

Power Supply Upgrade Program

Strathfield to Hornsby Power Upgrade

NOVEMBER 2017 COMMUNITY NOTIFICATION

Transport for NSW is upgrading the signal and power supply systems between Strathfield and Hornsby. This upgrade is part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney's future rail network and new fleet of air conditioned trains.

Upcoming work

The main work activities for the project have now been completed. In November we will carry out minor adjustments to overhead wires and poles, tree trimming and vegetation removal.

Epping to Pennant Hills

Throughout November, we will be working between Epping and Pennant Hills stations. Work will take place during standard construction hours **7am to 6pm Monday to Friday** and **8am to 1pm on Saturdays**. Work activities include:

- Vegetation clearing and removal as required to provide safe access to the poles and wires
- Tree trimming inside the rail corridor
- Overhead wire adjustments
- Delivery of plant and equipment to these locations to undertake this work

What you may notice

Construction noise

Equipment to be used includes elevated work platforms, excavator, tip truck, chain saws, wood chipper, whipper snippers, construction vehicles, power tools and hand tools.

Some activities may be noisy, however we will take every possible step to reduce noise such as turning off machinery when not in use.

Keeping the community informed

We thank you for your understanding during this important work. If you would like to speak to a member of the project team about work in your area, please contact us at the details provided below.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **(02) 9200 0200**. The interpreter will then assist you with translation.
