# Concessions to ASA Requirements (T MU MD 00011 ST) V2.0

Richard Hitch, Lead Civil Engineer

March 2016

# Concessions to ASA Requirements (T MU MD 00011 ST) V2.0

- Now covers non-conformances
- Concessions now reasonably well understood by industry
- Intelligent compliance, early engagement

## Supporting information for concession requests

- Specific section of standard
- Justification
- Risk assessment (structured argument – not just risk matrix)
- Options considered (whole of life costs to be considered)
- Stakeholder endorsement (including stakeholder details)

## **Non-conformances**

- when it is too late for concession

## Supporting information for non-conformances

- Specific section of standard
- What led to situation
- Justification of why can't comply
- Risk argument (incl. design AEO certification that risk managed to SFAIRP)
- Maintenance and reliability effects
- Plan for future management
- Approval by all relevant stakeholders
- Lessons learnt

ASA 'no objection'

Non-conformances and AEO performance evaluations

# Thank you
