Playing even field for UBER, hire car and taxi.

1:- Vehicle

: -UBER vehicle (car should be standard recommended by ministry of transport)

2:- UBER car should be inspected every 4 month.

3 :- UBER car should be fitted with camera for the safety of community, and camera should be inspected every 4 month.

4:- It must have to have price control, not to rip off community.

5:- UBER vehicle should be registered on the name of uber driver, as a commercial vehicle. Not on the name of company.

DRIVER:-

1:-Each UBER driver should pass the English test.

2:-Each UBER driver should pass the test as like taxi drivers pass the test.

3:- Each uber driver's history should be check up. For the safety of our community.

INSURANCE:-

CTP should be same as taxi pay for one year. It does not matter you drive one hour or two hour or one day or two day regard less. In taxi we got single operator they pay for whole one your CTP, the same uber driver should pay. Because uber it is another transport industry. So field should be even.

Airport priority pick up point:-Taxi pick up point should be separate not to mix us with uber and private car pick up. Because it is is to dangerous for the public at same place.

Regards
Jatin
