

Transport for NSW

Warringah Freeway Upgrade

Community update | March 2021

About the Warringah Freeway Upgrade

The NSW Government's vision for Sydney is one of an integrated road and public transport network that gives you the freedom to choose how and when you get around, no matter where you live and work.

The Western Harbour Tunnel and Warringah Freeway Upgrade is a major transport infrastructure project that will make it easier, faster and safer to get around Sydney. By creating a western bypass of the Sydney CBD, the Western Harbour Tunnel will take pressure off the Sydney Harbour Bridge, Sydney Harbour Tunnel, Anzac Bridge and Western Distributor corridors to improve transport capacity in and around Sydney Harbour.

The Western Harbour Tunnel and Warringah Freeway Upgrade project along with Beaches Link, is expected to support around 15,000 full-time equivalent jobs during construction.

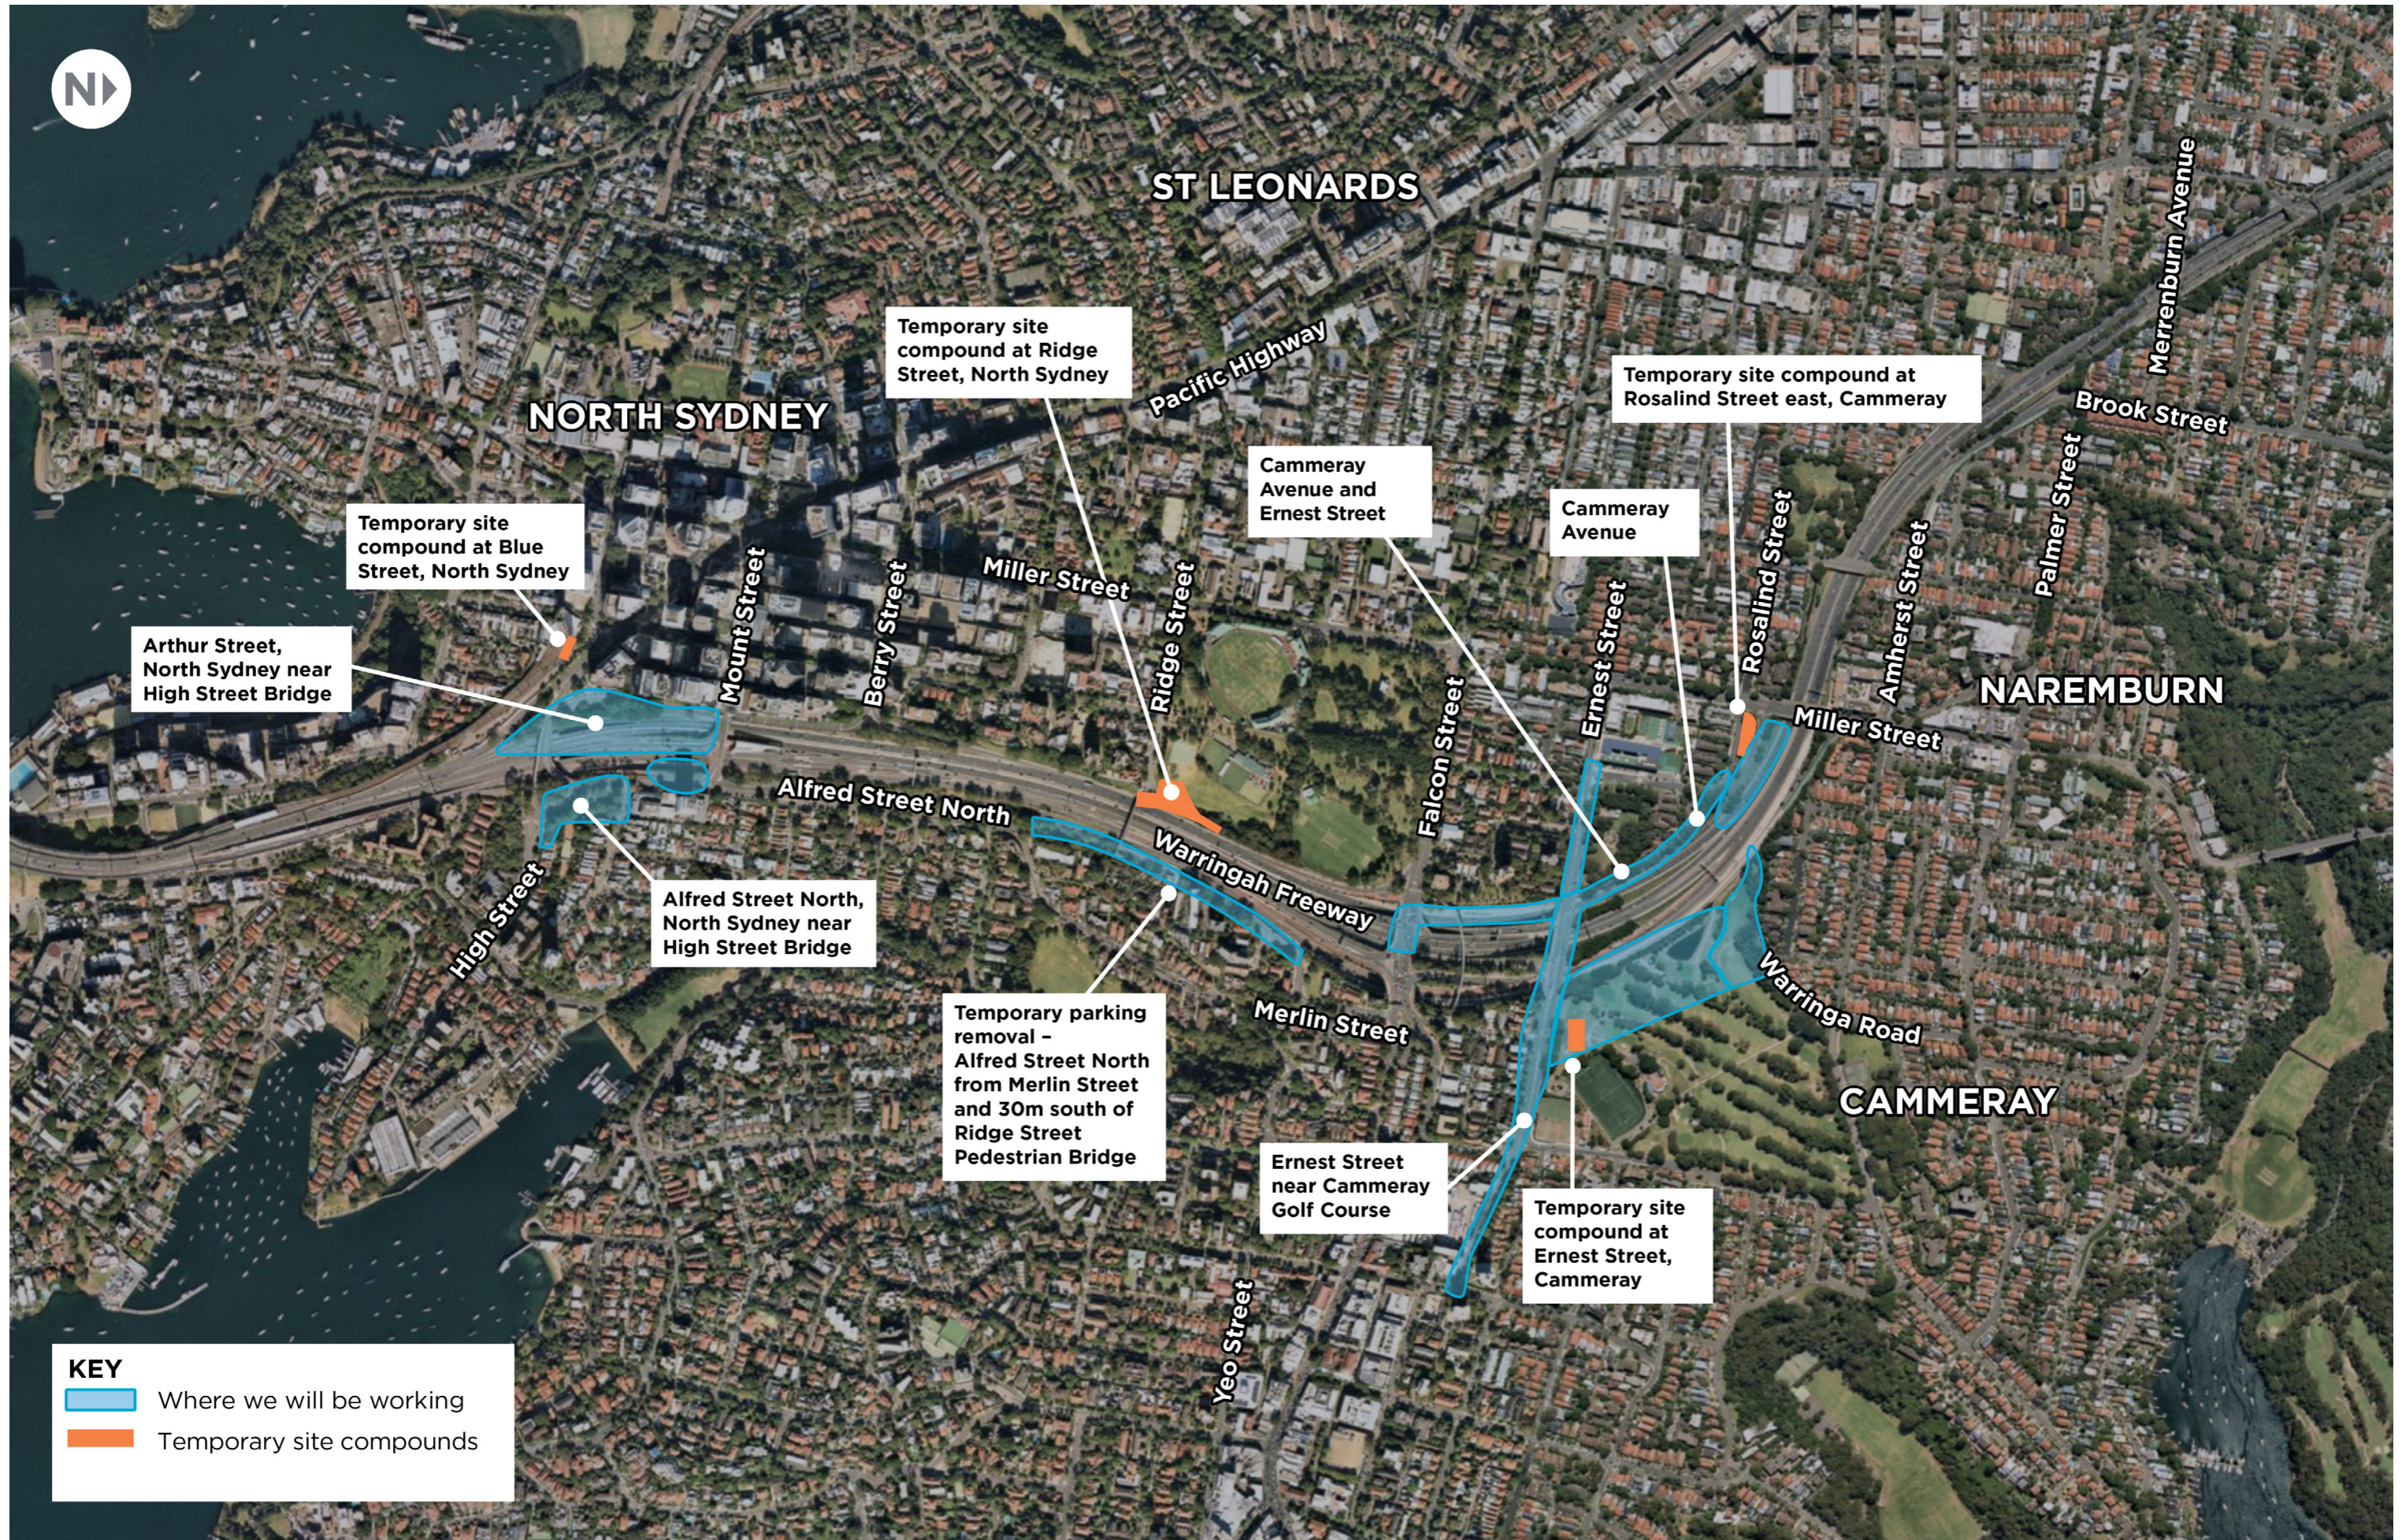

Service and utility work starting soon

Service and utility relocation and removal work will be starting in March. This work is being carried out by the Sydney Program Alliance on behalf of Transport for NSW. This work will include establishing four temporary site compounds, above and below ground service and utilities relocations and removal including power, water, sewer and telecommunications.

Warringah Freeway Upgrade

You may see us in your local area

In the coming months we are starting work in your local area. Our service and utility relocation and removal work will include:

- setting up temporary construction site compounds with offices, access driveways, parking, fencing and signage
- ground investigations, surveys and potholing with the use of handheld and truck-mounted equipment
- relocating and removal of utilities including power, water, sewer and telecommunications
- surveying roads, bridges and other infrastructure
- installing traffic arrangements including temporary detours and removal of some local street parking to create safe work areas with the support of traffic controllers and signage
- trimming/removal of some vegetation, subject to assessment by qualified arborist.

All efforts will be made to minimise impacts where possible and ensure environmental conditions relating to noise, vibration and dust management are adhered to.

We will be mainly working during standard construction hours (**Mondays to Fridays from 7am to 6pm and Saturdays from 8am to 6pm**). We will notify local residents in advance should we work outside these hours.

Working in your community

Over the coming weeks we will provide you with specific information about work in your area through work notifications in your letterbox, by email and we will be in the area doorknocking local residents next to our temporary work compounds.

Please contact us if you would like to be added to the services and utility relocation and removal work email distribution list or for more information.
