not be unduly disturbed. Consultation should be undertaken with noise sensitive land use occupants likely to be affected by noise from the works to schedule the project's work hours to achieve a reasonable noise outcome.

Internal noise levels are assessed at the centre of the occupied room. External noise levels are assessed at the most affected point within 50 metres of the area boundary. Where internal noise levels cannot be measured, external noise levels may be used. A conservative estimate of the difference between internal and external noise levels is 10dB for buildings other than residences. Some buildings may achieve greater performance, such as where windows are fixed (that is, cannot be opened). The management levels in Table 5-2 are 5dB above the corresponding road traffic noise levels in the Environmental Criteria for Road Traffic Noise (EPA 1999) (and the 'maximum' levels in the NSW Industrial Noise Policy (EPA 2000) for commercial and industrial uses) to account for the variable and short-term nature of construction noise.

**Table 5-2 Noise at sensitive land uses (non-residents) using quantitative assessment**

Land use	Noise assessment location	Noise management level ( $L_{Aeq,15min}$ )
Classrooms at schools and other educational institutions	Internal	45
Hospitals and operating theatres		
Places of worship		
Active recreation areas <sup>1</sup>	External	65
Passive recreation areas <sup>2</sup>	External	60
Community centres	Dependent on intended use	Maximum internal levels recommended in AS2107 for specific use
Industrial premises	External	75
Office, retail outlets	External	70
Other noise sensitive businesses	Investigation to determine suitable noise levels on project-by-project basis	

Notes:

1. Active recreation areas are characterised by sporting activities and activities which generate their own noise or focus for participants, making them less sensitive to external noise intrusion.
2. Passive recreation areas are characterised by contemplative activities that generate little noise and where benefits are compromised by external noise intrusion (eg. reading, meditation)

### 5.3 Adopted project noise management levels

Based on measured noise levels described in the REF, the project-specific construction noise objectives for each representative monitoring location have been determined and are presented in Table 5-3. Considering the possibility of works outside standard construction hours additional management levels for these times are also included in the construction noise objectives.

**Table 5-3 Project-specific construction noise management levels**

NCA	Monitoring location (REF)	Monitored RBL dB(A)			NML LAEQ		
		Day	Evening	Nights	Day	Evening	Night
1	1	48	48	41	58	53	46
2	1	48	48	41	58	53	46
3	2	53	49	35	63	54	40
4	2	53	49	35	63	54	40
5	3	54	50	44	64	55	49
6	3	54	50	44	64	55	49
7	4	52	51	49	62	56	54
8	3	54	50	44	64	55	49
9	9	48	49	44	58	54	49
10	6	45	41	34	55	46	39
11	6	45	41	34	55	46	39
12	9	48	49	44	58	54	49
13	9	48	49	44	58	54	49
14	8	53	46	36	63	51	41
15	7	52	49	38	62	54	43
16	9	48	49	44	58	54	49

The nine monitoring locations utilised within the REF to determine the Project NML's are depicted in Figure 1 and Figure 2 and the addresses are as follows:

- NM1: 165 Parker St, South Penrith;
- NM2: 198 Parker St, Kingswood;
- NM3: 227 Parker Street, Kingswood;
- NM4: 5/6 Nardi Terrace, Orchard Hills;
- NM5: 30 Flavel Street, South Penrith;
- NM6: Penrith Christian School;
- NM7: 1954/1962 The Northern Road, Orchard Hills;
- NM8: 2013/2017 The Northern Road, Glenmore Park; and
- NM9: 2095/2113 The Northern Road, Glenmore Park.

## 5.4 Vibration criteria

Effects of ground vibration on buildings and their occupants resulting from construction may be segregated into the following three categories:

- Human exposure – disturbance to building occupants: vibration in which the occupants or users of the building are inconvenienced or possibly disturbed;
- Effects on building contents – vibration where the building contents may be affected; and
- Effects on building structures – vibration in which the integrity of the building or structure itself may be prejudiced.

Vibration criteria relating to human comfort that are applicable to this project are taken from the DEC (2006) document *Assessing Vibration – A Technical Guideline* and include the following:

- Continuous vibration – from uninterrupted sources (see Table 5-4);

Impulsive vibration – up to three instances of sudden impact e.g. dropping heavy items, per monitoring period (see

- Table 5-5); and

**Intermittent vibration – such as from drilling, compacting or activities that would result in continuous vibration if operated continuously (see**

- Table 5-6).

Two standards by which building damage from construction-induced vibration are commonly assessed include:

- British Standard 7385: Part 2-1993 Evaluation and measurement for vibration in buildings Part 2: Guide to damage levels from ground borne vibration (BSI 1993); and
- German DIN 4150: Part 3 – 1999 Effects of Vibration on Structure (DIN 1999).

The German standard provides the most stringent criteria and will be used in this CNVMP. The DIN guideline values for peak particle velocity (mm/s) measured at the foundation of the building are summarised in Table 5-7. The criteria are frequency dependent and specific to particular categories of structure.

**Table 5-4 Continuous vibration acceleration criteria (m/s<sup>2</sup>) 1-80Hz**

Location	Assessment period	Preferred Values		Maximum Values	
		z-axis	x- and y-axis	z-axis	x- and y-axis
Residences	Daytime	0.010	0.0071	0.020	0.014
	Night-time	0.007	0.005	0.014	0.010
Offices, schools, educational institutions and places of worship	Day or night-time	0.020	0.014	0.040	0.028
		0.04	0.029	0.080	0.058

Location	Assessment period	Preferred Values		Maximum Values	
		z-axis	x- and y-axis	z-axis	x- and y-axis
Workshops	Day or night-time	0.04	0.029	0.080	0.058

**Table 5-5 Impulsive vibration acceleration criteria (m/s<sup>2</sup>) 1-80Hz**

Location	Assessment period	Preferred Values		Maximum Values	
		z-axis	x- and y-axis	z-axis	x- and y-axis
Residences	Daytime	0.30	0.21	0.60	0.42
	Night-time	0.10	0.071	0.20	0.14
Offices, schools, educational institutions and places of worship	Day or night-time	0.64	0.46	1.28	0.92
Workshops	Day or night-time	0.64	0.46	1.28	0.92

**Table 5-6 Acceptable vibration dose values for intermittent vibration (ms<sup>-1.75</sup>) 1**

Location	Daytime (7:00am-10:00pm)		Night-time (10:00pm-7:00am)	
	Preferred Values	Maximum Values	Preferred Values	Maximum Values
Critical areas *	0.10	0.20	0.10	0.20
Residences	0.20	0.40	0.13	0.26
Offices, schools, educational institutions and places of worship	0.40	0.80	0.40	0.80
Workshops	0.80	1.60	0.80	1.60

\*Includes hospital operating theatres and precision laboratories.

**Table 5-7 Structural damage criteria**

Type of Structure	Peak Component Particle Velocity, mm/s			
	Vibration at the foundation at a frequency of			Vibration of horizontal plane of highest floor at all frequencies
	1 Hz to 10 Hz	10 Hz to 50 Hz	50 Hz to 100 Hz*	
Buildings used for commercial purposes, industrial buildings and buildings of similar design	20	20 to 40	40 to 50	40
Dwellings and buildings of similar design and/or use	5	5 to 15	15 to 20	15
Structures that, because of their sensitivity to vibration, do not correspond to those listed in lines 1 and 2 and are of great intrinsic value (e.g. buildings that are under a preservation order)	3	3 to 8	8 to 10	8

\* For frequencies above 100Hz, at least the values specified in this column shall be applied.

## 6 Construction noise and vibration assessment

A range of plant and equipment will be required to undertake activities associated with the Project. A summary of anticipated construction scenarios and predicted noise levels are provided below. This information will be used to determine potential impacts on the receiving community. An adaptive management approach will be applied to the implementation of mitigation measures to minimise impacts on the community.

### 6.1 Construction activities

It is expected that the Project would be constructed over a two-year period (2017-2019). For the purpose of the noise and vibration assessment, construction impacts have been assessed based on five key stages of construction as follows (staging durations are indicative only):

- Stage 1: Compounds
- Stage 2: Utilities
- Stage 3: Earthworks
- Stage 4: Structures
- Stage 5: Pavement and Finishing

The final construction methodology and staging would be refined during the detailed design phase of the proposal, and associated noise and vibration impacts and mitigation measures re-assessed as required.

Construction works would generally be carried out during standard working hours where practicable, as follows:

- Monday to Friday, 7am to 6pm;
- Saturday, 8am to 1pm; and
- Sunday and Public Holidays, no work.

Due to the nature of the project night and weekend works would be required throughout the programmed construction period

Out of hours works would be undertaken in accordance with the Out of Hours Works Procedure (Appendix B).

Proposed plant and equipment to be used during construction have been factored into the assessment of construction noise and vibration impacts during each stage of construction with the detailed results of modelling provided in Appendix A.

### 6.2 Construction noise impacts

A computer model was developed to determine the acoustic impact of standard and OOH construction noise emissions to nearby receivers. The modelling incorporated existing topographical data for the subject site. Brüel and Kjær Predictor Type 7810 (Version 11.00) noise modelling software was used to assess the potential noise impact associated with the proposal. The model calculation method used to predict noise levels was in accordance with

ISO 9613-1 'Acoustics - Attenuation of sound during propagation outdoors. Part 1: Calculation of the absorption of sound by the atmosphere' and ISO 9613-2 'Acoustics - Attenuation of sound during propagation outdoors. Part 2: General method of calculation'.

Table 6-1 provides a summary of the maximum predicted noise levels from each related construction stage. Results are provided for unmitigated scenarios. The unmitigated results assume no noise controls or management measures.

Predicted noise levels above the NML or each Noise Catchment Area (NCA) for day, evening and night are shaded **red**, **yellow** and **green** respectively.

Noise management levels for each key sensitive receiver (identified as Ed01-Ed08) location have also been provided. Predicted noise levels for each construction scenario have been derived by calculating the combined noise output from the sound power levels of each piece of equipment associated with the stage of works.

Appendix A provides the single point calculation noise modelling results for each receiver for each specific construction activity. This appendix should be used when assessing the specific impacts of each construction scenario.

Further assessment of proposed out of hours works may be required for scenarios that differ from those assessed in Appendix A, in this instance, a predictive noise tool has been developed by the Acoustic Consultant for use by trained Project staff. This tool, or specific noise models conducted by an acoustic professional may be used to assess the impacts of proposed OOH works.

Table 6-1 Summary of Maximum Predicted Noise Emissions per NCA, LAeq(15min) (maximum emission).

NCA	Noise Management Level			Construction Activity (Max LAeq, 15min)

Ed 08	55	N/A	N/A	36	46	<35	48	50	26	36	<35	38	40

As indicated in Table 6-1, predicted worst case construction noise levels during standard hours would comply with NMLs for the majority of receivers within most NCAs. Although with the implementation of reasonable and feasible mitigation measures the majority of exceedances will be limited to night periods for a moderate number of receiver catchments. Refer to Table 7-1 for details on reasonable and feasible mitigation measures.

Noise predictions are anticipated to remain below the highly noise affected criteria especially with the implementation of reasonable and feasible mitigation measures in place.

Noise impacts in southern areas of the proposal (south of the M4 Motorway) are predicted to be substantially lower, due to increased separation distances to the front row of receivers and the lower density of properties in these areas.

### **6.2.1 Compound and ancillary facilities**

The Project will require a main site compound, and a number ancillary facilities and stockpile sites. These compound and ancillary facilities will accommodate a range of activities, plant and equipment including, but not limited to:

- Office accommodation;
- Staff amenities;
- Light vehicle parking and access;
- A plant and equipment maintenance workshop;
- Material and chemical storage;
- Concrete batching plant;
- Equipment storage;
- Material storage; and
- Concrete casting areas.

Not all sites will serve the same purpose and may include only one, or many combinations of the activities listed above. Table 6-3 summarises the likely combination of activities, plant and equipment anticipated at facilities for the project. Appendix A4 of the CEMP and Appendix I of the SWMP provide a list and assessment of all ancillary facilities and stockpile sites on the Project, respectively.

Table 6-3 Likely construction facilities and associated attributes

Facility reference no.	Facility type	Activities	Typical plant and equipment required
1: South of Wentworth Road (Lot 2 DP 711076)	Stockpile Site	<ul style="list-style-type: none"> <li>• Recycled concrete stockpile area</li> <li>• Plant and equipment parking area</li> <li>• Material laydown and storage area</li> </ul>	<ul style="list-style-type: none"> <li>• Loader.</li> <li>• Excavator.</li> <li>• Truck and dogs.</li> <li>• Light vehicles.</li> </ul>

8: Kingswood Lions Park, north-east corner of Bringelly Road and The Northern Road (Lot 26 DP 247948)	Stockpile and Laydown area	<ul style="list-style-type: none"> <li>• Materials laydown and storage</li> <li>• Delivery of materials</li> <li>• Loading of material into tipper trucks for delivery to site.</li> </ul>	<ul style="list-style-type: none"> <li>• Loader.</li> <li>• Excavator.</li> <li>• Truck and dogs.</li> <li>• Light vehicles.</li> </ul>
9: North-west corner of Maxwell Street and The Northern Road (Lot 11 DP 236368)	Stockpile and Laydown area	<ul style="list-style-type: none"> <li>• Materials laydown and storage</li> <li>• Delivery of materials</li> <li>• Loading of material into tipper trucks for delivery to site.</li> </ul>	<ul style="list-style-type: none"> <li>• Loader.</li> <li>• Excavator.</li> <li>• Truck and dogs.</li> <li>• Light vehicles.</li> </ul>

Facility reference no.	Facility type	Activities	Typical plant and equipment required
10: North of Maxwell Street, to the west of The Northern Road (Lot 10 DP 236368)	Ancillary Facility	<ul style="list-style-type: none"> <li>• Office, crib sheds, parking, first aid post, daytime deliveries</li> <li>• Arrival and departure of office staff, workforce and daytime deliveries to compound</li> <li>• Plant storage, materials laydown and storage, stockpiling and construction parking</li> <li>• Delivery of excavated material from site by tipper trucks</li> <li>• General stockpile management and loading of final product into tipper trucks for delivery to site</li> <li>• General delivery of other construction materials for storage.</li> <li>• Arrival and departure of workforce and night time deliveries to compound</li> <li>• Loading of material into tipper trucks for delivery to site.</li> </ul>	<ul style="list-style-type: none"> <li>• Loader.</li> <li>• Excavator.</li> <li>• Truck and dogs.</li> <li>• Light vehicles.</li> </ul>
11: North of Smith Street, to the west of The Northern Road (Lot 11 DP220581 and Lot 12 DP220581)	Stockpile and Laydown area	<ul style="list-style-type: none"> <li>• Materials laydown and storage</li> <li>• Delivery of materials</li> <li>• Loading of material into tipper trucks for delivery to site.</li> </ul>	<ul style="list-style-type: none"> <li>• Loader.</li> <li>• Excavator.</li> <li>• Truck and dogs.</li> <li>• Light vehicles.</li> </ul>

Site compounds will house the proposal's administrative functions and would include offices, toilet and shower facilities, repair and maintenance facilities, equipment laydown areas and stores. In addition, they would be used as stockpile and laydown locations. The location and use of the proposal's site compounds are presented above.

Further information on these sites is provided in Section 3.4 of the REF. In most times, noise emissions from standard-sized compounds will be relatively low, however, any use of heavy vehicles and reversing beepers at stockpile, laydown or maintenance facilities may impact nearby receivers, particularly during night time operations (potentially Sites 2, 3 and 10).

Noise impacts may be expected during loading operations at larger compounds during night time works.

Noise impacts associated with the anticipated usages of each compound are provided in Appendix A,

## 6.3 Construction vibration assessment

### 6.3.1 Vibration assessment

Table 6-4 lists vibration intensive plant likely to be used during construction and provides various safe working distances for each item of plant based on the vibration criteria discussed in Section 5.4. The distances are indicative only and will vary depending on the particular item of plant and geotechnical conditions.

**Table 6-4 Typical plant vibration levels**

Source	Safe Working Distance			
	Human Comfort	Commercial, Industrial or similar structures	Dwellings and similar structures	Heritage and other sensitive structures
Large Vibratory Roller (20t)	100m	5m	10m	20m
Medium Vibratory Roller (10t)	50m	5m	10m	20m
Compactor (7t)	50m	5m	20m	20m
Hand operated wacka packa on backfill	10m	5m	5m	5m
Hand operated wacka packa on asphalt	10m	5m	5m	5m
Heavy Hydraulic Hammer (1500kg hammer on 30t excavator)	20m	5m	5m	10m
Light Hydraulic Hammer (300kg on 5t excavator)	10m	5m	5m	5m
Jack Hammer	Avoid contact with structure	5m	5m	5m
Air Track Drill	20m	5m	5m	10m

Source	Safe Working Distance			
	Human Comfort	Commercial, Industrial or similar structures	Dwellings and similar structures	Heritage and other sensitive structures
Small Rock Drill (estimate)	10m	5m	5m	5m
Down the Hole Hammer	10m	5m	5m	5m
Ripping (measured in Sydney sandstone)	10m	5m	5m	5m
Impact Piling	30m	5m	10m	20m
Vibratory Piling	30m	5m	10m	30m
Rock Sawing	10m	5m	5m	5m
Bored Piling	N/A	5m	10m	10m

Vibration impacts are highly unlikely to occur at any properties located further than the distances outlined in table 6-4 from the centre alignment during small scale vibration inducing works. To minimise the likelihood of vibration impacts the mitigation measures outlined in Table 7-1 will be implemented.

## 7 Environmental control measures

A range of environmental requirements and control measures are identified in the various environmental documents, including the REF. Specific measures and requirements to address impacts from noise and vibration are outlined in Table 7-1.

**Table 7-1 Noise and vibration management and mitigation measures**

ID	Measure / Requirement	Resources needed	When to implement	Responsibility	Reference
NV1	<p><i>A Noise and Vibration Management Plan (NVMP) will be prepared and implemented as part of the CEMP. The NVMP will generally follow the approach in the Interim Construction Noise Guideline (ICNG) (DECC, 2009) and identify:</i></p> <ul style="list-style-type: none"> <li>• <i>all potential significant noise and vibration generating activities associated with the activity;</i></li> <li>• <i>feasible and reasonable mitigation measures to be implemented, taking into account Beyond the Pavement: urban design policy, process and principles (Roads and Maritime, 2014);</i></li> <li>• <i>a monitoring program to assess performance against relevant noise and vibration criteria;</i></li> <li>• <i>arrangements for consultation with affected neighbours and sensitive receivers, including notification and complaint handling procedures; and</i></li> <li>• <i>contingency measures to be implemented in the event of non-compliance with noise and vibration criteria.</i></li> </ul>	This document	Pre-construction, construction	Environment Manager/ESR	REF NV1
NV2	<p><i>All sensitive receivers (e.g. schools, local residents) likely to be affected will be notified at least five days prior to commencement of any works associated with the activity that may have an adverse noise or vibration impact. The notification will provide details of:</i></p> <ul style="list-style-type: none"> <li>• <i>the project;</i></li> <li>• <i>the construction period;</i></li> <li>• <i>construction hours;</i></li> <li>• <i>contact information for project;</i></li> <li>• <i>management staff;</i></li> <li>• <i>complaint and incident reporting; and</i></li> <li>• <i>how to obtain further information.</i></li> </ul>	Community Stakeholder Manager Notification Resources	and Construction	Community Stakeholder Manager	and REF NV2
NV3	Further assessment of reasonable and feasible operational noise mitigation in the form of noise barriers	Noise modelling	Design	Roads and Maritime Services	REF NV3

ID	Measure / Requirement	Resources needed	When to implement	Responsibility	Reference
	<i>and at-property treatments would be assessed and determined during detailed design. At-property treatments would be determined and implemented in consultation with impacted property owners.</i>				
NV4	<i>Construction staff will be inducted and educated regarding management of noise impacts. Ongoing training through the delivery of tool box talks and pre-start meetings as required.</i>	<i>Training Resources</i>	<i>Construction</i>	<i>Environment Manager/ESR</i>	<i>REF NV4</i>
NV5	<i>Construction programming would be developed in consultation with the affected community to minimise noise impacts – this may include agreement on completing construction in as short a time as possible or implementing time and duration restrictions and respite periods.</i>	<i>Noise assessment Construction program</i>	<i>Construction</i>	<i>Engineers Project Director Community and stakeholder Manager</i>	<i>REF NV5 Section 6 of this NVMP</i>
NV6	<i>Place as much distance as possible between the plant or equipment and residences and other sensitive land uses, particularly at site compounds.</i>		<i>Construction</i>	<i>Superintendent</i>	<i>REF NV6</i>
NV7	<i>Where noise sources cannot be fully enclosed, temporary site buildings and material stockpiles will be used as noise barriers (e.g. on site compounds).</i>		<i>Construction</i>	<i>Construction Manager</i>	<i>REF NV7</i>
NV8	<i>Schedule construction of any permanent walls so that they can be used as early as possible as noise barriers.</i>		<i>Construction</i>	<i>Foreman Construction Manager</i>	<i>REF NV8</i>
NV9	<i>Avoid multiple vibration intensive activities occurring at the same time.</i>		<i>Construction</i>	<i>Foreman</i>	<i>REF NV9</i>
NV10	<i>Selection of ancillary site location should consider the proximity of the site to sensitive receivers. Where compounds are close to residences, additional care should be taken in layout and utilising structures and stockpiles as noise screens.</i>		<i>Construction</i>	<i>Engineers Construction Manager</i>	<i>REF NV10</i>
NV11	<i>Where possible, works outside of standard construction hours will be planned so that noisier works are carried out in the earlier part of the evening or night time.</i>		<i>Construction</i>	<i>Foreman</i>	<i>REF NV11</i>

ID	Measure / Requirement	Resources needed	When to implement	Responsibility	Reference
NV12	Examine different types of machines that perform the same function and compare the noise level data to select the least noisy machine. For example, rubber wheeled tractors can be less noisy than steel tracked tractors.		Construction	Construction Manager	REF NV12
NV13	Select appropriately sized equipment for the task rather than using large equipment when not necessary.		Construction	Superintendent	REF NV13
NV14	Reduce throttle setting and turn off equipment when not being used.		Construction	Foreman	REF NV14
NV15	Regularly inspect and maintain equipment to ensure it is in good working order. Also check the condition of mufflers.		Construction	Superintendent	REF NV15
NV16	Where acceptable from a work health and safety perspective, quieter alternatives to reversing alarms (such as spotters, closed circuit television monitors and 'smart' reversing alarms) would be used particularly during out of hours activities.		Construction	Foreman	REF NV16
NV17	Noise monitoring will be undertaken to assess compliance with noise management levels (NMLs) and assess the effectiveness of noise mitigation.	Sound Level Meter	Construction	Environment Manager/ESR	REF NV17
NV18	All noise complaints will be investigated and appropriate mitigation measures implemented where practicable to minimise further impacts.		Construction	Community and Stakeholder Manager Environment Manager/ESR	REF NV18
NV19	Unless in accordance with an OOH works approval, plant or machinery will not be permitted to 'warm up' before the approved working hours		Construction	Foreman	Good Practice
NV20	Where possible, maintenance work on construction plant will be undertaken away from noise-sensitive receivers.		Construction	Foreman	Good Practice
NV21	Truck drivers will limit compression braking as far as practical in the vicinity of sensitive receivers.		Construction	Foreman	Good practice
NV22	Carry out building inspection reports on all structures, buildings and utilities as per Annexure E G36	Building surveyor	Pre construction	Engineers	G36

ID	Measure / Requirement	Resources needed	When to implement	Responsibility	Reference
NV23	<i>All construction plant and equipment used on Site must be, in addition to other requirements: (a) fitted with properly maintained noise suppression devices in accordance with the manufacturer's specifications; (b) maintained in an efficient condition; (c) operated in a proper and efficient manner.</i>		<i>Pre Construction</i>	<i>Superintendent</i>	<i>G36</i>
NV24	<i>The use of horns and/or whistles to signal trucks loaded will be minimised where there are residences close by</i>		<i>Construction</i>	<i>Environment Manager/ESR</i>	<i>Good Practice</i>
NV25	<i>Works will be undertaken during standard construction hours unless approved through the Out of Hours Works Procedure (Appendix B)</i>	<i>Out of Hours Works Permit (Appendix B) Environment Protection Licence EPL 20910</i>	<i>Construction</i>	<i>Construction Manager Environment Manager/ESR</i>	<i>CNVMP OOH Works Procedure EPL</i>
NV26	<i>Park plant in accessible shielded locations where possible to minimise disruption to sensitive receivers at the start and finish to shifts.</i>		<i>Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>
NV27	<i>Establish site entry and exit points as far away from sensitive receivers as possible, where safety and traffic constraints allow.</i>		<i>Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>
NV28	<i>Maintain good communications with effected receivers through the implementation of the Community Involvement Plan.</i>	<i>CIP</i>	<i>Construction</i>	<i>Community and Stakeholder Manager</i>	<i>Good Practice</i>
NV29	<i>Effectively manage and escalate complaints as required in accordance with the CIP. Including the keeping of a community complaints register.</i>	<i>CIP Consultation Manager</i>	<i>Construction</i>	<i>Community and Stakeholder Manager</i>	<i>Good Practice</i>
NV30	<i>Where possible from a work health and safety perspective, direct lighting away from sensitive receivers.</i>		<i>Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>
NV31	<i>As far as practical, limit vehicle queueing adjacent to sensitive receivers. And where unavoidable, ensure</i>		<i>Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>

ID	Measure / Requirement	Resources needed	When to implement	Responsibility	Reference
	<i>workers are aware of appropriate behaviours. I.e. loud shouting, excessive music etc.</i>				
NV32	<i>Keep truck drivers and site personnel aware of the approved vehicle haulage routes and site access points to minimise impacts on sensitive receivers.</i>	<i>Vehicle Management Plan (VMP)</i>	<i>Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>
NV33	<i>Where possible, schedule noisier activities when neighbours are not present. I.e. outside of school or business hours.</i>		<i>Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>
NV34	<i>Where reasonable and feasible, reduce the line of site between a noise source and the receiver using temporary barriers or mobile screens. Consider the height of such screens where multistorey buildings may be impacted.</i>	<i>Temporary screens</i>	<i>noise Construction</i>	<i>Superintendent</i>	<i>Good Practice</i>
NV35	<i>Where reasonable and feasible, examine and implement the option of temporarily relocating high noise affected sensitive receivers. Such as when high noise levels from construction occur at night and there are no feasible ways of reducing noise. For example, an offer of movie tickets or alternative accommodation depending on the duration of impacts.</i>	<i>CIP</i>	<i>Construction</i>	<i>Community and Stakeholder Manager</i>	<i>Good Practice</i>

## 8 Compliance management

### 8.1 Roles and responsibilities

The Lendlease Project Team's organisational structure and overall roles and responsibilities are outlined in *Section 4.2 of the CEMP*. Specific responsibilities for the implementation of environmental controls are detailed in *Chapter 8* of this Plan.

### 8.2 Training

All employees and contractors working on site will undergo site induction training that includes construction noise and vibration management issues. The induction training will address elements related to noise and vibration management including:

- Existence and requirements of this Plan;
- Relevant legislation;
- Normal construction hours;
- The process for seeking approval for out of hours works, including consultation;
- Location of noise sensitive areas;
- Complaints reporting;
- General noise and vibration management measures; and
- Specific responsibilities to minimise impacts on the community and built environment from noise and vibration associated with the works.

Further details regarding staff induction and training are outlined in Section 5 of the CEMP.

### 8.3 Inspections and monitoring

Weekly and other routine inspections by Environmental Staff, RMS, and ERG representatives will occur throughout construction. Detail on the nature and frequency of these inspections are documented in *Section 8.2 of the CEMP*.

Noise and vibration monitoring will also occur throughout the Project. Monitoring will be undertaken by an Acoustic Consultant or the Environmental Officer during the construction phase of the Project.

#### 8.3.1 Noise monitoring

The following noise monitoring will be undertaken:

- Monthly noise monitoring will be conducted at sensitive receiver locations nominated by the LLE Environment Manager to determine the effectiveness of mitigation measures against predicted impacts. The location of monthly noise monitoring events would be guided by the nature of construction activities for the month and would include the monitoring of construction noise from within the three nearest NCA's to the construction activity to be assessed as determined by the LLE Environment Manager;

- Where complaints are received, additional noise monitoring may be undertaken at sensitive receivers to determine if the actual construction noise generated exceeds the predicted 'worst case' construction noise levels identified in *Section 6.2 of this Plan*;
- Noise monitoring may be carried out for the purpose of refining construction methods or techniques to minimise noise;
- Ongoing spot checks of noise intensive plant and equipment will be undertaken throughout construction to ensure compliance with manufactures specifications; and
- As directed by the EPA in accordance with the EPL issued to the Project.

Where actual noise levels are found to exceed the predicted worst case levels by more than 2dB, the source of excessive noise generations will be identified, and any additional feasible and reasonable measures available will be implemented to either reduce noise emissions or reduce the impacts on receivers.

Details of site activity and equipment usage will be noted during construction noise monitoring.

Acoustic instrumentation employed in the noise monitoring surveys will comply with the requirements of AS IEC 61672.1-2004 Electroacoustics - Sound level meters - Specifications and carry appropriate NATA (or manufacturer) calibration certificates.

### **8.3.2 Vibration monitoring**

The following vibration monitoring will be undertaken:

- For the protection of buildings, monitoring will be carried out at the commencement of vibratory compaction work within 50 metres of buildings to ensure that safe vibration levels specified in *Section 6.3.1* are not exceeded and to confirm safe working distances;
- When vibration intensive activities are required, vibration monitoring will be carried out within the established buffer zones, or where there is considered to be a risk that levels may exceed the relevant structural damage goals;
- Vibration monitoring may be carried out in response to complaints, exceedances, or for the purpose of refining construction methods or techniques to minimise vibrations; and
- Vibration monitoring will continue throughout construction, as determined by the Environment Manager, at nominated sensitive receiver locations to determine the effectiveness of mitigation strategies.

Where vibration is found to exceed safe levels, work methods and/or equipment will be assessed and any reasonable or feasible measures put in place. In the event a complaint relating to property damage is received, an inspection of the property would be undertaken and an interim building condition survey prepared.

Vibration monitoring will be carried out in accordance with:

- For structural damage vibration – German Standard DIN 4150 and BS 7385: Part 2 – 1993; and
- For human exposure to vibration – the evaluation criteria presented in the Environmental Noise Management Assessing Vibration: A Technical Guideline (DECC 2006).

## 8.4 Non-conformances

Non-conformances in general will be dealt with and documented in accordance with *Section 8.6 of the CEMP*.

## 8.5 Complaints

Complaints will be recorded in accordance with the Community Involvement Plan (CIP) and the EPL. Information to be recorded will include location of complainant, time/s of occurrence of alleged noise or vibration impacts (including nature of impact particularly with respect to vibration), perceived source, prevailing weather conditions and similar details that could be utilised to assist in the investigation of the complaint. All resident complaints will be responded to in a timely manner and action taken recorded in accordance with the CIP.

## 8.6 Auditing

Audits (both internal and external) will be undertaken to assess the effectiveness of environmental controls, compliance with this Plan and other relevant approvals, licenses and guidelines.

Audit requirements are detailed in *Section 8.3 of the CEMP*.

## 8.7 Reporting

Reporting requirements and responsibilities are documented in *Section 8.5 of the CEMP*.

Specific reports prepared in response to noise and vibration monitoring will capture detail including, but not limited, to:

- The locations and description of monitoring undertaken;
- A tabulation of results (e.g. for noise including  $L_{MAX}$ ,  $L_{10}$ ,  $L_{90}$  and  $L_{Aeq}$  noise levels) together with notes identifying the principle sources and operations;
- Summary of any measurements exceeding the nominated criteria, and descriptions of the plant or operations causing these exceedances; and
- Detail of any corrective actions and confirmation of their successful implementation.

## 9 Review and improvement

### 9.1 Continuous improvement

Continuous improvement of this Plan will be achieved by the ongoing evaluation of environmental management performance against environmental policies, objectives and targets for the purpose of identifying opportunities for improvement.

The continuous improvement process will be designed to:

- Identify areas of opportunity for improvement of environmental management and performance;
- Determine the cause or causes of non-conformances and deficiencies;
- Develop and implement a plan of corrective and preventative action to address any non-conformances and deficiencies;
- Verify the effectiveness of the corrective and preventative actions;
- Document any changes in procedures resulting from process improvement; and
- Make comparisons with objectives and targets.

### 9.2 Update and amendment

The processes described in *Section 8 and Section 9 of the CEMP* may result in the need to update or revise this Plan. This will occur as needed.

Only the Environment Manager/ESR, or delegate, has the authority to change any of the environmental management documentation.

A copy of the updated plan and changes will be distributed to all relevant stakeholders in accordance with the approved document control procedure – *refer to Section 10.2 of the CEMP*.

## Appendices

Appendix A: OOHW Works Approval Permit

Appendix B: OOHW Approval Process

# 1 Introduction

The North Road – Stage 3 North Project (the Project) will require a considerable amount of work outside standard construction hours due to safety, quality and traffic management reasons. These Out of Hours Works (OOHW) have the potential to exceed relevant noise management levels (NMLs) determined in accordance with the approach outlined in the Interim Construction Noise Guidelines (DECC, 2009) (ICNG).

As OOHW have the potential to impact on the amenity of adjacent sensitive receivers, these works require assessment and approval prior to commencement. This protocol defines the process for that assessment, approval and applicable mitigation measures for all OOHW associated with the Project.

All OOHW associated with the Project will be undertaken in accordance with this protocol.

## 2 Approval Requirements

The project has been assessed under Part 5 of the EP&A Act through the development and subsequent determination of a Review of Environmental Factors (*REF: The Northern Road Upgrade between Glenmore Parkway, Glenmore Park and Jamison Road, South Penrith*).

The standard working hours for the project as defined within the REF are:

- Monday to Friday: 7am to 6pm;
- Saturday: 8am to 1pm; and
- Sundays and Public Holidays: no work.

The REF identified a number of activities that would require works outside of standard construction hours to complete the project in a manner that ensures the safety of the community and the work force, reduces the duration of construction Impacts on the surrounding receivers and maintains the operational functionality of the road network in the local area.

Consistent with ICNG the REF identified the following categories of work that may be undertaken outside of the standard construction hours:

- Delivery of oversized plant or structures, where police or other authorities have determined that special transport arrangements are required;
- Emergency work, to avoid the loss of life or damage to property, or to prevent environmental harm;
- Maintenance and repair works, where disruption to essential services and/or safety considerations do not allow work within standard construction hours;
- Public infrastructure works that would shorten the duration of a project and are supported by the Impacted community; and
- Work where a proponent demonstrates and justifies the need to operate outside standard construction hours.

Construction activities that are undertaken outside of standard construction hours will be subject to review and approval as detailed within this Out of Hours Works Protocol, and subject to the conditions of the Environment Protection License issued to the Project.

### **3 OOHW Justification**

OOHW undertaken on public infrastructure projects such as road construction necessary to sustain the operational integrity of roads are considered justified in the ICNG.

Generally, works that are considered justified on the Project are works that are required to:

- Maintain the functional integrity of the M4 Motorway and The Northern Road (including associated side roads) particularly during time of high traffic volumes;
- Maintain the structural integrity of existing and new road infrastructure proposed as part of the Project;
- Promote the safety of road users, construction personnel and the public in general; and
- Minimise potential services/utilities disruptions (e.g. businesses and residential areas).

Justification for any activities proposed as OOHW must be established to the satisfaction of the Environment Manager including the noise assessment as detailed in Section 4 prior to commencement.

### **4 OOHW Noise Assessment**

To manage potential impacts from noise and vibration, an acoustic consultant was engaged by the Project to prepare a Construction Noise and Vibration Impact Statement (CNVIS) and develop tools that allow the prediction of noise impacts resulting from proposed OOH works. These tools enable the assessment of noise impacts on sensitive receivers based on inputs of the location and types of construction machinery operating inside a noise catchment.

Quantitative assessments will be completed for all OOHW and will predict the potential exceedances of the scenario against the relevant noise management levels (NMLs) identified for the potentially affected sensitive receivers. The assessment will be undertaken using the prediction tools developed by the Project's acoustic consultant. The assessment tools will identify the potentially affected sensitive receivers and the impact classification for each of those receivers as outlined in Table 5.1. The prediction tool assessment then identifies the management measures, as described in Table 6.1, to be applied in addition to those within the INCG.

These noise assessments along with the selection of reasonable and feasible management measures both from the ICNG and Table 6.1 will be considered by the Environment Manager when determining the approval for OOH works.

#### **4.1 High Noise Impact Equipment Use**

Equipment that can generate high noise impacts include jackhammering, rock breaking or hammering, pile driving, concrete cutting, smooth drum vibratory rolling and impact piling occurring on the surface and generating noise with impulsive, intermittent, tonal or low frequency characteristics. Where reasonable and feasible, these pieces of equipment will be used:

- Between 8am-6pm, Monday to Friday;
- Between 8am-1pm Saturdays; and

- In continuance blocks of no more than 3 hours with at least a one hour respite between each block of work generating high noise impact, where the location of the work is likely to impact the same receivers.

Where the use of such equipment is proposed OOH:

- The equipment will be used prior to 10pm where reasonable and feasible;
- Where the above cannot be achieved the equipment will be used prior to midnight where reasonable and feasible; and
- It is not proposed to apply a 3 hour on and a 1 hour off respite approach during OOH works in an effort to ensure that the use of such equipment is completed as early in the night as possible.

## 5 OOHW Noise Impact Classification

Consistent with other current infrastructure Projects being delivered in the Sydney region eg: WestConnex M4 Widening and North Connex the level of noise impact exceedance above the Noise Management Levels (NML) will be broken into five classifications.

These categories have been derived from management measures described in the ICNG, and the REF.

For all OOHW, potentially affected sensitive receivers predicted to experience noise levels above the relevant NML will be classified as per Table 5-1 based on noise levels determined in the assessment process outlined in Section 4.1 and 4.2.

**Table 5-1 Impact Classification**

Impact Classification		(LAeq 15 min) Exceedance of RBL (dB)
NML Compliant	A	1- 5
	<b>B</b>	6-10
	<b>C</b>	11-20
	<b>D</b>	21-30
	<b>E</b>	>30

## 6 OOHW Noise Management and Mitigation Measures

### 6.1 Detailed management measures

After the noise assessment process as described in Section 4, the most appropriate reasonable and feasible management measures are determined in accordance with the ICNG. In addition, specific management measures to be considered for each noise impact classification is shown in Table 6-1 below.

It should be noted that there may be personal circumstances among the sensitive receivers where the below approach to specific additional mitigation measures is not best suited. The

Community and Stakeholder Manager has the authority to amend the below approach taking into account due consideration of the personal circumstances that may apply.

**Table 6-1 Management for OOHW Noise Impact Classification**

Management Measure	Impact Classification				
	A	B	C	D	E
Programming / schedule of works	✓	✓	✓	✓	✓
Alternative construction techniques/scheduling	✓	✓	✓	✓	✓
Alternative plant and equipment	✓	✓	✓	✓	✓
Community consultation (i.e. letter box drops, etc)		✓	✓	✓	✓
Noise monitoring			✓	✓	✓
Receiver Specific Notifications				✓	✓
Receiver Specific Contact (i.e. Face to Face Consultation)				✓	✓
Respite Periods				✓	✓
Good will offer				✓	✓
Reasonable temporary relocation offer <sup>1</sup>					✓

Note 1: Temporary relocation to be offered where construction works are planned to extend over more than two consecutive nights at that impact classification

## 7 Approval of OOHW

When it is identified that OOH works are required, the engineer responsible for the works will submit an Internal Out of Hours permit, as shown in Appendix A, justifying the need to carry out the works, to the Environmental Officer. The noise and vibration assessment process as described in Section 4 will be undertaken by the Environmental Officer under the supervision of the Environment Manager where required and forwarded to the Environment Manager and Community and Stakeholder Manager who will review the predicted impacts and management measures to be implemented.

The Environment Manager will approve works in accordance with the requirements of clause L4.8 of EPL#20910.

The Environment Manager has the authority to approve out of hours works following impact assessment described in Section 4 and classification as specified in Table 5-1 in accordance with the following:

1. Works assessed to meet noise impact classifications of A and B;
2. Works assessed to meet noise impact classifications of C as specified in Table 5-1, the Environment Manager may only approve out of hours works that comply with the following restrictions:
  - a. Three consecutive evenings or nights, in a calendar week;
  - b. Four evenings or nights in a calendar week.
3. Works assessed to meet noise impact classifications of D and E as specified in Table 5-1, the Environment Manager may only approve out of hours works that comply with the following restrictions:
  - a. Two consecutive nights, in a calendar week;
  - b. Three nights in a calendar week; and
  - c. Twelve evenings or nights within a period of four consecutive weeks.

Any works proposed on a public holiday must be approved by the EPA.

Following confirmation of compliance with the above criteria and adhering to the process described in Section 4 approval to carry out the works will be provided to construction team by the Environment Manager utilising the Out of Hours Work Approval Permit in Appendix A.

On receipt of the approval for the OOHW, any specific conditions that relate to the OOHW will be:

- Implemented prior to works (such as any additional notification to the community);
- Toolboxed to relevant workforce and site personnel before each shift to introduce/reinforce works restrictions, management measures and expected workforce behaviour; and
- Implemented during works and monitored by the Project environment team.

## **8 OOHW Community Consultation and Communication**

A suite of communication tools and activities will be utilised as required to target the relative zone audience based on the nature of works and the potential impacts to provide clear, effective and timely information. The community consultation will be carried out in accordance with the project Community Involvement Plan (CIP).

For OOHW predicted to generate noise at impact classification B and above (Table 5-1), Lendlease will notify potentially affected noise sensitive receivers, Roads and Maritime Services, the Penrith Council, and other affected stakeholders, of works approved outside of standard construction hours not less than 5 days and not more than 14 days before those works are to be undertaken.

The notification will:

- by letterbox drop or email ;and
- be detailed on the project website.

The notification will:

- clearly outline the reason that the work is required to be undertaken outside the hours;

- include a diagram that clearly identifies the location of the proposed works in relation to nearby cross streets and local landmarks;
- include details of relevant time restrictions that apply to the proposed works;
- clearly outline, in plain English, the location, nature, scope and duration of the proposed works;
- detail the expected noise impact of the works on noise sensitive receivers;
- clearly state how complaints may be made and additional information obtained; and
- include the number of the project telephone complaints line, an after-hours contact phone number specific to the works undertaken outside the hours and the project website address.

## **9 Approval Authorities**

### **9.1 EPA**

An EPL has been issued for the construction of the Project and the conditions within incorporated as part of the OOH approval. Consistent with the requirements of EPL 20910 the Environment Manger will be responsible for the assessment and approval of OOHW, both in terms of the noise assessment as well as the implementation of reasonable and feasible mitigation measures. OOHW that can be approved by the Environment Manager in accordance with the EPL are detailed within license conditions:

- L4.4;
- L4.6;
- L4.7; and
- L4.10.

EPL variations will be sought through consultation and application to the EPA for works that fall outside the approval process.

### **9.2 RMS**

RMS will be notified of any proposed OOHW in accordance with Section 8 above.

## **10 OOHW Enquiries / Complaints Management**

The project team will initiate investigations of noise complaints that are received on the telephone information line (1800 870 665) in line with the EPL conditions (within 2 hours of receiving any such complaint), or in accordance with an agreement negotiated with the complainant.

Each complainant will be advised of the results of the investigation into their complaint and any proposed remedial action.

Complaint records will be kept for at least 4 years following the complaint and will contain:

- a) The date and time of the complaint;
- b) The method by which the complaint was made;
- c) Any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
- d) The nature of the complaint;
- e) The action taken by the Project in relation to the complaint, including any follow-up contact with the complainant; and

- f) If no action was taken by the Project, the reasons why no action was taken.

The details of any complaints received will be forwarded as a report to the EPA by 2pm each business day. This report will include the complaints received between 12.00pm on that day and 12.00pm on the previous business day.

## **11 OOHW Monitoring**

All monitoring will be conducted in accordance with the relevant Australian Standard / guideline in accordance with the EPL.

### **11.1 Noise Monitoring**

The following noise monitoring will be undertaken:

- Monitoring will be undertaken periodically to verify the noise model predictions of OOHW in order to ensure effectiveness of management measures;
- Monitoring in response to complaints as determined by the Environment Manager;
- Monthly noise monitoring for OOHW periods at construction compounds in order to ensure effectiveness of controls and verify compliance with NMLs; and
- Ongoing spot checks of high noise impacting plant and equipment will be undertaken throughout construction to ensure compliance with the maximum noise level goals for construction equipment identified within the CNVMP.

### **11.2 Monitoring Records**

All monitoring records relating to approved Out of Hours works will be recorded on the monitoring record forms as detailed within the NVMP. In addition to recording the relevant data will include at least:

- a) The date on which the sample was taken;
- b) The time at which the sample was collected;
- c) The point at which the sample was taken; and
- d) The name of the person who collected the sample.

The records will be kept on site at the Project office and will be available for review upon request by an authorized representative of the Environment Protection Authority.

## **12 OOHW Exceedances / Non-Conformances**

### **12.1 Management Response**

Where monitored noise levels are found to be above predictions the following actions will be undertaken:

- Confirm that monitored levels are not being impacted by other noise sources;
- Implement other feasible and reasonable measures which may include reducing plant size, modify time of works, changing operational settings (such as turning off the vibratory function of the machine), and utilising alternate construction methodology or a combination of these;
- Review work practices to ensure compliance with the ICNG;
- Confirm if the exceedance is due to an uncharacteristically loud piece of equipment;
- Identify if equipment can be swapped out for another piece of equipment or alternative equipment or plant;
- Confirm that the modelling reflects the actual activity being undertaken; and

- Ensure that learning's from the above are fed back into the noise modelling assessment process.

Previously recorded non-conformances will also be considered prior to the approval of further Out of Hours permits.

## **12.2 Reporting**

Noise complaints will be reported as required by the Environment Protection License.

## Appendix A

---

### **OOHW Approval Permit**

## Appendix B

### **OOHW Process**

# TNR3N OOH Work Permit

PART A: Completed by Site/Project Engineer (5 Weeks Prior to Proposed Works)	
<b>Requested By:</b>	<b>OOHW Permit No:</b>
<b>Scheduled Commencement Date:</b>	
<b>Planned Completion Date:</b>	
<b>Note: Approved commencement dates (refer to Part C) may vary to scheduled dates proposed</b>	
<b>Location (Chainage of Works) or attach location map:</b>	
<b>Description of Proposed Out of Hours Work</b> Include a brief description of the work, the sequence and the plant/equipment to be used at specific intervals eg: 2200 – 2300 hours 3 lighting towers, concrete saw, 20t excavator, truck & dog etc.	
<b>Justification for Proposed Out of Hours Work</b>	
<b>Proposed Noise Mitigation Measures</b>	

**Justification for Use of High Noise Impacting Equipment:**

*(jackhammering, rock breaking or hammering, pile driving, concrete cutting, vibratory rolling and impact piling occurring on the surface and generating noise with impulsive, intermittent, tonal or low frequency characteristics.)*

**Justification:**

**Mitigation measures to be applied to equipment to be used prior to 10pm:**

**Mitigation measures to be applied to equipment to be used prior to midnight:**

**Justification and mitigation measures if high noise impacting equipment is proposed for use after midnight:**

**Proposed Light Spill Mitigation Measures**

**SAFETY** - Confirmation that the Safety Manager has been informed of the works.

Safety Manager Name:

Date: Signature:

**TRAFFIC** – Out of Hours works involving road or lane closures are permitted by the Environment Protection Licence where the road authority will ONLY allow those closures to occur outside standard construction hours. The OOH Permit applicant must secure confirmation of the Traffic Manager that daytime road / lane closures are not available to complete the work.

**Road occupancy approval from the relevant authority is ONLY available outside standard construction hours.** (Standard Construction Hours: Mon – Fri 7am to 6pm or Sat 8am – 1pm) Please circle  
**YES / NO**

Traffic Manager Name:

Date: Signature:

List the relevant ROL reference codes & the issuing authority:

ROL (road occupancy licence/permit)	Issuing Authority (TMC / RMS / Council name etc..)

**Construction Manager Endorsement**

Manager Name:

Date: Signature:

**Part B: Approval – Completed by Environment Officer and/or Manager**
