

Western Harbour Tunnel and Warringah Freeway Upgrade

Upcoming investigation work for the Warringah Freeway Upgrade

The Western Harbour Tunnel and Beaches Link program is a major transport infrastructure program that will make it easier, faster and safer to get around Sydney. By creating a western bypass of the Sydney CBD, the Western Harbour Tunnel will take pressure off the congested Sydney Harbour Bridge, Sydney Harbour Tunnel and Anzac Bridge; while Beaches Link will create an alternative to the Military Road and Warringah Road corridors to relieve traffic pressure on the North Shore.

A program of this scale is expected to support up to 15,000 full-time equivalent jobs during its construction.

Over the next two months, we will be carrying out investigation work around the Warringah Freeway to collect more information about underground services. This information will be used to help inform the ongoing planning for the Western Harbour Tunnel and Warringah Freeway Upgrade Project.

When will we be working?

This work will start in mid-August and take about two months to complete, weather permitting. **Most of our work will take place during the day from 7.00am to 6.00pm Monday to Friday and from 8.00am to 1.00pm on Saturdays.**

While most of our work will be during the day, to maintain safety and capacity on the road network when we are working near live traffic we will need to work at night. Working next to and on existing roads, means traffic may need to be slowed or the number of lanes reduced, while work is carried out. By working at night, delays are minimised and journey times for motorists are less affected.

Supporting NSW amid COVID-19

The health and safety of our workforce and the wider community will be top of mind as we carry out our work. This will include ensuring our workers follow the appropriate hygiene and social distancing guidelines.

Investigation areas

How will the work affect you?

Work will be carried out in various locations around the Warringah Freeway from North Sydney to Cammeray. We have included a map to show you where we will be working. We have programmed our work across two months at different locations to give you respite.

You will see us in the area setting up traffic and environmental controls and installing temporary fences around our work sites. We will also be surveying, electronic service locating and potholing to identify underground services using vacuum trucks, a small excavator, road saw, tipper trucks and plate compactor.

When we are finished, we will fill in the holes, clean up the sites and reinstate grass, as appropriate.

When we are looking in parks and public spaces there will be small areas which we need to fence off during our work. You will still have access to the parks and public spaces while these investigations take place.

Our work may be noisy at times, but we will do everything we can to minimise the impact on you. We will work closely with you during our work and we encourage you to give us a call if you have any issues or concerns.

Will there be changes to traffic?

While we are working, there will be temporary traffic changes to ensure the work area is safe. This means traffic may be needed to be slowed or the number of lanes reduced in an area. Parking may also be impacted during the work.

Want to stay in touch?

If you would like to be kept up to date on when the work is happening next you or at night, please **contact the project team on 1800 931 189 or via whtbl@transport.nsw.gov.au and register for updates.**

We will also be providing a weekly website update so please **check our website on nswroads.work/whtbl** for up to date information on our work.
